Jig Molds

Shootin' a Bull's-eye

ARROWHEAD JIG

Put this jig in your quiver for a successful catch. The resemblance of the flat tapered head to a stone arrowhead is no mere coincidence. The streamlined shape pierces strong currents. Sleek, flat-sided jig heads give more action to paddle tail grubs and shad bodies than do wider and bulkier head designs.

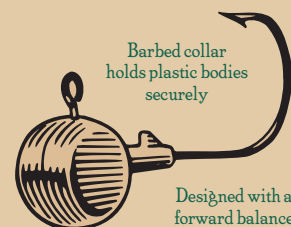

Item No.	Model No.	Type	Collar	Hook Style	Model Group	Cavities	Sizes (oz.) Hook Sizes			Price

Take Two and Go Fishin' in the Morning!

ASPIRIN-HEAD JIG

Our prescription for cutting through H₂O – the flat sides of the Aspirin-Head Jig. These flat sides also permit placement of stick-on decal lure eyes on the jig head. Size 2.5 Stick-On Lure Eyes fit all weights of Aspirin-Head Jigs: Size 4 eyes can be used on 3/16 oz. and above; Size 5 eyes will fit on 1/2 oz. and larger. The Aspirin-Head's barb collar loves plastics.

Slippin' through the Snags

BANANA JIG

No monkey business. The strategic placement of the hook eye allows the head to pull over branches, rocks and other snags. The forward center of weight gives the Banana Jig a unique nose diving action. This snag resistant jig is popular in both fresh and saltwater.

Gun 'em Down.

BULLET NOSE JIG The Bullet Nose Jig is designed to gun down saltwater species by using the Eagle Claw Style 413 Jig Hooks. The double barb collar is excellent for holding plastic shrimp bodies and other thick plastics. Style 410 hooks can be used for freshwater applications. Model BDB-3-X is designed to use the extra strong Mustad style 34184 8/0 jig hooks.

Jig Molds

Fill 'em Up

CRAPPIE JIG

Fill up the live well that is. And no matter how you pronounce this species, we all agree that crappies are tasty. Shrewd fishermen know that the horizontal, semi-flat shape helps the crappie jig fall slower and flutter more than most other jigs, so it's also successful for other panfish.

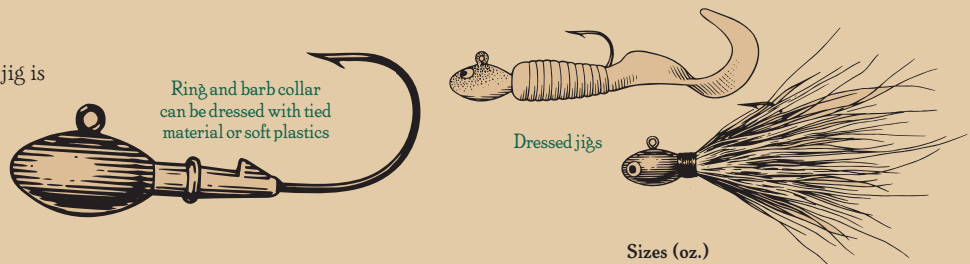

Item No.	Model No.	Type	Collar	Hook Style	Model Group	Cavities	Sizes (oz.) Hook Sizes		Price
3227	JC-6-1632	Crappie Jig	None	#33903	Combination	6 (3 each)	1/32 10	1/16 8	39.00 ■

It's a Head Game!

EGG HEAD JIG

This "thinking man's" jig is known for its versatility. The tapered egg shape cuts current, resists snags in rocks, and slides into tube skirts better than roundhead jigs.

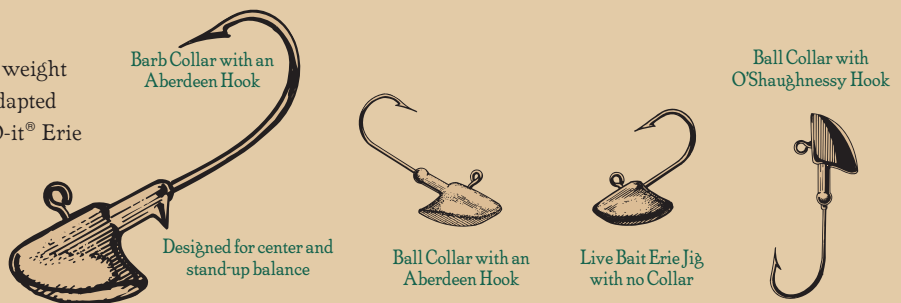

Item No.	Model No.	Type	Collar	Hook Style	Model Group	Cavities	Sizes (oz.) Hook Sizes		Price
3330	EGJ-6-A	Egg Head Jig	Ring & Barb	570 575	Assorted	6	1/16 2	1/8 1	39.00 ■

Don't Get Weary

ERIE JIG

This jig was based on the Erie Rig lure, a weight forward spinner popularized in Lake Erie waters. We adapted that legendary lure several decades ago with the first DO-it® Erie Jig Mold, Model JE-6-A, which has been often imitated by major lure manufacturers. The Erie Jig has been and remains one of the most effective jig designs for walleye fishing in the world.

Unique physique

GARY YAMAMOTO SWIMMING JIG

There is only one Gary Yamamoto, so when he came to us with a design we knew it would be something good. It is. Engineered to be fished with the paddle tailed Swimming Senko, this is a true finesse bait. Gary fishes it with a slow bump and lift technique, others like a slow steady swimming retrieve. It's unique design lends itself to a variety of plastics and fishing situations.

A note to Manufacturers: It would be a violation of trademark law to utilize the Yamamoto name or likeness in any commercial sale of products from these molds.

Jig Molds

Goin' Grubbin'

FLAT GRUB JIG Flat sides mean more water flow along the head of the Flat Grub Jig. This gives you the best wiggle action for paddle-type grubs or shad bodies to attract game fish in fresh or saltwater. Deep eye sockets accommodate our 5/32" stick-on lure eye.

