Why buy Eskimo

Why Eskimo has the Best Power Augers

Viper two-cycle engines have years of technological improvements designed into every model. Each engine has been designed from conception to production to be what they are today-the best ice auger engines in the world. Two-cycle engines deliver more power per pound. They start easy even in the coldest weather conditions. Viper two-cycle engines outperform all other engines. You'll be setting tip ups and jigging while the other guys are still trying to start their lawn mower style four-cycle engines.

Why Eskimo has the Best Ice Shelters

Eskimo has years of technological improvements designed for all fisherman. It is the number one selling brand of ice shelters in the world! Eskimo is the inventor of the Pop-Up Portable category. Check out page 13 for details on our new Eskimo Value Pack.

Not just a warehouse full of boxes and shelves. Eskimo is a company of over 150 dedicated people each playing a role in the ultimate mission...Customer Satisfaction. Our advanced product design, engineering and quality departments have developed the number one selling product line in the ice fishing industry. We have staked a claim in history with the Shark Z71, the most powerful ice auger ever and the Quickfish, which belongs to a completely new category created by Eskimo called Pop-Up Portables. It's the most portable ice shelter ever.

Eskimo Customer Service Staff

Eskimo delivers quality to you by:

- We test our products extensively, ensuring continuous performance improvements
- We implement quality control and quality assurance standards second to none
- We make sure phones are answered by knowledgeable people
- Our website is up-to-date and user friendly
- We ensure accurate order fulfillment
- We ship orders on time
- We serve our customers better than any other company

We look forward to being a part of your ice fishing success.

Mark Ruppel, Owner & CEO

What The Best Ice Fisherman Say About Eskimo

Just when you think Eskimo can't get any better, they do! The Escape models are the most comfortable, versatile and easy-to-deploy towable flip style shelters on the market. And for portability, light weight and easy set-up, nothing beats Eskimo's QuickFish Pop-Up Portables!

~Babe Winkelman, Host of Babe Winkelman's "Good Fishing"

Eskimo has delivered the additional features that fishermen have long sought after with the Escape towable flip style. Rod holders, a removable table, big pockets, skylights and plenty of fishable space allow the gadget crazy fisherman plenty of room for their gadgets and still have room for the fishing.

~"Tackle" Terry Tuma, Pro Angler

The Eskimo Quickfish shelter is easily the most portable ice shelter out there. It pops up and down in just seconds and it's really roomy.

~Terry McQuoid, Pro Fisherman/
Guide McQuoid Outdoors

The Quickfish 6 provides an incredible amount of room and goes up in seconds. It's perfect for entertaining a group of friends or maybe even the whole family!

~Ron Anlauf, Pro Fisherman

This past winter I had times with 54" of ice. With my 8,000 RPM, Shark Z71 it drilled my holes with precision. It is the fastest and most reliable auger that I have tried.

~Aaron McQuoid, Pro Fisherman/
Guide McQuoid Outdoors

Our guides have been using Eskimo shelters for years because they are easy to use, durable and totally portable! You won't be disappointed if an Eskimo shelter is your next ice fishing shelter.

~Dan Eigen, Eskimo Customer

The Quickfish shelters are the Taj Mahal of ice shelters. The words "comfort" and "ice fishing" now go hand in hand. I travel the Midwest and from the winds of Lake Superior to the deep snow cover of Northern Wisconsin it's our home away from home. Quality built, ease of use, and durability make this the leader of the rest. If you need mobility and demand comfort this shelter is for you.

~Barb Carey, Pro Ice Angler

A word from our best ice fisherman

Power Ice Augers

"The Most Powerful Ice Auger In The World"

SHARK Z71

With a 71cc Viper two-cycle engine the Shark overpowers the competition in power output. The Viper engine features a compression release valve, which allows you to pull start your Shark Z71 with ease. Pull. Start. Drill.

