Lamiglas[®]

FISH WITH CONFIDENCE

HOW MUCH CONFIDENCE DO YOU NEED? EIGHT FEET? NINE AND A HALF? FIFTEEN FEET?

No one manufactures a larger or longer selection of technique specific rods. Not in the U.S. Not in the world. Select a species. Choose a technique. Define a price range. Without question Lamiglas delivers multiple rod models that will excel in every form and function a fishing rod can.

Lamiglas, located in Woodland, Washington, the rod design capital of the world, has specialized in the rod building craft for a long time. Since the early 1950's, in fact. Back then, fiberglass ruled the water. (Hence the origin of the Lamiglas name.) Today, high modulus graphite is the backbone of industry. And, in ever-increasing numbers, even higher performing fiber blends, such as Lamiglas' proprietary Tri-Flex Graphite designs.

With more than 343 cataloged rods, 290 blanks, and countless privately branded rods, finding the perfect rod is no longer an elusive endeavor. Just ask for the worldwide leader in performance fishing rods: Lamiglas.

FRESHWATER RODS

JARED JOHNSON SIGNATURE ROD

Jared Johnson of Rocky Mountain Tackle is the king of trophy Kokanee. Built to Jared's specifications and signature color, the CGR 762 L will take you straight to heaven on earth.

BASS RODS

10 NEW EXCELS

Offering the ultimate value in performance-driven, American built rods, Excel Series bass rods were 2010's smash hit. Rounding out the series are 10 new models, including three new micro guide rods.

SALMON/STEELHEAD

CERTIFIED PRO

Two new fast action spin rods, the X 711 MTS and X 82 MS provide quick handling and pinpoint accuracy on smaller waters while providing the superior sensitivity Certified Pro rods are known for.

G1000 UPGRADES

Perhaps the longest running American made graphite rod series in existence, G1000 Salmon Steelhead rods have been given a complete facelift for 2011. Featuring an all-new gloss metallic cranberry finish, American Tackle Ring Lock Guides and exposed blank reel seats on select models, the look is fresh and exciting while maintaining the hard-core performance attributes that earned G1000 rods their legendary status.

NEW G 1380 T

The new G 1380 T and graphite-handled G 1380 T-GH are the

quintessential 8-foot salmon rods. With a do-it-all nature, their moderate action is first and foremost for back-bouncing, but doubles as a Kwikfish™ rod, triples as a diver rod, and continues as a short but effective herring stick.

SALTWATER

TRI-FLEX GRAPHITE

Two new and one revised model enter the most tenacious and productive saltwater rods in existence. The new BL 7040 LB provides a lighter power to the redesigned BL 7050 LB. Their one-two punch now covers baits from the smallest anchovy to good-sized mullet with fish up to 100lbs in mind. The BL 7640 C is a powerful rod for 40-pound line, and unique in the lineup at 7'6" in length.

TROPIC PRO EVO

Refined and upgraded with all-new cosmetics, Tropic Pro EVO rods now include the TP 5615 SJ (spin) and TP 5615 CJ (cast), offering a more lively action for jigs up to 150 grams.

SURF

ALBERTO KNIE SERIES

From the minds of master angler "Crazy" Alberto Knie and master rod builder Paul "Paco" Hernandez come three high-intensity rod designs for the most demanding surf anglers in existence.

RON ARRA

This single piece 10-1/2 foot rod, rated for 17- to 40-pound line increases the available power from the series, while maintaining exceptional balance and comfortable casting length.

LOVE. BEAUTY. COMPANIONSHIP. WHAT YOU CAN'T FIND IN A MATE YOU CAN FIND IN YOUR FLY ROD.

Searching for perfection? Look no further than Lamiglas. We've gone to extensive lengths to design the perfect marriage of brawn and brains. All the attributes you desire are here and ready to join you wherever your adventures are headed. Suit your casting style and fishing conditions perfectly with our wide range of rod actions. Each and every Lamiglas fly rod is a testament to our commitment of exacting performance and unparalleled quality. These are rods built by hands that love to fish as much as you do. And when you've got one on the water you can tell. The details radiate skilled craftsmanship. The actions are clearly defined and meticulously derived. The components are matched to the intended technique with precision. All in all, Lamiglas fly rods instill great pride with every gorgeous, long cast.

