

About Super Spreader™ Cast Nets

Cast Nets by Fitec are the #1 best selling cast net in the world. We take great pride in providing customers with high-quality products at affordable prices.

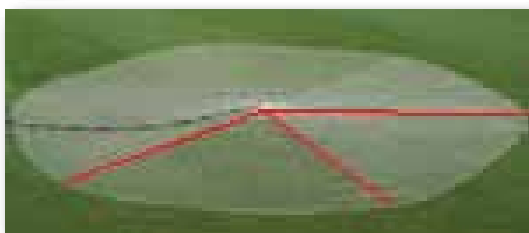

World's Largest Manufacturer

Today, Cast Nets by Fitec enjoy a large distribution channel through retailers, distributors, and finer bait and tackle dealers offering a wide assortment of nets available in various dimensions, weights, colors, and materials to meet all of the fisherman's needs.

Fitec has been producing fine quality cast nets since 1984 offering handmade quality nets at affordable prices.

Catch the Ultra Spreader™ Difference

Ultra Spreader™

THE PIE PANEL CAST NET:
Made by sewing triangular net panels together, the GS 1000 and GS 1500 lies flatter on the bottom sealing in the bait and spreads more than bullseye nets.

Super high strength and high durability lead lines allow for non-kink performance.

Superior Construction with double selvage for durability, strength and bottom seal

THE BULLSEYE CAST NET:

Made by sewing net strips in concentric circles around the net's horn with each sewed circle gathered at the seam to create an elliptical net, the bullseye net is available in the RS 750, EZ 750, EZ 1000, and the SS 1000 series. This is the most popular construction. FITEC Bullseye nets lie flatter and spread greater than other brands.

RS-750 Super Spreader™

The RS-750 Super Spreader™ Series is our lightest weight series. This series can fill the many needs of the cast net thrower. It is designed for the beginner to novice cast net thrower or wherever a lighter weight net is called for. Reliable performance with every use. Sinks fast, prevents bait escape, but easy to throw. Triple tied system in joining lead line to the netting.

- AVAILABLE IN MONOFILAMENT AND NYLON NETTING
- 3/4 POUND PER RADIUS FOOT
- HEAVY DUTY 12 COUNT 80 LB TEST
- HIGH FLOATING 20 FOOT LONG BRAIDED POLYETHYLENE HAND LINE
- BULLSEYE DESIGN
- A guide to throwing a cast net is included with each net
- Free throwing aid is included with each net

Super Spreaders™

SS-1000 Series

1 POUND PER RADIUS FOOT

SS-1000 Super Spreader™

The SS-1000 Super Spreader™ Series Cast Net is one of the most popular cast nets sold in America! A “true” pound of weight per radius foot allows the net to sink at a faster rate. The SS-1000 covers all of your casting needs from a 3/16” mesh size up to a 5/8” mesh size. Comes in three colors (clear, blue & green).

- EXCLUSIVE SPS™ JAPANESE MONOFILAMENT RESIN NETTING
- ACTUAL ONE POUND OF WEIGHT PER RADIUS FOOT
- HEAVY DUTY HIGH COUNT 90-POUND-TEST BRAILLE LINES
- LONG HIGH FLOATING 26 FT. LONG BRAIDED POLYETHYLENE HAND LINE
- BULLSEYE DESIGN
- INCLUDES FITEC'S OWN “KOMFORT KUFF™ Reduced chaffing on throwing wrist
- A guide to throwing a cast net is included with each net and includes pictures and a throwing aid belt clip (in nets under 7ft.)

GS-1000 Ultra Spreader™

Most popular mesh size for targeting mullet, bunker and other large bait. This net has superior strength with a 6 panel design.

- EXCLUSIVE SPS™ JAPANESE MONOFILAMENT RESIN NETTING
- ACTUAL ONE POUND OF WEIGHT PER RADIUS FOOT
- HEAVY DUTY HIGH COUNT 90-POUND-TEST BRAILLE LINES
- LONG HIGH FLOATING 26 FT. LONG BRAIDED POLYETHYLENE HAND LINE
- SIX PANEL DESIGN
- INCLUDES FITEC'S OWN "KOMFORT KUFF™ Reduced chaffing on throwing wrist
- Ideal for MULLET and applications for 12" and up size bait

Ultra Spreaders™

GS-1500 Series

GS-1500 Ultra Spreader™

Created for guides and serious net throwers. The GS-1500 Ultra Spreader™ Series Cast Nets are designed to generate their actual maximum true spread potential. The exclusive Fitec process used to create this difference correctly balances the net panels with the proper length of the lead line, in turn allowing the user to catch more bait. Cast net users will be more successful than ever catching bait with the panel nets. Lightning fast sink rates with extra secure bottom seal.