- **71cc High Performance Viper two-cycle engine**
High torque and High RPM make it the most powerful auger on the market.
- **Automatic Compression release valve**
Makes starting easier than ever. Turns off automatically when engine starts.
- **Mitten Grip Handle**
Extra large recoil handle lets you start the engine without taking off your gloves or mittens.
- **See through gas tank**
Know your fuel level at a glance.
- **Protective Muffler guard**
Safely protects you and your clothes from hot areas.
- **All ball bearing transmission**
Longer life than cheap bushing models.
- **Toggle Switch**
Easily accessible for turning your auger on/off.
- **Comfort grip handle bar**
Throttle control and handle bar are ergonomically designed for maximum grip and control.
- **Eskimo red powdercoat paint**
Eskimo's finish is second to none.
- **Blade protector**
Cold weather plastic guard protects you and your auger.
- **Centering Ring**
Regulates how much ice is cut per revolution and makes breakthrough from ice to water smooth.
- **Dual stainless steel blades**
Quantum Augers have the fastest most controlled cut then any powered auger.

FEATURES

See bottom of page 6 and 7 for complete Quantum Auger Blade detail.

Comfort grip handle bar and throttle control are ergonomically designed for maximum grip and control.

All Eskimo transmissions have sealed high speed ball bearings and high alloy heat treated gears. Others use cheap gears and bushings. The optimum gear ratio has been designed to match each Viper two-cycle engine to the high speed cutting ability of the Quantum Auger.

VIPER
ENGINES
Two-Cycle Engine

Part Number	Engine RPM	CC Rating	Weight	Gear Ratio	Auger Length	Auger Diameter	Warranty
Z71Q8	8,000	71 cc	30 lbs	25:1	42"	8"	1 Year Limited

Z71Q10	8,000	71 cc	32 lbs	25:1	42"	10"	1 Year Limited

The Viper two-cycle Ice auger engine has been engineered and improved through many years of testing by real ice fishermen to be the ultimate ice fishing machine.

Most Powerful Engine Available
- The portable power of a balanced high RPM two-cycle engine.

Heavy Duty Clutch - The viper's custom designed clutch transmits all the power to the Quantum auger.

Robust Recoil - Built to last for years in cold weather.

Carburetor Guard - Protects while in transit.

Muffler Guard - Protects you and your clothes from hot areas.

Power Ice Augers

"Lightweight, Feature Loaded"

SHARK Z51

FEATURES

See bottom of page 6 and 7 for complete Quantum Auger Blade detail.

Comfort grip handle bar and throttle control are ergonomically designed for maximum grip and control.