XMG 50 Travel • Spring Creek • G1000 Graphite Fly • G200 Graphite Fly

XMG 50 TRAVEL

Utilizing our proprietary XMG 50 graphite blanks, the balance, power, and control found in these rods is simply sensational. Their extra fast (pushing ultra-fast) actions load quickly and generate incredible line speed on the river, lake, or flats. All models are constructed in four pieces for unencumbered travel. You'll find polished graphite blanks with Cocobolo Nickel Silver reel seats on 4- through 6-weights, machined aluminum reel seats on 7- through 12-weight. Lamiglas travel tube included.

G1000 GRAPHITE FLY

Our G1000 series not only has been Lamiglas' most popular fly rod series, but America's as well. Smooth, strong, and truly enjoyable to fish with, the G1000 series now feature a metallic cranberry finish. They are as attractive as they are responsive. You owe it to yourself, and your wallet, to cast these American legends.

YOU CAN SPEND LESS ON A FISHING ROD, BUT IT WILL COST YOU MORE FISH.

Whether you're casting something that looks like a household pet for muskie, detecting the breath-like bite of a deepwater walleye or plowing the lake for trout, Lamiglas has been there...thousands of times! There's a remarkable world of fishing to enjoy and we've learned most of it right along with our customers. It's taken decades of painstaking development but the proof comes from Lamiglas owners, tens of thousands of enthusiastic anglers who choose Lamiglas because they get more from their time on-the-water. It's the product of the Lamiglas formula, balanced tried-and-true actions and premium materials that transform the sport of fishing into a wonderland of fishing opportunity.

Muskie • G1000 • G200 • Ultra Light • Graphite Certified Pro • Certified Pro Fiberglass • Excel • Competitor Series

MUSKIE

Revised and updated for 2011 with American Tackle Ring Lock guides and an all-new metallic cranberry finish, Lamiglas musky rods are noticeably lighter and more responsive than ever. What hasn't changed is their foundation of proprietary G1000 blank material, incredible inherent power, durability and control over the largest lures and fish. Fuji reel seats and foam fighting butts.

ACTIONS SPEAK LOUDER THAN WORDS. LISTEN AS ALL 99 MODELS SCREAM IN UNISON, "PICK ME! FISH ME!"

Salmon and steelhead angling is about as technically-diverse as you can get. Pick any mile-long stretch of river and there's just cause for having a dozen different rods on-board to fish it effectively. Hence, the reason Lamiglas crafts more technique-specific rods than any other manufacturer. Jig, drift, back-bounce, troll, hover, back-troll, throw spinners, boondog, side-drift, pull plugs, side plane, mooch, etcetera, etcetera, and etcetera. Yeah, we've got specialized rods to do that. But we're also realists, understanding that when the rods in your garage start taking precedence over the food in your fridge, people will begin to ask questions. So, there's plenty of multi-purpose rods here as well.

**XMG 50 • Certified Pro Fiberglass • Certified Pro • G1000 Series • Rogue River Special
Norwest Special • G200 Series • Classic Glass Series**

XMG 50

XMG 50 rods prove that technology does increase performance. Constructed from a cutting-edge blend of high-modulus graphite fibers, XMG 50 rods combine an aerospace blank material with woven graphite or cork handles to deliver a fishing experience that maximizes every cast, strike and fight. You feel everything, yet marvel at the lack of weight. If your passion for fishing is greater than your available time, XMG 50's make the most of every moment.

CERTIFIED PRO FIBERGLASS AND COMPOSITE

Rod design is a constant process. Over the last decade or more there has been tremendous focus on delivering rods that are continuously "faster" and more responsive. The only problem is, while increasing response speed is exciting, it's often counterproductive to successful fishing. Trolled and back-trolled plugs and baits are most successful when fished on softer rods with slower response: plugs generate more action and when bit, softer rods allow fish to achieve a positive hold of a plug or bait before the rod loads completely and sets the hook. These are the premium performance attributes of Certified Pro Fiberglass and all new XCC composite rods. Fiberglass models are constructed of E-glass while new XCC models are fiber-blended to maintain the action and durability while delivering an astonishingly small-diameter blank. All models feature Fuji reel seats and Fuji Concept Guide System.