Deep eye sockets easily take 5/32" stick-on lure eye

Item No.	Model No.	Type	Collar	Hook Style	Model Group	Cavities	Sizes (oz.)						Price
							Hook Sizes						
3285	JG-6-A	Flat Grub Jig	Barb	630 635	Assorted	6	1/8 1	1/4 1/0	3/8 2/0	1/2 3/0	5/8 4/0	3/4 5/0	39.00

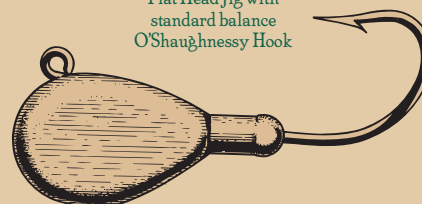

Flat on Their Duff

FLAT HEAD JIG This jig overcomes the upswell currents and gets down where the "Big Ones" play. River fishermen find the Flat Head Jig ideal for reaching fish below locks and dams. Saltwater fishermen find the thin flat shape allows lighter weights to reach deeper depths.

Flat Head Jig designed with center balance 570 Hook

Flat Head Jig with standard balance O'Shaughnessy Hook

That's the Game Plan

FOOTBALL JIG The Football jig scores big for bottom fishing and as a probing tool. The wide-shaped head prevents the lure from fumbling on its side. Instead, this "all-star" drags along the bottom with the hook always remaining upright. Line pressure causes the jig to stand up, poised for a strike, ready to tackle its prey. Plus, the broad face helps transmit signals up the line about changes in bottom features. What a sport! Ideal for bass, walleye and trout.

Give 'em "H"

STYLE "H" JIG The "H" stands for a "helluva" jig. So versatile, it attracts both fresh and saltwater game fish. The swollen, pregnant belly stabilizes the lure as it cuts through the water. Recessed eye sockets accommodate stick-on decal eyes. The ball collars can be tied with bucktail or other material. Style "H" with barb collars permit easy attachment of plastic tails, grubs or bodies.

Round but Sharp

ROUND HEAD JIG — GAMAKATSU HOOKS We went and took the most popular jig head design known to man and fit it around one of the sharpest and strongest hooks man can build. By special request, we stepped up the hook size for the cavity weight so you can have all the lip-gripping power you will need. We also added a special double holder style collar designed to better hold the new softer plastics. Will also accept Eagle Claw 570-575 hooks in the following sizes: 1/32 oz. - #2, 1/16 oz. - #1, 1/8 oz. - 1/0, 1/4 oz. - 2/0, 3/8 oz. - 3/0, 1/2 oz. - 4/0 and 5/8 oz. - 4/0.

Bait 'em with Worms

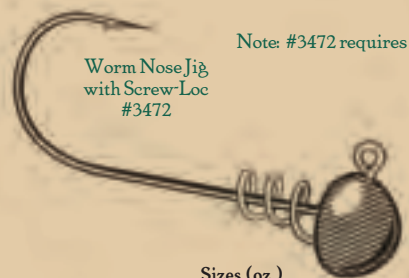

WORM NOSE JIG Rigging a plastic worm to a jig makes an effective lure. Small, sharp hooks are used in this lure, so small they are undetected by the fish as it inhales the worm. The fish can actually hook itself when it tries to spit this lure out. Choose between double barb collar or the Screw-Loc to lock your plastic in place.

Worm Nose Jig

Jig Molds

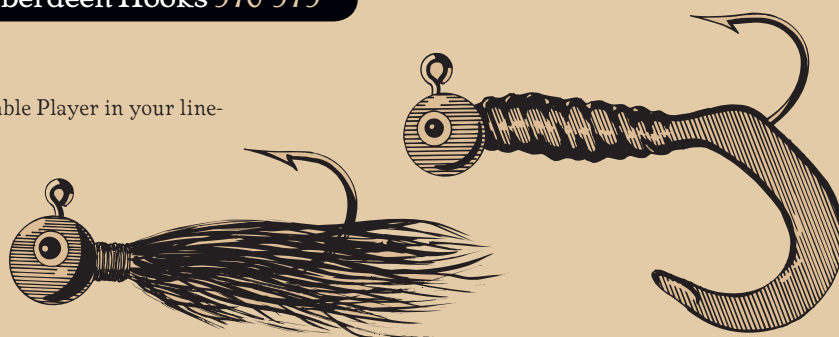

Aberdeen Hooks 570-575

The Tacklebox MVP

ROUND HEAD JIG Our vote for the Most Valuable Player in your lineup. The Round Head Jig is the most popular all-around head style used in all water types in the world. Probably responsible for a greater variety of catches than any other lure. It also earns points as a good casting jig and a fairly rapid sinker.

*Additional Models Listed Under PRO-SERIES.

Extra Grippin' Power

ROUND HEAD JIG - STAGGERED BARB COLLAR A popular lure for pan fisherman. This double-barb collar style is designed to tightly secure the small 1.5" and 2" hollow plastic tube skirts. The upper barb is short, wide and blunt to hold the small hollow skirts tightly to the head or to add gripping power to solid soft plastic tails.

Don't Go Tearin' Me Up

ROUND HEAD JIG - TAPERED BARB COLLAR

These gentle barbs are easy on the body, so your soft plastics will be less likely to tear. That means you can be the absolute "terror" of the waters that much longer.

570 or 575 Hooks
Round Head Jig —
Tapered Barb Collar
Aberdeen Hooks
Standard Balance

Tapered Barb Collar - Barbs are wider and not as sharp as the traditional "spike" barbs - Same holding power in SOLID soft plastic bodies, but much less likely to tear.

Jig Molds

Pro Series & Ultra Precision Semi-Custom

PRO-SERIES

Our DO-it® MOLD PRO-SERIES is designed to meet the volume production requirements of commercial tackle manufacturers. Pro-Series models will save considerable production time when hundreds or thousands of a single size must be cast. Each model in this series features multiple identical cavities. The pouring gates of the Pro-Series are minimal sized which requires more ideal pouring conditions (lead alloy, temperature, pouring method) than the standard gating used on other models, but has the advantage of very quick and clean sprue removal.

PRO-100 SERIES

Round Head Jig — "Ball Collar"

ULTRA PRECISION SEMI-CUSTOM MOLDS

Semi-Custom ultra precise molds are designed to exacting standards for professional use. Very small jigs require molds made to extremely tight tolerances. These molds are completely machined from our blank mold frame using a computer-controlled mill. Each cavity, hook receptacle and pouring gate is individually milled to perfect alignment and fit. Pouring gates are designed for the professional with minimum opening to permit quick and clean sprue twist off. **Minimum gates make pressure casting from a bottom-pour lead furnace mandatory with these molds.** Semi-Custom models are exceptionally accurate and precise. The investment in these molds can be quickly recovered through increased productivity when producing small jigs in commercial quantities.