EZ Throw™

750 Series, 1000 Series

Learn to throw like the pro's in minutes

FITEC Super Spreader™ has developed a new cast net for the beginning cast net user that practically opens itself every time you throw it. The secret to the ease of use in the new EZ THROW™ Super Spreader™ Cast Nets is its patented accuthrow ring. The aluminum ring at the top of the net displaces centrifugal force evenly to the cast net ensuring it will open correctly every time.

Every EZ THROW™ Super Spreader™ Cast Net also comes with a free instructional CD video to help the novice fisherman “throw like a pro” in minutes.

Many people believe that throwing a cast net is difficult to learn. With the EZ THROW™, cast netting is simple and Quick to learn.

Collapsible Minnow Trap, Poly Minnow Seines Instructional DVD

Collapsible Minnow Trap

Built with a spring pop-out design, these traps open automatically in one quick step and fold for easy storage. Durable netting. For minnows, place cracker or bread crumbs in small zip lock bag. Poke several holes in bag and place inside trap. For crawfish, use bacon or other meat. If needed, tie fishing line (not included) on trap for toss out and retrieval. Tie on weight (not included) if needed in strong current.

The Art of Cast Net Throwing

45 min. DVD

Which Net is Best For You?

Usually you will start by selecting a cast net with the mesh size you want. This selection will be based on the size bait and/or fish you are trying to net. Always remember that the smaller the mesh the more you will likely catch. But go too small and you may catch sizes you don't want. You will also want to make sure that the mesh size you pick is small enough so not to gill the bait or fish you are after.

Mesh Size	Bait Size
3/16"	1 - 3"
1/4"	1 - 3"
3/8"	3 - 6"
1/2"	6 - 9"
5/8"	9 - 12"
3/4"	10 - 12"
1"	9" & Up

You will find a chart below with suggestions for mesh size and the size bait. Please understand that these are suggestions only. You may find that a smaller or larger mesh size turns out to be best for your situation. As a rule you want the largest mesh size that will catch the bait or fish or shrimp that you are seeking to catch. This is because the larger the mesh size the faster it will sink.

Size (radius) of Net

Choosing the size of your net is one of the hardest decisions you will make. The general rule is that you want to have the largest net that you can comfortably throw. This will give you the best results per throw. Beginners should start out between a 4 ft and 5 ft radius net unless local regulations prohibit

these sizes. We always suggest that you know your local regulations.

Weight of Net

Cast nets are generally offered with different amount of weights per radius foot. Typically they are offered in 3/4 lb, 1 lb and 1.5 lbs per radius foot. Remember this is the amount of weights added to the perimeter of the net. The entire net will weigh more. For example a 6 ft radius cast net with 1 lb per foot will have a gross weight of 8 to 9 lbs. The weight you chose will depend on the depth of water, the type bait and your ability to throw a cast net. Heavier nets are harder to throw but generally will catch more bait. But in shallow water the heavier nets may not produce that much more and will take more energy.

ARE YOU A BEGINNER?

If you are a beginner and do not have anyone to teach you how to throw a cast net, let us suggest that you try one of our EZ THROW™ series cast nets. These nets are especially made and patented. They have a ring sewn in that allows for the beginner to throw a perfect circle with limited practice. Each net comes with an instructional DVD video. Within 15 minutes you will be throwing like a pro.

Cast Net Features: What Net is Best for You?

SERIES	WEIGHT PER RADIUS FT.	RADIUS	MESH SIZE	MATERIAL TYPE	BAIT SIZE	WATER DEPTH
RS 750	3/4 lb.	3 - 8 ft.	1/4", 3/8"	Nylon, Clear Mono	1" - 6"	Shallow - Up to 20 ft.