CERTIFIED PRO

Certified Pro salmon and steelhead rods represent the singular best value in premium performance rods. Ultra-small diameter, third generation graphite construction priced about \$100 less than their closest competition. This is our backbone series where drift, jig, float, backbouncer and centre-pin anglers find the technique-specific characteristics necessary to excel on the water every day. Select GH models are outfitted with graphite handles to further elevate their performance and long wearing comfort in the hand. Certified Pro models include Fuji Alconite Concept guides, exposed-blank reel seats on casting models and premium cork; nothing but the best.

G1000 SERIES

Lamiglas G1000 series earned their place in angling history by providing high-quality American-made fishing tools at an honest value. Affordable excellence. To make your purchase decisions easier, we've highlighted many models with technique and territorial names like Hot Shot Magnum, Salmon Moocher and Russian River, but please don't assume these are the sole application in which these rods excel. Our Herring rod is an exceptional big bobber rod. The Hot Shot Magnum fishes divers and bait with result-generating perfection. And the Kenai rods knock the fins off salmon, wherever they swim. G1000 rods are purebred workhorses, accepting the challenges of demanding fish and techniques and responding with a power, form and function for a lifetime of heavy use. New features include a metallic cranberry gloss finish, American Tackle Ring Lock guides and blank-thru reel seats on drift fishing models. GH models denote graphite fore and rear grips-the ultimate long wearing, sensitive, comfortable and strikingly good-looking handle material.

SALMON/STEELHEAD

ROGUE RIVER SPECIAL

Six outstanding rods designed for one of the most demanding (and consequently rewarding) rivers in the United States. Rogue River Specials will target everything from half-pounders (RR 76 MTS) all the way to monster fall kings (RR 86 HC), and even includes a fiberglass plug rod for outstanding performance (RR 76 MHC). Upgraded from tip to butt, new Rogue River Specials sport a stainless-framed zirconia ring guide system, blank-through reel seats on casting models and composite cork butt caps. Rich emerald green blanks are highlighted with green wraps and gold trim.

NORWEST SPECIAL

All the quintessential salmon and steelhead rods are right here. From the 79" backbouncer through the five 8'6" casting and spinning models, you'll find the right rods for steelhead, pinks, sockeye, chum, silvers and kings. Completely redesigned, you'll appreciate the increased number of guides and the quality of the stainless steel frames and zirconia rings. Blank-through reel seats are standard on all casting models, along with composite cork butt caps throughout. All Norwest Specials are sharply dressed on deep blue blanks with contrasting blue and silver wraps.

CLASSIC GLASS SERIES

These rods are for the plug pullers, backtrollers, herring trollers and downrigger anglers that excel on the water by keeping it simple. The premise behind moderate action glass rods is simple: if you allow a fish to get a firm hold of your bait or lure, the result will be a solid hook-up. And most often it really is just that simple. Traditional styling makes these rods all-around winners.

THINKING ABOUT A NEW SALTWATER RODS? CONSIDER A ROD DESIGNED WITH THE MOST THOUGHT.

Smooth, precise and powerful, the premium materials and actions of Lamiglas saltwater rods maximize every opportunity. From Black Fin to Blue Fin, Strippers to Sailfish, Amberjack to Albacore, a Lamiglas rod is the smartest choice. Sensitive and responsive, you'll feel every head shake, counter every evasive move, and rejoice in the victory of hard-fought battles. With more than 80 saltwater rods to choose from, starting around \$150, it's smart money as well. From the all-around versatility of Lamiglas Tri-Flex models, to the perfectionist qualities of our custom jigging rods, the right rod is right here to allow you to execute your saltwater passions like a professional.