Semi-Custom Round Head Jig — "No Collar"
570 - 575 Size #10 Hooks

Item No.	Size	Cavities	Hook Sizes	Price
64	1/64	10	10 or 12	119.95

65	1/64	10	10 or 12	150.00
81	1/80	10	10 or 12	150.00

Jig Molds

Runnin' with the Shad

SHAD DART JIG A slant-faced, tapered jig that's named for migrating mid-Atlantic shad. The slanted head gives it a rising, "darting" action when the rod tip is raised.

Shad Dart is typically tied with hair or feathers

Item No.	Model No.	Type	Collar	Hook Style	Model Group	Cavities	Sizes (oz.)								Price
							Hook Sizes

Fries with that Shake?

SHAKE-IT JIG Whether you call it an "Alabama Rig", "Finesse Rig" or "Shakey Rig" this simple system has been lighting up the tournament trail. This mold design allows you to incorporate either the Flat Eye 60° Mustad 32798 or the Gamakatsu 604. Pick your favorite plastic, rig it Texas-style with the hook hid in the plastic, and finesse the big boy in.

Jig Molds

Spark into Action

SPARKIE JIG Our special forward balance design allows the Sparkie Jig to pull over snags. The wide head shape will not let the jig tip to the side when it rests on the bottom. This enables the lure to be used with a slider method as well as regular jigging action.

410-413 Jig Hook
See page 48

The wide head and forward balance keep the jig upright

Makin' Your Point

SPIRE POINT JIG Shaped like a modern rifle bullet, the Spire Point Jig is designed for trolling, casting and jigging. Larger sizes (8 oz. and up) require both a straight big game fish hook (Style 34081) and a brass wire eye to serve as a line attachment point.*

The collar "flairs" bucktail or crimped nylon

Jig Molds

Wide-eyed & Ready to Go!

POPEYE JIG Just like a "popeyed frog," the Popeye Jig gets its name from the protruding eyes on each side of its head. Paint these "eyes" for a more life-like appearance. Popeye Jigs are usually dressed with bucktail and are very popular with saltwater fishermen along many parts of the eastern coast.

Forward balance design

The ball collar is easy to tie even for beginners

Poised for a Strike

STANDUP JIG Stand up and take notice, Walleye fishermen.

This jig lives up to its name. When dropped to the bottom, the lure will stand up with its hook poised for a strike. The wide, flat foot slows the jig's descent. That can keep the lure in the strike zone of suspended Walleye longer than faster falling jigs.

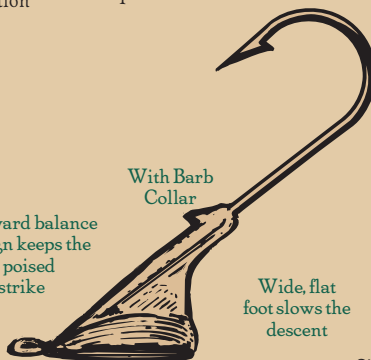

1623CR Specialty Hook
See page 47

Angle View

Forward balance design keeps the hook poised for a strike

A Seaworthy Flat-foot

STANDUP HD JIG The heavy-diameter version of the Stand Up Jig is made to accept the strong O'Shaughnessy hooks. Saltwater fishermen prefer the slow falling design of this flat-footed jig. Use a corrosion resistant hook if you're heading into saltwaters.

Built "heavy-diameter" to stand up to the big fighters

Answering to the Swimbait Gods!

WEIGHTED HOOK JIG Swimbaits are all the rage these days. With lots of different plastics and hook choices out there, we built our mold to fit as many different options as possible for you. Integrating our own geometrical design, you will find that our bait maximizes hook setting and creates a true running, well balanced bait.

Jig Molds

Swimmin' for a Bite

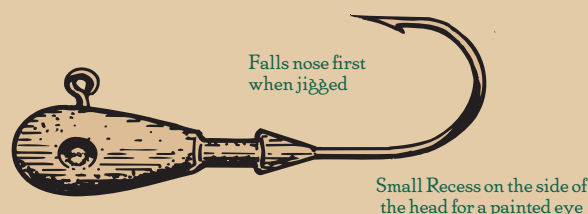

SWM JIG The SWM Jig is a swimming type jig whose wobble action is especially successful in attracting fish. Style 2190B hooks have been specially developed for use with SWM jigs made with DO-it® Molds. These jigs may be painted and fished without dressing or can be tipped with live bait for an even more effective lure. Cast, troll, or jig vertically with this versatile bait jig.

Bring 'em to Tears

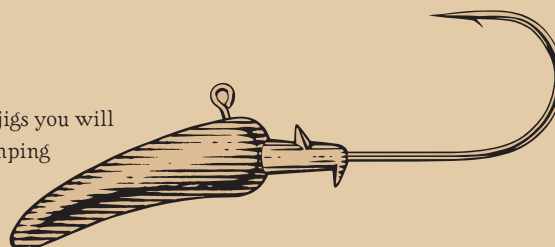

TEARDROP JIG The teardrop design places most of this jig's weight in a far forward position. The weight distribution gives this lure a good tracking or swimming action on retrieve and a "bombing" nose-first fall when jigged. A small recess is designed in each side of the jig head so that a drop of paint can make its eye. Tie bucktail, feathers or your favorite lure dressing to the versatile "holder" type collar, or simply attach plastic tails for an effective lure that'll make fish weep.

The Grim Reaper – Buried Alive

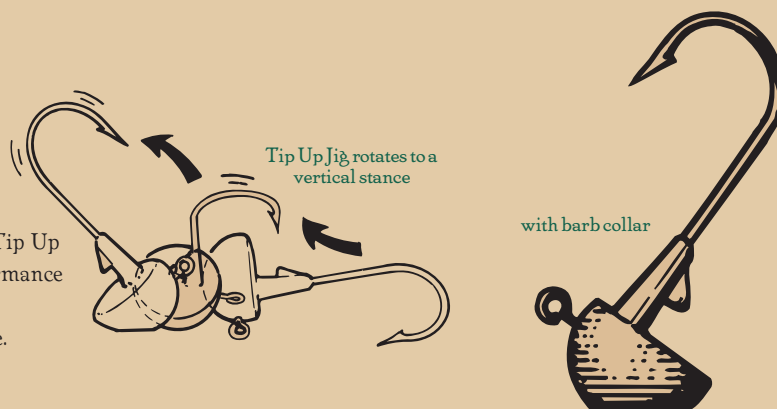

GRAVE DIGGER JIG The Grave Digger is one of the most unique jigs you will ever fish. With its unique shovel-head design, the head portion dives down bumping the bottom (aka Grave Digging), thereby mimicking the action of a feeding minnow. Note also that this same action makes the jig resistant to snags.