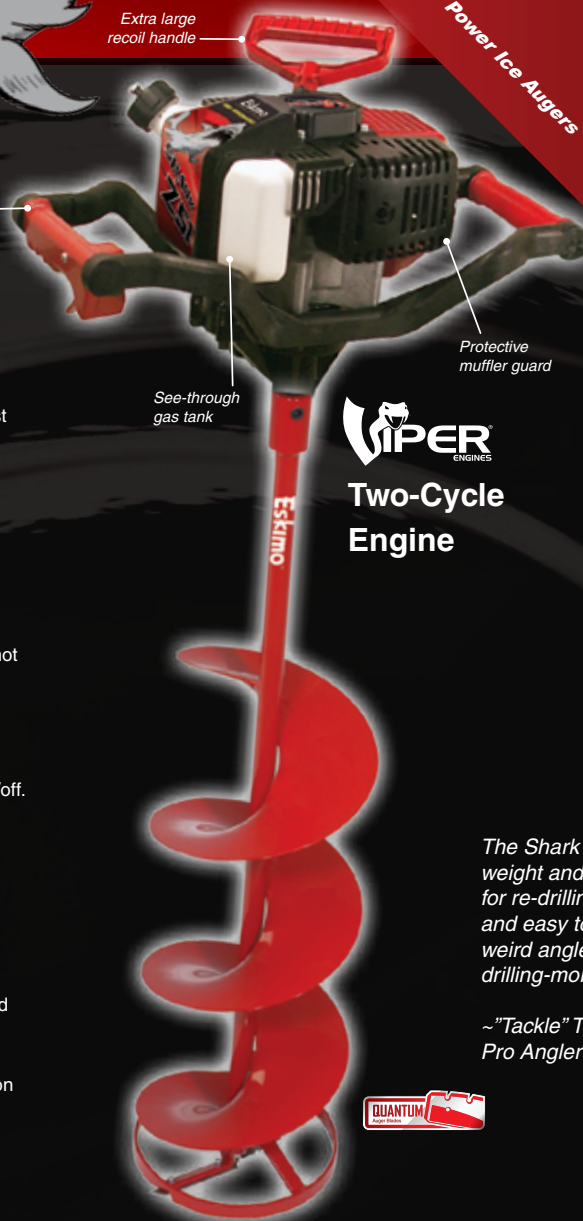

All Eskimo transmissions have sealed high speed ball bearings and high alloy heat treated gears. Others use cheap gears and bushings. The optimum gear ratio has been designed to match each Viper two-cycle engine to the high speed cutting ability of the Quantum Auger.

The Shark Z51 features a 51.7cc Viper two-cycle engine that is lighter, but still gives you the High Performance you expect from a Viper engine.

- **51.7cc High Performance Viper two-cycle engine**
High torque and High RPM make it the most powerful auger in its class.
- **Mitten Grip Handle**
Extra large recoil handle lets you start the engine without taking off your gloves or mittens.
- **See through gas tank**
Know your fuel level at a glance.
- **Protective Muffler guard**
Safely protects you and your clothes from hot areas.
- **All ball bearing transmission**
Longer life than cheap bushing models.
- **Toggle Switch**
Easily accessible for turning your auger on/off.
- **Comfort grip handle bar**
Throttle control and handle bar are ergonomically designed for maximum grip and control.
- **Eskimo red powdercoat paint**
Eskimo's finish is second to none.
- **Blade protector**
Cold weather plastic guard protects you and your auger.
- **Centering Ring**
Regulates how much ice is cut per revolution and makes breakthrough from ice to water smooth.
- **Dual stainless steel**
Quantum Augers have the fastest most controlled cut then any powered auger.

Two-Cycle Engine

The Shark Z51 is light weight and is a great tool for re-drilling holes. It's quick and easy to control – no weird angles. Less time drilling-more time fishing.

~"Tackle" Terry Tuma, Pro Angler

Part Number	Engine RPM	CC Rating	Weight	Gear Ratio	Auger Length	Auger Diameter	Warranty
Z51Q8	8,000	51.7 cc	30 lbs	25:1	42"	8"	1 Year Limited
Z51Q9	8,000	51.7 cc	31 lbs	25:1	42"	9"	1 Year Limited
Z51Q10	8,000	51.7 cc	32 lbs	25:1	42"	10"	1 Year Limited

Primer - Fast starting in all weather.

Ergonomic On/Off Switch - Conveniently located.

Mitten Grip Handle - Designed for ice fishing conditions

See Through Gas Tank - Check fuel levels at a glance.

Why two-cycle beats four-cycle every time for the serious ice fisherman.

Cold Weather Start Ability - The combination primer and choke on the Viper Two-cycle makes for fast starting. Four-cycles have crank

case oil that gets thick in ice fishing weather making them a chore to start.

Quick Warm-Up - Four-cycle engines are great for warm weather applications but take forever to warm up in cold weather. Viper's modern design meets all EPA requirements while pumping out high RPMs in the coldest weather.

You'll have your tip-ups set and be jigging before the four-cycle guys are even ready to cut a hole.

Two-Cycles Have More HP Per Pound Than Four-Cycles - Real ice fishermen want portable power. The Viper two-cycle engine packs more horsepower per pound than lawn mower style four-cycles. Shark ice augers with Viper two-cycle engines are the most powerful ice augers in the world.