**Tri-Flex Graphite Saltwater • Tropic Pro Evo Jigging & Popping • Big Fish

TRI-FLEX GRAPHITE SALTWATER

Simplistically, Tri-Flex stands for our proprietary blank designs in which three layers of material, each carefully chosen to provide specific characteristics, are integrated at specific intervals within each blank. More to the point, these rods contain a combination of lightweight power, durability, sensitivity and structural integrity that you'll go gaga over.

TROPIC PRO EVO JIGGING AND POPPING

We're very proud of our relationship with Nicola Zingarelli, global-fisherman and purveyor of the website Caranx.net. Nicola has been instrumental to the design of the Tropic Pro Jigging and Popping Rods. As a group, they represent a precision fishing system that will match any challenge presented by tropical waters worldwide. CJ and SJ models are jigging rods, while the SP models are popping rods. For 2011 the entire line has been revised and updated to feature an all-new Black Cherry finish and Fuji guides. Casting models include a Fuji palming reel seats. Also notice the Max Drag rating, perhaps the most important element on determining which models you may need.

BIG FISH

Big Fish rods are the day-in and day-out offshore performers every angler needs. Their smooth, balanced designs are focused on 30- to 100-pound line classes, placing them in the heart of halibut, tuna, shark, large striper and wreck fisheries. Constructed with the finest materials and components, including aluminum reel seats, slick butts and roller tip where necessary, each model you fish will become an essential rod in your arsenal.

INDIAN RIVER

The Indian River Series is the result of an outstanding relationship between Lamiglas and Florida Captains Jim Ross and Russ Rivers. Their desire was the creation of the ultimate light tackle rods for fishing artificial lures...and Lamiglas delivered. According to Captain Ross, "The Indian River rods are more sensitive than anything I've ever fished with." It's no surprise to us. The rods capitalize on their fast action, high modulus blank construction by eliminating the fore grip and utilizing a Kevlar rear grip and exposed-blank reel seat to transmit every bump and vibration from the business end of the line. In stained waters, the captains have reported they can feel the push of water that precedes the strike as the fish rushes the bait. Angler recognition of the subtleties involved in presentations has increased their success, while the joy of fishing such precision rods has increased the overall quality of the fishing experience immensely.

CERTIFIED PRO POPPIN'

While offshore waters often receive the spotlight, epic battles in back bays and on the flats are far more numerous, especially with a Certified Pro Poppin' rod in hand. Crisp, accurate, and incredibly responsive, you'll find the perfect rods for small poppers, jigs, spoons and live bait. All Certified Pro Poppin' rods feature polished black blanks and Fuji Alconite Concept guides finished with black wraps and silver inlays, along with Fuji exposed-blank reel seats on casting models.

TRI-FLEX GRAPHITE INSHORE

Cork handles immediately categorize these rods as "inshore," but don't overlook these thirteen highly capable models wherever the need for refined power of Tri-Flex Graphite exists. Equally at home casting swim baits to tuna as they are throwing eels to stripers or crabs to tarpon, with each trip you'll find yourself gravitating to these rods for their easy handling and can-do nature.

PROLONG THE LIFE AND PERFORMANCE OF YOUR LAMIGLAS ROD.

Lamiglas fishing rods are built with the finest materials available and constructed to exacting standards. Our expectations of every rod are as high as those anglers who fish with them. With some common sense and careful handling, your Lamiglas rod will offer a lifetime of exceptional experiences.

LINE RATINGS

The individual characteristics built into each and every Lamiglas rod highlight the rods intended use. As a part of that, the strength and flex of the blank is balanced to the recommended line ratings. A Lamiglas rod is rated so that when the rod is held at a 45-degree angle or less, line within the rating will break before the rod does. Angles greater than 45-degrees transfer undue stress to the tip section of the rod (practically eliminating the ability of the stronger butt section to carry any load), and in extreme cases can result in rod failure with as little as 2 pounds of directed pressure. It is not only proper use that requires a rod angle of 45-degrees or less, but this is also the area where you'll find the greatest power from the rod and best control over the fish.