Nothin' Gets it Down

TIP UP JIG Intended for Walleye fishing, the name of the lure is descriptive of its action. This special stand up design will rotate to an upright position even if the jig lands on its side. A flat base with barb collar permits plastic grubs to fit up tight. Tip Up Jigs more closely approximate the familiar round head jig performance characteristics than do other stand up jig designs. For best tip up rotation, use the hook sizes and styles recommended for each size.

Jig Molds

Finessing the Finicky One

WALLEYE JIG So you're going after the picky "pickerel." Grab this lure. Its head is designed to resist snags on rocky bottoms, and gets in where others can't! The tapered, wedge-shaped Walleye Jig slips between stones that would hang up a typical round head jig. Item #3418 has been re-designed with a ring and barb collar and a recessed area for stick-on lure eyes.

Find stick-on eyes on Page 67.

DO-IT SCREW-LOC SERIES: Some fads are here and gone before you even know about it. Others like the Screw-Loc stick around and turn into mainstream. We custom built the Do-it Screw-Loc so it has the best diameter and flexibility for today's plastics. We turned around and built the molds for the most popular of styles, being carefully aware of the angle of the screw-loc to hook points, balance and the eventual need for paints and top coats. Put these in the arsenal and....hey...when you are leading the tournament trail, try not to forget the ones who got you there.

Plain Shaken.

WeedlessJig Molds

Call Out the Weed Wackers!

Fiberguards These bundles of plastic filaments are simple, effective weed and brush guards. Fiberguard length can be adjusted to fit a specific lure. You may think that we've been way too generous with the length, but it was our plan all along. Go ahead, trim the guard to fit. You'll get over the guilt. We did.

- FG-40 Fiberguards have large 5/32" diameter bases. These guards are very stiff and used with heavy jigs.
- FG-30 Fiberguards have 1/8" diameter bases. These are the most popular size with a variety of stiffness ratings.
- FG-12 Fiberguards have a 5/64" diameter base and are used for lighter applications.
- FG-9 Fiberguards are light duty with 1/16" diameter bases.

Fiberguard See page 84

Base Hole Pin Although direct molding is the most popular way to attach a fiberguard, some tackle makers prefer to epoxy the weedguard in place. In some models, a steel base hole pin can be molded in place. A hole is formed when this pin is removed. Epoxy holds the weedguard inside the pin cavity. Note: Only 1/8" (FG-30) and 5/32" (FG-40) fiberguard models have provisions for base hole pins. One reusable pin per cavity is supplied with qualified models.

Base Hole Pin
See page 89

Watch That Tail

THE POISON TAIL JIG Like the venomous scorpion, this highly evolved jig sits poised to deliver a toxic strike at its prey. The wide protrusion of the head with a flat bottom provides extreme stability and balance to this design. The pronounced brow and recessed eyes serve to anger and entice its prey. And when he bites, the Poison Tail Jig bites back with the Mustad Modified Wide-Gap Impact Hook, digging in with stinging hooksets – faster and more powerful than other jigs you have tried. Add the Poison Tail to your arsenal, and get ready to latch onto the big catch.

Weedless Jig Molds

This Ain't Your Papa's Jig

WEEDLESS ROUND JIG Papa loves the Round Head Jig. Never in his wildest imagination did he think the design could be improved. It has. We added a Mustad 60° flat eye, wide gap, needle point, black nickel hook. The hook point will remain upright rather than rotating to the side. Attach anything on the ring and barb collar, and you've made it into the 21st century and quite possibly the winner's circle.

Weedless Jig Molds

Lakeside Quarterbackin' WEEDLESS FOOTBALL JIG

The Football head has gained popularity as a bottom probing jig. The wide shape of this head style prevents it from tipping to the side, so the hook can always remain upright. Line pressure will cause the jig to stand up, poised for a strike. Its broad face helps transmit signals up the line about changes in bottom features. Item #3434 takes a stronger fiberguard than the 3318 and also fits both the Mustad Flat-eye 32798 and 32786 hooks.

Gettin' Down & Dirty

WEEDLESS STAND UP JIG

This jig gets down where it needs to be and stands up on the bottom with its hook poised for a strike. The weedguard permits this productive lure to be fished in heavy cover. Often, a plastic crawdad is rigged back end first on the Stand Up Jig. Let the lure settle on the bottom with the crawdad's arms waving in the current and prepare for some terrific strikes.

Don't Monkey with Weeds

WEEDLESS BANANA JIGS

Weedless Banana Jigs are somewhat slimmer and narrower than similar Bass jigs. This can be advantageous in situations where enhanced snag resistance is important. The improved design accommodates several popular Bass jig hooks, including 630, 410 and 730. The 630 styles specify a smaller hook size than the 410 or 730.

Olympic Swimmer

WEEDLESS CASTING JIG

If you are looking for a true weedless swimming jig that tracks straight and runs evenly along your choice of depths, then this is your jig. The unique attributes of a 30 degree hook position forward on a carefully balanced bullet style head and properly positioned fiberguard create a bait that begs to be ripped through the water column at your favorite honey hole. Step up to this truly different weedless swimming jig.

Weedless Jig Molds

Homecoming King

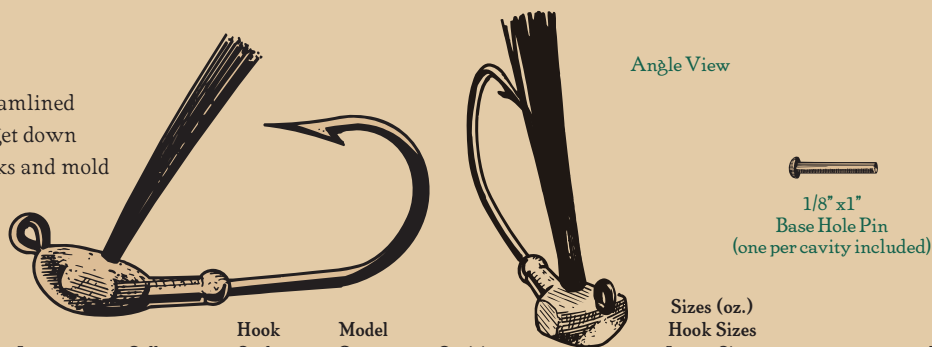

ARKY STYLE JIG Voted Mr. Popular by its classmates, a very useful all-purpose Bass jig. The 3387 utilizes our new double holder collar and the premium Mustad 32798 turned eye, wide gap, black nickel hook, making it the ideal choice to pull over the snags and still grab a hold of Mr. Bucket Mouth.