Power Ice Augers

"The Right Auger For Any Angler"

Mako M43

The Mako 43cc power ice auger delivers the right mix of power and comfort. The High Performance Viper engine with the industry's original anti-vibration foam grip handles fit any angler's needs.

- **43cc High Performance Viper two-cycle engine**

High torque and High RPM make it the most powerful auger in its class.

- **Mitten grip handle**

Extra large recoil handle lets you start the engine without taking off your gloves or mittens.

- **See through gas tank**

Know your fuel level at a glance.

- **Protective muffler guard**

Safely protects you and your clothes from hot areas.

- **All ball bearing transmission**

Longer life than cheap bushing models.

- **Toggle switch**

Easily accessible for turning your auger on/off.

- **Foam grip handle bar**

Anti-vibration foam grip handle bar delivers a soft grip for comfort and control.

- **Eskimo red powdercoat paint**

Eskimo's finish is second to none.

- **Blade protector**

Cold weather plastic guard protects you and your auger.

- **Centering ring**

Regulates how much ice is cut per revolution and makes breakthrough from ice to water smooth.

- **Dual stainless steel blades**

Quantum Augers have the fastest most controlled cut then any powered auger.

See bottom of page 4 and 5 for complete Viper engine detail.

From the company that brought you the first one, enjoy the comfort of Eskimo's superior foam grip handle.

All Eskimo transmissions have sealed high speed ball bearings and high alloy heat treated gears. Others use cheap gears and bushings. The optimum gear ratio has been designed to match each Viper two-cycle engine to the high speed cutting ability of the Quantum Auger.

Two-Cycle Engine

M43Q9	8,000	43 cc	32 lbs	30:1	42"	9" Quantum	1 Year Limited
M43Q10	8,000	43 cc	33 lbs	30:1	42"	10" Quantum	1 Year Limited

The Quantum Auger design continues to lead the industry in cutting speed, cutting control, cutting smoothness and long life. Check out why Quantum Augers are the premium choice for ice anglers throughout hard water country:

Serrated Cutting Edge - The serrated cutting edge of Quantum Blades are designed to chip ice away during drilling. This action allows for a faster and smoother cut but more importantly, it prevents from ice build up. Other power augers tend to shave

ice into smaller particles that build on the bottom of the auger. After all, you are on the ice to drill holes, not make snow-cones!

Industry's Only Balanced Design - The cutting surface is optimized with symmetrical dual blades at one level, which creates the smoothest, most controlled cut available. Other auger designs try to cut ice with a single blade that has no

balance at all and gives you less control.

The point and centering ring combination gives you unmatched control. The point keeps the auger in one location and lets you drill where you want to drill, not where the auger wants to drill. Pointless augers tend to "wander" around the ice surface searching for a place to drill. The centering ring regulates how much ice the Quantum Blades cut per revolution. This is key when you are breaking through from ice to water, the auger won't jerk or become stuck because it continuously cuts the optimum amount of ice. Other augers have poor breakthrough ability and often leave you leery of the dreaded breakthrough with their power augers.

Angle and Edge - No other auger gives you the perfect cut and still keeps a razor

sharp edge. We developed the best blade for the fastest cutting and longest blade life.

Extended Life - Quantum Blades are not only designed for extended life, but they are manufactured for extended life. By using the highest quality stainless steel material, they resist rust and corrosion for a longer life. The blades are heat treated to a perfect hardness that resist wearing of the razor sharp edges and helps protect against dings and scratches that can lead to poor performance.

Hand Ice Augers

Hand Ice Augers

BARRACUDA HAND ICE AUGER

Barracuda hand drill blades are a curved blade for faster drilling

FEATURES

- Palm grip handle for comfort and ease-of-use
- Two piece breakdown system for easy transport
- Easy cross bolt adjustment
- Three-position handle adjustment-55", 59" and 63" lengths
- Dual stainless steel TurboCut blades or Eskimo Hand Ice Auger blades are replaceable
- Blade protector extends the life of blades
- Eskimo red powdercoat paint finish, is the most durable in the industry

Prevents overtightening when you drill.
Screw together hand augers tighten as you drill, making them virtually impossible to take apart. Eskimo's Cross bolt Take down Technology comes apart with just a twist of the knob.