LURE RATINGS

Lure ratings provide a range of lure weights in which optimum performance is achieved. Using a lure that is lighter than the listed weight will not properly load the rod, casting distance and sensitivity will suffer. Using a lure that is heavier than the listed weight will overpower the rod. Again, distance and sensitivity will suffer, along with the compounded problem of overstressing the blank fibers.

REEL INSTALLATION AND REMOVAL

Prior to reel installation, lubricate the reel foot and the threads of the reel seat. Insert the reel and tighten the lock-nut finger tight. Shake the reel side-to-side and tighten again. Repeat the process until the reel no longer moves. Graphite reel seats should never be over-tightened and pliers should never be used in the process. Over extended periods, the reel seat hood may seize to the reel foot. Slowly loosen the reel nut. If it starts to seize, tap the hood. This will break loose the deposits that have built up over time. Continue to loosen the nut. If you do not tap the hood loose, you may separate the hood from the nut.

TRANSPORTATION

The key to rod transportation is eliminating sharp impact to the blank. The best place for a rod to travel is inside a protective tube. If not carried in a tube, the rods should not be left to bounce against other rods or terminal rigging (weights, heavy swivels, lures, etc.) At vehicle travel speed, sharp impacts from these items can fracture the rod blanks. The best way to transport multi-piece rods is with rubber bands holding the sections together. Always affix the sections tip-to-tip and butt-to-butt. This keeps the delicate tip from being crushed against the uneven and much larger handle. Also, do not use hair bands with a metal connecting clip on rods as the metal clip can scratch, or worse, fracture the blank.

STORAGE

Store rods in either the vertical or horizontal position. If leaned in a corner, a set or bow in the rod can occur over time. Never leave your rods where critters can get to them. Scents, salt from perspiration and other biologic contaminants are a sure-fire attraction to undesirables.

CLEANING THE ROD BLANK

The best cleaner we have found for cleaning the blank and handle is a mixture of one part isopropyl alcohol and four parts warm water, along with a good dose of liquid dish soap. Using a soft sponge, scrub the blank and handle, then rinse. Dabbing problem areas with the soap mix for a few minutes before scrubbing can soften heavy build-up. Once you have the rod clean, a coat of wax will simplify the maintenance of a beautiful finish. We recommend any of the carnuba based car waxes. Fish scales and many types of bait will not stick to a waxed rod and it makes cleaning a snap. If you are fishing everyday, a coat of wax every other week should suffice.

CLEANING GUIDES AND REEL SEATS

As strange as it may sound, the use of a toothbrush and toothpaste will remove the stubborn deposits on rod guides and reel seats. After cleaning the reel seats, coat with any light oil. This method works on all reel seats.

SOME LOOK AT THE SURF AND SEE WAVES. WE SEE SPOON WATER, POPPER WATER & BAIT WATER.

Okay so we're obsessive. Instead of hugging the wife and remarking how beautiful the sunrise is, we're strapped in waders, our gaze fixated on breaking baitfish. What lure or bait? What size? No time for sightseeing, these opportunities only last so long. We talk about waves, but more so about rips, eddy-lines, points, and buckets. And in each instance compose the perfect tool for evoking a savage response from the fish that inhabit the spot. If we weren't so picky, we'd just build 10 or 11 basic rods and call it good. But we consider every moment on the water precious, and whether it's the longest cast, perfect lure action, or both, there's more that 60 Lamiglas surf rods to get the job done right.

Tri-Flex Graphite Surf • Graphite Surf & Jetty • Surf King Series**

ALBERTO KNIE EXTREME SERIES

"Fish 'til you drop." Most would consider it a fun display of enthusiasm for sport. For "Crazy" Alberto Knie, however, it's a factual description for a way of life. The Northeast's premier angler, instructor and seminar speaker on the subject of trophy stripers in the surf, the man is consumed by piscatorial conquest. Armed with a truckload of rods and tackle, he says simply, "Sleep is overrated. You can sleep when you're dead." And so it goes. While the rest of us are sleeping, Alberto is on the hunt, in the surf, casting to his next cow. This IGFA world record holder has long fished Lamiglas rods, and for 2011 we're proud to introduce his signature series. The product of Knie and heralded custom rod builder Paul "Paco" Hernandez, the all-new Alberto Knie Extreme series is the most "custom-production" rod series ever. Featuring intricate reinforced woven graphite handles with grip tabs, a stealth satin-clear finish and Fuji K-Frame guides complimenting the fiber-blended moderate/fast action blanks, the series is performance-optimized for the most serious enthusiasts.

