

COCKPIT HARPOON

Custom Harpoon, made in the USA. Harpoons are sold complete with stainless shaft, and one rigged dart! Great for landing tuna, swordfish, shark, dorado, wahoo, and other large gamefish! 8 ft. long. Black fiberglass handle.

No.
87221001

FIBERGLASS GAFFS

Tapered fiberglass handles with custom seine-cord grip wrap with Turk's heads. Featuring 316 stainless hooks in 2" and 3" sizes, with 4', 6' and 8' handles.

No.	Handle	Hook
AFG24	4'	2"
AFG26	6'	2"
AFG28	8'	2"
AFG34	4'	3"
AFG36	6'	3"
AFG38	8'	3"

TWO-PIECE TOURNAMENT GAFF

Also great for bridge, party boats and jettys.

This 12 foot, two piece gaff features a black anodized shaft that is divided into an 8 foot section with hook, and a 4 foot rear section, complete with two vinyl grips. Constructed of marine grade aluminum and is joined in the middle with a ferrule and collet nut characteristic of the AFTCO Unibutt. The ferrule and collet nut "joint" is extremely strong, lightweight and fully waterproof when assembled. Both the ferrule and nut are permanently attached to the forward section, and because the end of the ferrule accepts a vinyl butt cap, this longer 8-foot shaft can optionally be used as a stand-alone gaff.

Taper-Tip
Flying
Gaffs

Barbed triangular hook.

With Breakaway Hook for Gaffing Powerful Fish!

Plastic insert seals out water to prevent corrosion.

Line snaps to release the hook from the shaft.

FISH TAILER

Provides safer, cleaner control of boated fish. Facilitates injury free tagging. Brings fish under control quickly for measuring. 4' long gold anodized taper tip aluminum shaft with 3/4" springy stainless steel aircraft cable, and a smaller plastic-coated cable that actually closes around the fish's tail. Lifts up to 100 lbs. Approximate 18" diameter loop.

For safer, cleaner, control of boated fish and injury free tagging.

No. MST1

TAG STICK

6' with a 3/4" OD at the butt. Either head can be threaded into the end of the shaft and can be easily replaced. Color: Gold

No. 006L

Overall 6-foot length, with taper-tip shaft and 3/4 inch OD at butt. Accommodates the two tag heads shown below.

TAG STICK HEAD

No.	Description
TSH1	Fits standard NMFS tags. For "forked" applicators
TSH2	Fits TBF & newer NMFS tags. For "pointed" applicators

BRONCO KITE ROD

42" Graphite composite blank kite rod with rear sleeve butt, aluminum gimbal and aluminum reel seat. Sic top.

No. STIKTROD

TWO-PIECE TAG & RELEASE STICKS

The Aftco Tag and Release Stick features a special tag-tip head that allows either The Billfish Foundation or the National Marine Fisheries Service tag tips to be used. Also featured is an integrated, replaceable stainless steel line-cutter blade, designed for easily cutting monofilament leaders after a fish has been tagged. The tagging poles (both 6 and 8-foot models) are specially designed two-piece E-glass blanks, ferruled in the middle and custom-crafted to handle the stresses associated with tagging big game fish and cutting heavy leaders. Handles are deep brown in color, complemented by black nylon trim wraps with metallic blue-and-gold accents. Black seine cord wrappings with Turk's Heads (finished with epoxy for durability and tackiness) and a rubber butt cap completes each tag stick handle.

HERGAF724	72" handle, 4" hook

ROLLER-TROLLER OUTRIGGER & FLAT LINE CLIPS

Both models put trolled lines on a big, polished roller that turns right WITH the line. You stop "sawing" a few critical inches of line over a thin wire bail as your lures skip and jerk through the water. Easy adjustments for tension & lure distance.

No.	Description
FL1	Aftco Flat Line Clip
OR1	Aftco Outrigger Clip (per pair)

MULTI-PURPOSE RELEASE CLIPS

The Ultimate bait clip. Super lightweight, composite clip is perfect for kites, downriggers, and outriggers.

No.	Description
OC1	Goldfinger Clip
DC1	Downrigger Clip
KC1	Kite Release Clip

DOWNRIGGER RELEASE ASSEMBLY

Ideal when trolling live baits or lures for everything from King Mackerel to billfish. The DCW1 is designed to be snapped directly on to your existing downrigger cable's snap swivel. The downrigger ball or planer can then be snapped on to the terminal end of the DCW1. When the baits or lures are being deployed, the ball or planer stays in the water while the clip sits above the surface where it can be easily loaded. This keeps the ball or planer from swinging around and damaging the boats hull.

LOW VISIBILITY MONOFILAMENT DOWNRIGGER RELEASE & ASSEMBLY

Use of mono line improves the strike ratio when downrigging for all gamefish, first by limiting the vibration otherwise created by wire cables, and second by decreasing gear visibility. The DCW-2 is designed to be crimped directly to your existing downrigger cable with special mini double crimp provided in the package.

AFTCO DECK KEY

The "On Board" Tool that no boater will want to be without!