Bush Wacker!

WEEDLESS BRUSH JIG We have wrapped a lot of technology in this weedless wonder. We started with surrounding the eye with lead to minimize any snagging points. We carefully positioned the hook to give the best angle for powerful hook sets as are needed in the thickest cover. We flattened the bottom to allow for a balanced stand-up presentation. Combined with the Mustad Ultra-Point Hook, you have one of the most effective baits to chase the big boys in the roughest cover.

Lure Molds

CASTING AND VERTICAL JIGGING LURES

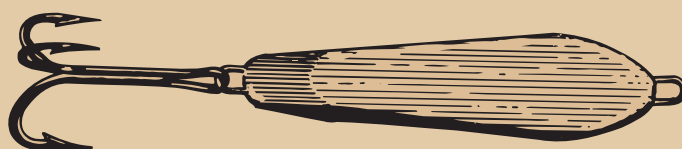

These “bad boys” are molded around a single stainless steel wire form for added strength. Send these guys out to play... each is designed for its own unique style of drop and flutter jigging action.

Long, Lean & Agile

CASTING SPOON LURE Hang this long, thin spoon on your rig for smooth casting and realistic action.

Add reflective tape along the flat sides to mimic “fish scale” shine and catch the eye of a hungry one.

Open-eye hooks and split rings easily attach to CC-Form
See page 62

Lure Molds

Seekin' Out Striped Bass

JIGGING SPOON Capture the attention of certain species...notably the Striped Bass. Cleverly designed with one flat side and one tapered "keel-shaped" side for a wiggling action irresistible to fish. This "heavy-weight" can reach the bottom of deep water. Add an in-line swivel and you have a most effective retriever. On a fast uptake the lure will have an extreme wiggling, spinning action simulating a frightened minnow to generate a vicious strike.

Hammer 'em, But Good

HAMMERED SPOON A vital "tool" in your tackle box. The hammered pattern simulates fish scales and gill plates for an illusion of an accessible shad snack. A wire form molded inside the lure gives it the necessary fish fighting strength you need to bring in the trophies! Alter its dropping speed and action by bending the soft lead spoon. **Note: This lure must be molded by "ladle pouring" with SOFT LEAD ONLY!**

Lure Molds

BLADE BAIT'S

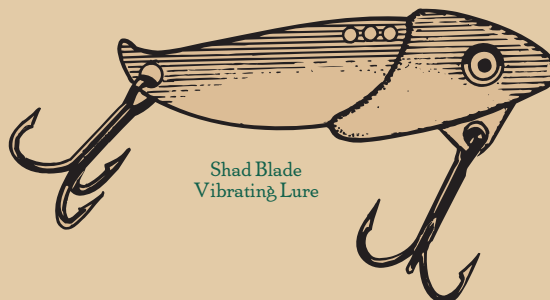

Just as the name says, these lures are made from a metal blade. Bring your "blades" out when vertical jigging for schooling fish such as Walleye or Bass. Smaller sizes are effective on Smallmouth Bass. Blade Baits are also used for trolling and casting. Lures made with "ZB" series blanks have attachment points to offer adjustable balance and vibrations.

"Be" the Shad

SHAD BLADE The most wily of all Bass or Walleye will strike at this lure. The wide flat head together with the metal blade provide erratic action when the lure is jerked sharply or allowed to drop in free fall.

Pickin' Up Good Vibrations

STYLE ZV VIBRATING LURE Think of it as the lure that knows "fish speak." Fish, especially hard-to-reach schooling fish, respond to vibrations for their next meal. Versatile enough to be used for jigging, casting and trolling. Style ZV Vibrating Lures shimmy through the water – sending out a "dinner's ready" call to everything from river Smallmouth to suspended Walleye and Largemouth Bass.

Clip-In Treble

Our tip for Blades: Blades are necessarily made thin and could sever the line when a large fish is hooked. Use snaps to avoid this problem.

See Page 60

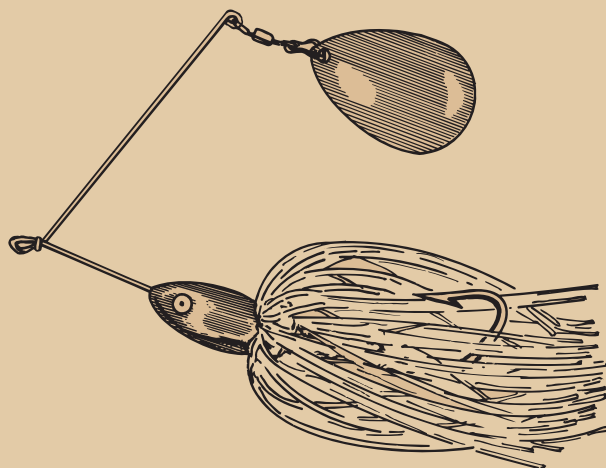

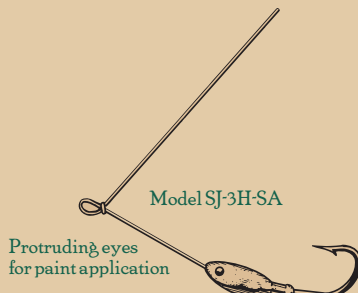

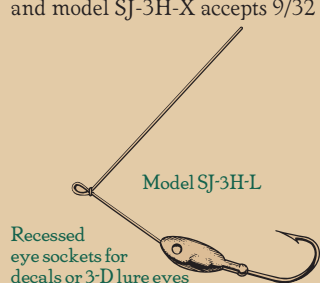

Lure Molds

SPINNER JIGS

The spinner design is snag-resistant and the blade flutters, vibrates, and flashes to draw attention and trigger strikes. Bass often hit a spinner jig as a reflex action, making Spinner Jigs a top choice for Bass and other game fish.

