Made in the U.S.A.

Series Hercules

Deep water jigging rods, built on Devious Red, "S" glass Composite blanks, the **Hercules Series** Rods are built for light weight and strength to meet the exacting requirements set forth by Rod builder **Billy Vivona**, of **XLrods**.

These extreme duty rods, feature the slow action required for deep water jigging and the latest **American Tackle**, "**Virtus**" Ring Lock, **Solid Titanium frame Guides**, that are **60% lighter than Stainless steel**, better protect the incredibly strong **Nanolite** rings and **eliminate corrosion**.

The guide wraps are black over a metallic grey underwrap with gold trim bands and red accent inlays.

The Reel Seats and Gimbals are either a Composite or gun metal grey Aluminum, and are combined with Black EVA grips.

Hercules Series			
Model	Length	Line Rating	Blank Number
SHS 70L-7'	7'	15-30	CSW 748