The new Aftco Deck Key will quickly become your "best friend" on board the boat. This tough, glass-filled 2.25" by 4.25" black nylon tool is designed to open your fuel and water deck fills (two sizes), remove garboard and drain plugs, unscrew any large slotted fitting—such as a freshwater fill or waste water drain—and it even has a convenient V-slot for shaking live baits free from "sabiki" bait rigs. The molded hole in one end makes for easy attachment to a key chain, key-chain "float" or lanyard so you can easily find your Deck key when you really need it!

Poor Man's Downrigger

KITE CLIP KIT

Includes everything needed (except the Dacron or monofilament line) to set up a kite fly-line for fishing one or two baits. Total of 11 pieces: (2) Goldfinger Release Clips, (3) Black Barrel Swivels, (5) Kite Hooks, (1) Heavy Duty Snap.

No.	Description
KCK1	

We stock all of the components to make a kite rod

FISHING KITE

Designed for deploying live baits for Sailfish, Tuna, Marlin and other gamefish. Completely waterproof, constructed of ripstop nylon material, won't mildew and flies wet. One kite for various wind conditions.

No.	Description
KITE	Kite kit comes with one set med. spars
KITE2	Kite kit complete with one set of each: light & medium spars

ROCKET LAUNCHER ROD HOLDER

- Keeps rods and reels clear of deck traffic.
- Easy installation and maintenance.
- All stainless steel durable construction.
- Resists rust and corrosion.
- Vinyl sleeve protects rods from scuffs and scratches.

No.
WINRR4

ROD RIGGER/STAINLESS STEEL OUTRODDER

- Separates lines when trolling by extending rod tips out laterally from boat.
- Mounts in most rod holders on today's boats.
- Vinyl sleeve protects rods from scuffs and scratches.

No.
WINRR1

AERATORS

10 1/4" Long: great for 48 quart coolers, 5 gallon buckets or shallow Live Wells. Used by top tournament professionals on the walleye trail.
 13 1/4" long: the most popular size turns 5 gallon buckets into great bait tanks, strong enough to handle up to 30 gallon Live Wells. High output, 19 1/4" long, the strongest Aerator on the market! Works great for big Live Wells and shad tanks. Has a rating from 20 gallons and up. All draw less than 1 amp DC, which is equivalent to a bow light on a small boat.

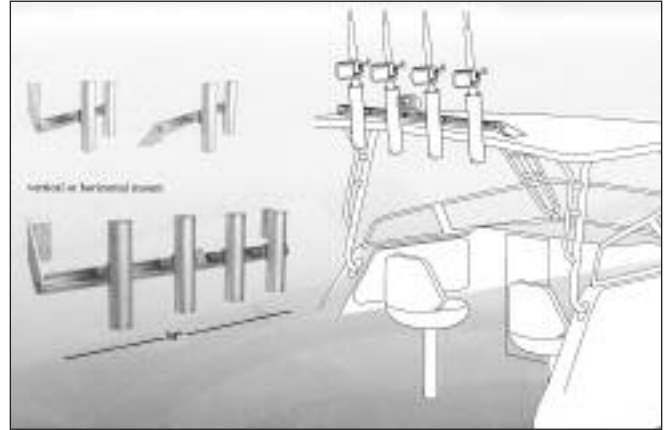

No.	Description
10010	10 1/4" long
10014	14 1/4" long
10019	19 1/4" long

ROCKET LAUNCHER ROD HOLDER

- Fully adjustable rocket launcher that allows for both vertical and horizontal adjustment of rod holders.
- Includes universal equipment bracket for mounting lights, antennas, and other marine equipment.
- Corrosion resistant anodized aluminum.
- Patent pending.

No.
WINRT1

BOARDING HANDLE

- This unique all stainless steel device fits in flush-mount fishing rod holders to provide a secure, yet removable handhold for use when coming aboard a vessel.
- Constructed of 1-1/4" and 1" thick wall tubing, it has a push button to disassemble for compact stowage.
- Fits into 30 degree flush mount rod holder.
- Electropolished to prevent corrosion.
- Also handy for holding shore-power cords or hoses off the deck while in the slip.

No.
WINBH1

CABLE HOLDER

- Cable Holder is designed to keep heavy shore power cords or water hoses away from the water and off the gunwale.
- The thick walled stainless steel cable guide fits into most rod pole holders with a slotted stud located at the bottom.
- Fits into 230 degree flush mount rod holder.
- The holder's 2-1/2" eye keeps cords high enough to clear toe rails and railings and stands straight up as the pole is bent slightly.
- Electropolished to prevent corrosion, the Cable Holder is 28" high overall.

No.
WINCH1

NEW STYLE BAIT AERATOR - THE "O2" BAIT SPA

Finally! A good quality, functional, reasonably priced and attractively packaged Bait Aerator! Features include:

- Molded high-impact plastic body - resists corrosion!
- Motor compartment sealed with a watertight rubber gasket
- Flexible metal clip conforms to a wide variety of buckets!
- Soft 20" rubber hose with 1-1/2" airstone
- Runs on 1 or 2 "D" cell batteries
- 90 day limited factory warranty
- Heavy duty push-button, on-off switch.
