Rod Building Books

ADVANCED CUSTOM ROD BUILDING

by Dale P. Clemens

"Informative, well-written. It covers the subject of rod building in a concise manner. It should be in every rod builder's library." — Fly Fisherman

Advanced Custom Rod Building is the book that sent American fishermen back to their workshops. Clemens believes that, both practically and philosophically, a rod is an "extension of the angler's hand." Accordingly, Clemens explains the principles necessary for making custom tackle that is superior to anything off the rack, as well as exhaustive figures, illustrations, and tables for the experienced builder. The book contains invaluable advice on how to build rods of every kind, how to choose (and make) the best blanks, seats, handles, grips, and guides, and how to finish and seal rods to make them as handsome and durable as possible. Stunningly detailed and thorough, it is a complete guide to building a fisherman's most essential tool.

CUSTOM ROD THREAD ART

by Dale P. Clemens

"Hand a person a custom made rod," says expert rod maker Dale P. Clemens, "and in almost every instance one of the first things he looks at is the decorative thread work," because a handsome rod is more desirable to own and fish. Clemens guides his readers through the organizational process of threading, illustrates the uses of patterns and replicas, explains how to wrap and weave, and gives his personal tips on how to make every rod "a never ending kaleidoscope of form, shape and color." Offering a sound introduction to the essentials of thread work on round surfaces and more than one hundred rod art patterns suitable for both advanced hobbyists and professionals, it is the authoritative work on the subject.

A GUIDE TO THREAD WEAVING FOR THE CUSTOM ROD BUILDER

by Jim Upton

Renowned as the "DragonMaster" and inventor of the Wonder Weaver, artist Jim Upton has put together a new full color book on decorative thread weaving for the custom rod builder. Printed on heavy stock and spiral bound for ease of use at the bench he has included instructions on all aspects of weaving from basic to the most advanced. A "must have" for every rod builder's library.