Keep 'em Guessin'

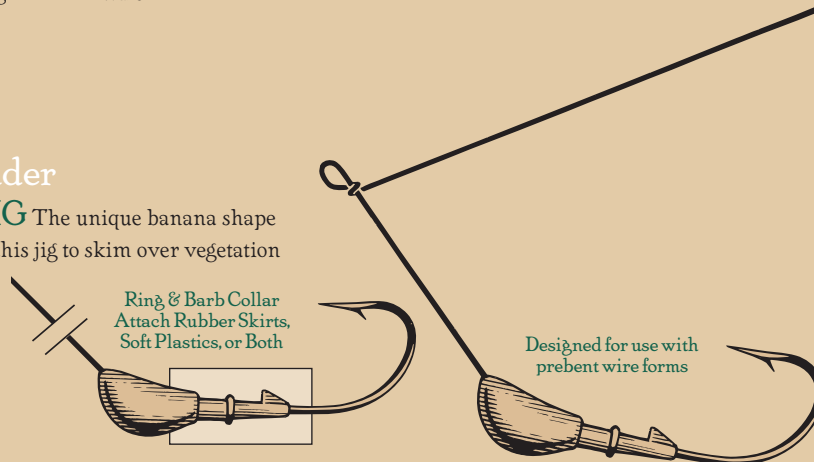

STYLE "H" SPINNER JIG This spinner jig has a long and narrow head resembling a bait fish with a swollen belly. Predatory game fish think that's easy pickings for dinner. Model SJ-3H-L takes up to 5/32 stick-on eyes and model SJ-3H-X accepts 9/32 eyes.

			WSJ-40 Wire Forms	L255			4/0-5/0	4/0-5/0	
							.040 Wire Forms		

Our tip for spinners: Choose your spinner based on your fishing style. Use heavier sizes to fish deeper, cast farther, or to use larger blade sizes. Too large of a blade on a light lure can cause a tendency to turn on its side when retrieved quickly. Muskie fishermen using heavy line need extra weight in a lure to cast any distance. Deep water Bass fishing requires a heavy size to do the job.

Lure Molds

Playin' Craps to Win

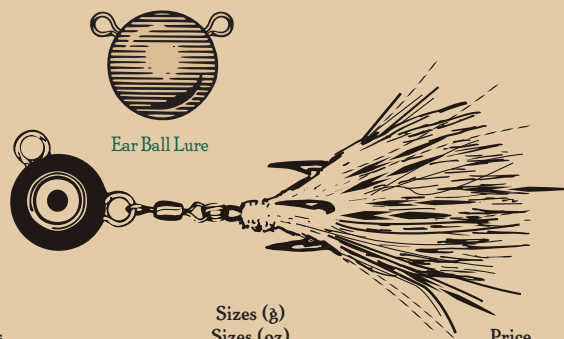

CRAPPIE SPINNER There's no gambling here – this small spinner jigs catches big crappies. This lure features a slim head design with a swollen belly for stability. It is built with a .029 wire form for increased vibrations and a small but strong Style 455 hook. The wire and hook combination are light enough for a proper Crappie bait, yet strong enough to handle a good size Bass.

Ol' Big Ears

EAR BALL LURE This little ball provides so many possibilities. It happens to be one of the most popular jig heads in Eastern Europe. Rigged with a split ring, this bait has a swinging hook with tons of action. Tip with floating plastic or even live bait to get more movement than any other jig can provide. Another popular option is to attach a bucktail dressed treble hook. You can also use it as a sinker as a weighted 3-Way rig.

New!

Stayin' at the Surface

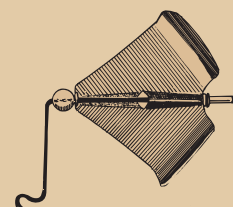

BUZZ-SPIN LURE Dare the "Big Boys" – the Bass, Northern and Muskies – to come up to the surface and meet you on your own terms. The Buzz-Spin Lure features a flat, heart-shaped body designed to keep the lure at the surface when used with a delta blade. The retrieve is started as soon as the lure hits the water. The delta blade churns the water at the surface creating a commotion that is a "sure-fired" fish attraction. A very effective lure on suspended game fish such as Bass, Northern and Muskies. Note: Designed for ladle pouring — not intended for use with bottom-pour lead furnaces.

Lure Molds

Saddle Up A Winner

HORSE HEAD-PONY HEAD JIGS When on the tournament trail in search of Crappies, Walleye or Bass, hitch up a Horse or Pony Head Jig to your rig as an efficient spinner and jig combination. The lure's head, with its long and drooping nose, resembles a horse's head, hence the name. And it doesn't hurt that the shape looks like a larva to the fish. The slim shape of the jig's head design minimizes the chance of snags in rocks and brush, yet maximizes the flow of water around the lure to turn the spinner blade. Fish strike at the flashing blade which strategically trails near the hook of this great lure.

Our Tip for Swivels: Your lures will be more effective if the swivels turn freely and this means keeping them free of paint. A painted swivel may not rotate, thereby reducing the blade action to that of only a flutter. Carefully paint the jigs with a small brush and avoid getting paint on the swivel. If you spray paint the lures, be sure to cover the swivel. A small diameter plastic drinking straw can be cut to length and slipped over the swivel to protect it from paint.

HORSE HEAD
Crane Swivel

PONY HEAD
Crane Swivel

Special Notice to Commercial Lure Manufacturers:

On January 16, 1990, the Blakemore Sales Company obtained a U.S. Trademark registration for the shape of a lure resembling those made from our Horse Head and Pony Head lure molds. Lures of this shape have been made and marketed by many different companies, both large and small, for many decades prior to and continuing through the date of registration. They have long been known generically as "horse head jigs" or "pony head jigs." We thus do not believe the shape can now be a valid trademark belonging to a single company. The validity of this trademark registration has not been tested in court, so the commercial sale of these lures could involve claims against you. As with castings made from any model, the right to use DO-it® Molds to make tackle for commercial use is left for you to determine, and we make no warranty or other representations of any kind with respect to your right to do so.

HORSE HEAD - PONY HEAD - SEA HORSE - COMPONENT GUIDE

Lure Size	1/48	1/32	1/16	1/8	1/4	3/8	1/2	3/4	1	1 1/2
Split Ring Size	0	0	0	0	0	0	1	1	1	1
Blade Size	00	00	00	0	1	1	2	2	2	3

Larger blade sizes can add more flash, but may require slower jigging speed for lure stabilization.

All Aboard!

