## BLUE LABEL 34% BETTER KNOT STRENGTH\*

Incredible impact and abrasion resistance. Fast sinking. Superior tensile and knot strength. The original FC (Blue Label) Seaguar® 100% fluorocarbon leader material allows you to use a smaller test leader than comparable nylons or fluorocarbon for unmatched bait presentations.

No wonder it's preferred by anglers the world over.

**NEARLY IMPERVIOUS**

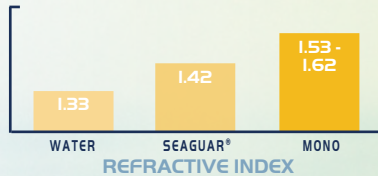

SEAGUAR® line maintains its original quality while nylon line loses its strength and becomes thicker in water.

**SINKS FASTER**

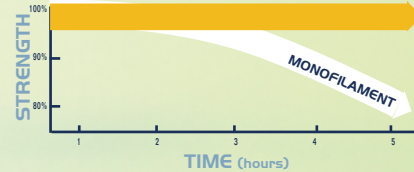

SEAGUAR® line gets you to the strike zone faster.

**VIRTUALLY INVISIBLE**

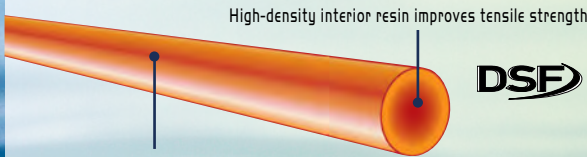

The closer the refractive index is to water, the harder it is for fish to see.

**OPTIMAL TENSILE STRENGTH**

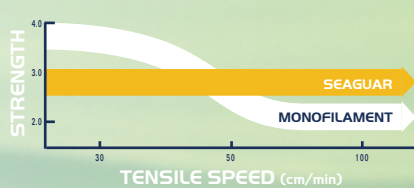

SEAGUAR® line maintains optimal tensile strength because it absorbs less water.

**DOUBLE-STRUCTURE FLUOROCARBON**

Double-Structure Fluorocarbon creates a combination of higher knot strength and sensitivity.

**MAINTAINS KNOT STRENGTH**

SEAGUAR® line maintains knot strength in high-speed hookups and hook-sets.
