Super Seeker

THE BEST OF THE BEST
JUST GOT BETTER

Seeker fishing rods is proud to announce the release of the long awaited **Super Seeker** Rods and Blanks.

We believe that these are simply the very best blanks produced incorporating the latest technology in materials with a "Classic Look".

Why **Super Seeker**?...because we are answering angler demands for blanks and rods that are capable of matching up with today's powerful two speed reels. Such as American made Avet and Accurate reels.

How is this accomplished? By using *the latest technology in material and resin system*, we have combined 120 carbon fiber and "Super" Glass with our new EH04 epoxy resin system, together they create the most powerful and fastest recoil blanks **Seeker** has ever built.

The **Super Seeker** blanks are *brown with a tangerine finish*.

Normally blanks break on the bottom side. The top side of the blank can stretch more than the bottom can compress. By using the "Super" Glass tip and the EH04 resin system it gives these blanks **three times the compression strength of "E" Glass** and produces **faster recoil**. What is produced is the strongest most powerful blanks and rods **Seeker** has ever built.

Seeker new front and rear grips use a new material called E.P.D.M. It is softer but more durable than Hypalon reducing wrist fatigue. The color is unique to **Seeker** Rods.

Our **NEW** American Titanium frame guides with Nanolite inserts are are 100% corrosion resistant (no welds, 100% Titanium). The reel seats are 6061-T6 Aluminum black hard anodize. The Aftco black and gold stripper roller guide is a big foot for better alignment of line coming off the larger reels.

Triple wrapped guides with the Titanium frame reduce finish cracking.

Cork tape rods have the Diamond shrink tubing over cork tape with a Turks Head Knot to increase the cosmetics of these rods.

Seeker Rod Co.
recommends **catch and release**

Super Seeker Series GRAPHITE COMPOSITE "SUPER" GLASS / GRAPHITE (TRIPLE WRAPPED)

THE BEST OF THE BEST. THE ULTIMATE IN PULLING POWER.
