AFTCO MAXFORCE

STAND-UP HARNESS

For fighting big game fish stand-up style, the AFTCO MaxForce is the ultimate in harness design. The combination of lumbar and sit-in pads distributes the load below the hips, allowing the lower body to exert maximum pulling leverage with superb comfort under heavy drag loads. Featured is super-comfort molded, closed-cell EVA foam padding, with a tough, waterproof lycra polyester cover. The liner is made from synthetic terry cloth, which not only wicks moisture, but has enough "tooth" to keep the harness from slipping around and chafing. Attached to the inside liner is a name and ID tag. Included is a mesh bag with grommets for rinsing the harness with fresh water, plus easy storage.

No. AFH1

THE ULTIMATE SHOULDER HARNESS

The perfect choice for stand-up battles when using lighter tackle applications up to and including 50-lb. test line. The lycra- polyester covered bio-foam shoulder and back-band padding (with synthetic terry cloth liners) connected with ventilated mesh distribute the load comfortably across the back of the angler, and allow the shoulders and upper body to carry the load. The four stainless steel ladder-locks are easily adjustable, and the brass cross-lock clips provide a secure attachment to reel harness lugs. The nylon webbing straps are cross and box-stitched for durability. Included is a mesh bag with grommets for rinsing the harness with fresh water and for easy storage. Completely synthetic and machine washable.

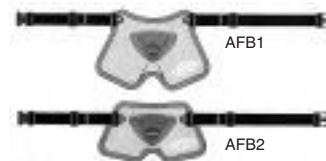

No. AFH2

STANDUP FIGHTING BELTS

Stamped and gold-anodized aluminum plates with co-molded, closed-cell pads. Removable glass-reinforced nylon gimbal cup with stainless cross-pin which allows vertical or horizontal placement. Exclusive triple release, wide nylon web belt and drop strap availability.

No. Handle
AFB1 80-130 lb. tackle
AFB2 50-80 lb. tackle
AFB3 20-50 lb. tackle
Adjustable nylon drop straps for all belts:

TUNA BELT™

Space-age plastic composites, and a wide one piece pad to spread out the forces, make Braid's Tuna Belt™—one of the most popular in the line. You can apply up to 40 pounds of drag pressure with this gear to fish 50- to 80-pound tackle easily. Receiver accepts gimbal rod butt. Matches up with #30800, #30750 or #30950 harnesses.

No.
BRA30300

DROP STRAPS

A key add-on accessory that allows you to lower the rod belt to reach higher on the rod foregrip. Lets you put increased pressure on a big fish, but reduces strain on arms and legs. Links rod belt and harness into a single fishfighting system.

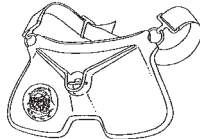

No.
BRA30150

BRUTE BUSTER BELT™

Recommended for 50- to 100-pound line class. Comfortable and extremely durable with an adjustable belt ranging from 26 to 56 inches, this wide-profile belt is designed to be worn low across the upper thighs for increased leverage. The Brute Buster™ gimbal belt is backed by air-filled foam and features a non-skid surface. Safety release clips and adjustable strap attach to heavy duty stainless steel rings molded into each side of the belt. Recommended harnesses are the #30950 Std. and the #30975 Lg.

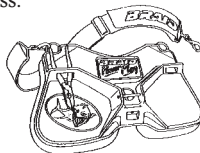

No.
BRA30900

POWER PLAY ROD BELT™

Built to match up to 130-pound tackle, you can apply up to 50 pounds of drag with this belt. The wide design model has separate, contoured padding to fit each thigh without slipping. All belts feature easy adjustable side straps with space-age materials that will last a lifetime. The Braid "V" shape design draws the rod butt right to the fighting position-gimbal or Uni-butt. Molded receivers on the front of the belt hold pliers or cutters (not included). Use with Braid #30800 harness.