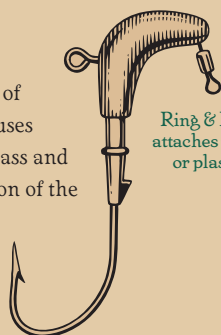

BUZZ-KEEL BUZZBAIT This uniquely designed bait gives you more control than any other buzz bait you have in the tacklebox. The wide thin body gets on plane in a hurry and allows you ultimate control in steering the bait back to the boat. The keel shape allows for true tracking and just enough pull to keep the blades running perfect at any speed. Put your limit in the boat with this high powered tool.

Headin' Out to High Seas

SEA HORSE JIG A larger version of the popular Horse Head Jig, the Sea Horse uses the strong hooks you need to land Striped Bass and other large game fish. The bent down portion of the head serves as both an attachment point for the spinner blade and a stabilizing rudder to keep the torque of the rotating blade from turning this jig to its side.

Facin' Off with the Walleye

STANDUP SPIN JIG Battle it out with Walleye on their own turf—at the water's bottom in heavy vegetation. Your secret weapon is the flat-footed Stand Up Jig, featuring the fish attracting addition of a spinner blade. The flat, foot shape of the lure slows its rate of descent and positions the hook upright for a strike. The Stand Up Spin Jig adds the flash and vibration of a spinner blade to proven snag resistance. And that's a winning combination for Walleye.

Sayin' it Like it Is!

LURE BODY This tried-and-true body doesn't need any fancy name.

It's a Lure Body, and that pretty much says it all. But what the name doesn't describe is the great flexibility this body offers.

Lure bodies make effective weighted spinners that attract the

attention of Bass or other game fish. Or, use

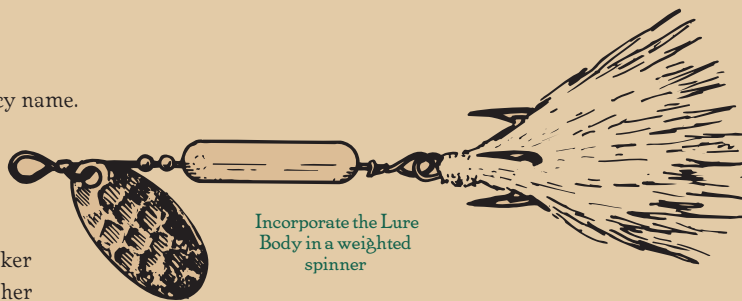

a Lure Body alone as a streamlined slip sinker

for a smooth descent through the water. Either way, the Lure Body is your choice. One core shaft

per cavity is included in each mold.

Use the Lure Body alone as a slip sinker

Incorporate the Lure Body in a weighted spinner

(S-040 Core Shaft)

Extra core shafts
See page 89

Reusable core shaft forms the hollow core

Lure Molds

Flip-Flopper! FLUTTER LURE

Deep jigging is all the rage and our flutter lure mold allows you to customize your own lures for all types of tackle and a wide range of species. Our unique geometrical design creates the all enticing "flutter" that triggers the fish to bite. Solid wire inserts running completely through the lure provide great strength but still allow you to custom bend the lure to your designed flutter pattern.

Mr. Versatility SHAD BAIT LURE

Whether it's the unique wobble action when you are trolling, the style of the drop and flutter when you are jigging or the tuned wiggle upon a retrieved cast, this lure has all the versatility you could hope for. The details of a swollen belly, lips, gill plates, fins, recessed eyes and a lateral line make this gem appear to come to life in the water. Try tweaking the tail a bit to change the action when you want to trigger your next pole bender. Item 3392 produces the same casting as 3383 but without the Brass Eye.

#0 Stainless Wire Eye

Lure Molds

Fishin' Texas Style

SLIP JIG LURE This jig is basically a sliding worm weight. Finish your Slip Jig like a bass jig and fish it Texas style with a plastic worm. Slips easily through heavy cover and has more fish appeal than a standard Texas rig.

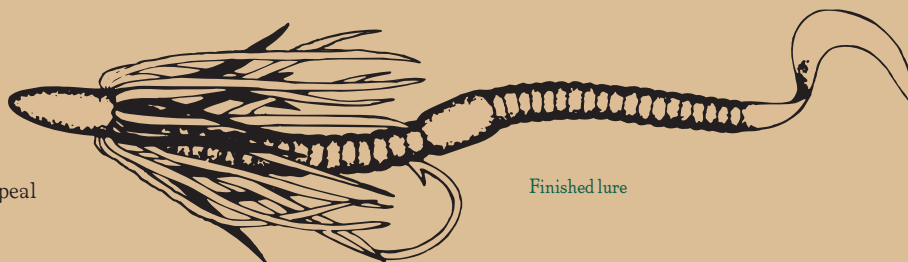

Slip Jig features a tying collar to add a skirt or reel rubber

						3/8	1/2	9/16	

Trollin' for Success

TROLLING LURE Similar design to the Slip Jig, the weighted portion of this bait slips freely through vegetation. The trolling lure especially excels in saltwater. A flair collar blouses bucktail or synthetic lure dressing to give a full look with less material. Features larger core diameter for heavier test line.

Fishing line threads through 3/32" diameter hole

It's the Dynamic Duo

BELL SINKER WITH BRASS EYELETS

One of the most popular sinker designs ingeniously combined with a tough and smooth brass wire eyelet. The results are a strengthened sinker, reduction of line abrasion and the ability to attach a snap or a snap swivel.

Brass Wire Eye
reduces line abrasion
See page 60

New!

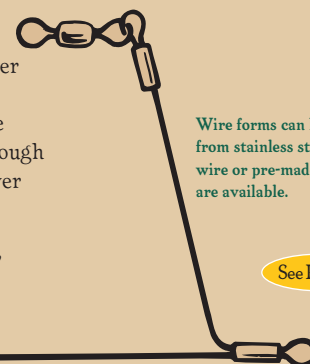

Sinker Molds

WARNING: Melting lead and casting lead objects will expose you and others in the area to lead, which is known to cause birth defects, other reproductive harm, and cancer. See instructions on Reducing Exposure supplied with product.

Skim Over the Rough Spots

BOTTOM BOUNCER SINKER Bounce over obstructions that would snag most other sinkers. Our Bottom Bouncer is a modern snagless-type sinker. The slender shape of the lead body and wire extending through it permits the Bottom Bouncer to bump and bounce over obstructions. The bait and hook trail safely above and behind as the stainless steel wire springs over rocks. Note: This lure must be molded by "ladle pouring" with **SOFT LEAD ONLY!**

Wire forms can be made from stainless steel leader wire or pre-made forms are available.