Adjusts to three different lengths 55", 59", and 63"

Towable Flip Style Shelters

ESKAPE 400

4.0 PERSON | TOWABLE FLIP STYLE

FEATURES

Skylights on roof let in more sunlight to work with the gray interior to maximize interior light if desired.

QRS Pinch Free Pole Technology with huge, lightweight aluminum framing lets you quickly and safely setup and take down even with your mittens on.

See tip-ups clearly from inside. Close flaps for darker interior

Air Eskape vents with adjustable interior flaps let you controll ventilation easier than before. Protective shells on the exterior keep wind and snow out.

Heavy duty fabric withstands abuse, while protecting you from the elements.

Freedom of movement with 40/20/40 seating lets you slide from one side to the other without the restrictions of bucket seats. Seats and backrests flip and fold independently for easy gear access behind or under your seat.

"Room for four anglers"

- Rod holder(s) slide independently in the seat rail and are multi-positional.
- The carpeted removable table gives you quick access to gear.
- Storage tray under the bench seat gives you added storage and gear protection.
- Large storage pockets give you a place to keep gear handy.
- Extra long skirt helps eliminate drafts and keeps the elements out.
- Tow hitch flap lets you keep the shelter attached to your ATV/snowmobile without unhooking it and still

keep the skirt down on the ice to prevent drafts.

- Rugged, Ultra High Molecular Weight PolyEthylene sleds give you extra deep, extra large storage to hold more gear. These heavy duty sleds let you to tow at high speeds and pull easier through deep snow.
- Premium YKK®, # 10 coil style zippers, are the best zippers in the world.
- Reflective corners, license holder and pull rope included.

Double sided seating fits four ice anglers comfortably. Under seat storage and removable tables are on both sides.

The light weight Quickfish Pop-Up Portable provides the ultimate in portability. It amazes me how sturdy this shelter is and how well it blocks wind, even 30 mph wind! The Pop-Up Portables truly are the ideal shelters for today's busy fisherman.
~"Tackle" Terry Tuma, Pro Angler

The Original Alaskan Hat

This rugged cold weather hat features a variety of outer shells with soft quilted lining and forehead, chin and ear flaps lined with rabbit fur. The outer shells are available in leather, heavy-duty poly, 65/35 poly-cotton blend and durable Taslan™ nylon.

Suede Alaskan Hat

This Alaskan style hat features a synthetic fur inner lining and a soft durable suede outer shell for winter warmth. Fur stripes on outer shell add style to this classic hat.

Visor Alaskan Hat

This Alaskan style hat with chin and ear flaps lined with rabbit fur and a standard visor make this a great outdoor work hat

Fur Trooper Hats

These rabbit fur hats feature soft, quilted lining for added warmth in extreme conditions. Ties secure the ear flaps on top of the head or under the chin for added warmth.

Eskimo Product Specifications

More ice fisherman choose Eskimo than any other brand

I love my Shark Z51 because it's lightweight, easy starting and has plenty of high revving power that absolutely flies through thick layers of ice.

~Ron Anlauf, Pro Fisherman

After owning a competitors auger for 15 years, I decided to buy an Eskimo Z51. Wow, I could not be happier with my decision.

~David Daubenspeck, Eskimo Customer

I love the Eskape Series from Eskimo. The 350 really gives me plenty of room and the sled makes it easy to carry my gear and pull behind my snowmobile. I can even throw a Quickfish in the sled for additional housing. Eskimo really understands the ice angler needs.

~Terry McQuoid, Pro Fisherman/Guide McQuoid Outdoors