See Page 61

Give 'em Da Slip

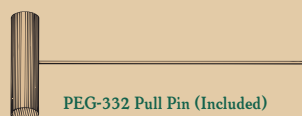

EGG - SLIP SINKER "Slip" by your fish undetected. The line will slip through the Egg or Slip sinker, so the fish will not feel the weight of the sinker when it picks up the bait. The hook settles more quickly without the sinker's resistance. Plus, the fish can't use the sinker's weight to help throw the hook when breaking water. This fish won't be the one that "got away."

Fish won't detect the Egg Sinker until it's too late

Easy On the Line

PINCH-ON SINKER Pinch-On Sinker are very easy to attach and remove from the line. The ears of the sinker are simply folded over the line, which gives the Pinch-On a streamlined shape when attached. It is important to use only soft lead when casting Pinch-On Sinker to ensure that the ears will bend easily.

Keep It On the Low Down

DOWNRIGGER BALL SINKER Precision engineered, this 2-piece mold is designed to give you a straight running ball. You will need your bench vise to stabilize the mold as well as heavier casting equipment (p.83). If you are looking to protect your boat finish and minimize the electrofield, try coating the balls with a multi-purpose rubber coating (e.g. Plasti Dip®) which can be found at your local hardware store.

Goin' Up Against the Current

RIVER SINKER No need to go with the flow. These large donut-shaped sinkers hold their own against the currents in rivers, tidal flats, coastal areas and surf. The low profile and raised outer edges of the River Sinker prevent the rolling or tumbling that you'd expect under these conditions.

Donut shape
resists
currents

Hold that Line

SPLIT SHOT The round Split Shot is one of this country's most used sinkers because of the ease in which it can be attached to the line. That is, it's easy once you know the secret, which is to just grip the sinker with pliers from behind the split and squeeze the two ends of the slot in toward each other. The Split Shot will spread apart and release the line without damage.

Walkin' on the Wild Side

WALKING SINKER Outwits the Walleye's legendary fickleness. Designed and balanced to pivot to its heel and let the line slide through the eye so smoothly that a fish will feel no unnatural sinker drag when it picks up the bait. Its shape is streamlined and rock and snag resistant. It will not roll in current like rounded slip sinkers.

Walking Sinker

Drop in for a quick bite.

DROP-SHOT SINKERS Drop-shot rigging puts the weight at the end of the line. The hook and bait are tied above. The bait can be set at a determined distance above the bottom. The #7 Do-It® Line Grip Swivel has a V-shape in the eye to grip the line without tying. Drop-shot Sinkers can easily be replaced or adjusted. Should it become snagged, the sinker pulls off the line, but the hook remains. Because of its shape, the Round Drop-shot Sinker is ideal for soft bottoms and the Finesse Drop-shot is best for rocky bottoms or areas of high vegetation.

Special PurposeMolds

Fishin' for Objects

SNAG WEIGHT A weighted treble hook, or a Snag Weight, is used to retrieve objects from the bottom. Where legal, it is also used to catch fish by snagging. The weight directly on the hook provides good casting characteristics and holds your line in the water. Check local fishing regulations for legality.

Special Purpose Molds

Collar 'Em But Good

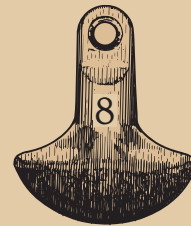

STRAP DECOY ANCHOR - INGOT MOLD This one-piece, three-cavity mold makes either strap type duck decoy anchors or lead ingots. There are two different levels of fill in each cavity. When making duck decoy anchors, use soft lead and fill the cavity only to the first (lower) level to make six ounce flexible strap anchors. Fill the mold up to the second (top) level to make lead ingots weighing up to sixteen ounces. A melter and a ladle with capacity to hold a minimum six ounces of lead are required. An electric Hot-Pot melter/ladle also works well. This mold is not intended to be used with bottom pour furnaces.

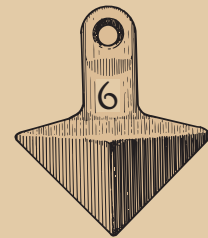

Item No. 1885 - \$16.75

Anchors Away!

DECOY ANCHOR WEIGHTS These anchor weights have been an old standard of duck hunters everywhere for years. The mushroom shape is best in soft bottom areas. The pyramid shape is favored in hard bottom locations where it has less tendency to roll with a current.

Mushroom decoy anchor

1199	DAP-2-6	Pyramid Decoy Anchor	Yes	Production	2	6 oz.			39.00 ■

Keepin' Your Ducks In Order

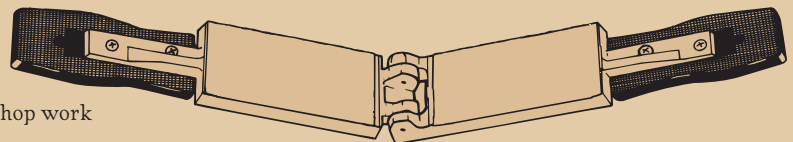

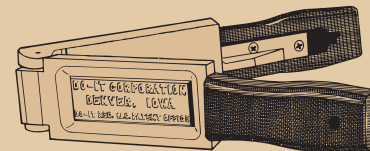

WRAP-AROUND DECOY ANCHOR This is the answer to the problem of moving decoys between different depths of water. Line is wrapped around the body of the anchor. It can be easily set for any depth by tightly wrapping the line off around one of the ears. A weight of this type eliminates retying the line during a change in water depths.

Follow Your Hunches

BLANK MOLDS FOR CUSTOM DESIGNS After a great season of sports fishing, haven't we all thought we might have stumbled on a new solution for a jig, lure or sinker. Unfortunately the Do-It Corporation cannot produce custom work, so we created the Blank Mold. Your local tool and die or machine shop can create a custom cavity for the Blank Mold based on your design. We recommend getting a quote for this service before ordering your blank mold, as custom machine shop work can be pricier than you'd imagine.

Item No.	Model No.	Mold Face Dimensions	Depth	Price
1155	Blank Mold	4-5/8" long x 2-1/8" wide	1-1/8" closed 9/16" each side	39.00 ■
3416	Blank Mold LF	7" long x 3" wide	2" closed 1" each side	74.00 LF