SUPER SURF SERIES

The first surf rod line to embrace high-strength braided lines, Super Surf rods combine superior casting performance with brute strength...within a small diameter rod that's light enough to comfortably fish all day long. The blanks are constructed from a proprietary blend of intermediate and high modulus graphite, and outfitted with the finest components available, including over-and-under-wraps on new Fuji K-Frame stainless guides with Alconite inserts. Taken as a whole, the Super Surf line-up represents the finest group of surf rods ever constructed.

RON ARRA PRO SURF

Designed with guidance from five-time national distance casting champion, professional casting instructor and best-selling author Ron Arra, these fast-action surf rods offer incredible power, distance and control. Optimized for both traditional monofilament and high-strength braided lines with the Fuji Alconite Concept guide system.

BIG BANG HEAVER

In the Pacific Northwest, bank fishing for sturgeon is a way of life. To be successful, you need to be comfortable casting copious amounts of lead into powerful river currents and dealing with demanding solid rock river environments. For decades we've constructed the blanks custom builders have relied upon. The 13'10", two-piece Big Bang Heaver is a smooth-casting powerhouse suitable for the toughest fish, and conditions. Handles are rope-wrapped for long-wearing durability. Components are by Fuji for a high-quality finish.

TRI-FLEX GRAPHITE SURF

The growth of Lamiglas Tri-Flex rods has been astounding, and our proprietary tri-wall construction technology is the main reason why. We use a lightweight graphite base, add a fiberglass overwrap, then a second graphite reinforcement through the butt and mid section. The result is a superior blank with incredible strength and durability, and an extremely fast recovery rate. Smooth. Fast. Light. Components include Fuji reel seats, Fuji aluminum oxide guides, cork tape grips, black wraps with metallic green trim.

GRAPHITE SURF & JETTY

Pick any beach, any pier, any jetty anywhere around the world and chances are there are fish to be caught...if you have the right equipment. These super-durable graphite rods are ideal for slick rocky shores and pounding waves. Soft tips aid in the right presentation, and the rods have plenty of power to put the brakes on when fish head for the rocks. The distinctive high-gloss, clear-coated design with black wraps and gold accents makes a bold statement. Final touches include Fuji guides, Fuji graphite reel seats and attractive, functional EVA and cork-tape handles.

* All Cork Handle Tape

SURF KING SERIES

From the leader in design and performance on the water comes a whole new challenge for our competitors, the Lamiglas Surf King series. These six rods represent a value unequalled in surf rods. Premium graphite blanks, the finest Lamiglas tapers, aluminum oxide guides and cork tape grips, finished with our black and silver wraps (which, by the way, look great in trophy photos). Be prepared to lug loads of fish up the beach, along with the extra weight of cash in your pocket. Lamiglas one year limited warranty.

LIMITED LIFETIME WARRANTY

Lamiglas rods are warranted against defects in material and workmanship for the lifetime of the original purchaser, unless otherwise stated*. This warranty is limited to the repair or replacement of the rod and does not cover consequential damages due to the failure of the rod unless they are specifically included under various state laws. Selected value-rods offer a one-year limited warranty.

If your rod fails, send it in a disposable container, prepaid and insured, with DATED PROOF OF PURCHASE to:

Lamiglas Warranty Service

1400 Atlantic Avenue

Woodland, WA 98674

Please include a brief message explaining the problem with the rod, your return address, daytime phone number, and a check or money order in the amount of \$20.00 in U.S. funds for return shipping and handling. If the return shipping length is over 9' and/or if the destination is other than the United States or Canada, the actual return shipping cost will be assessed. If the problem is due to a defect in materials or workmanship, the rod will be repaired or replaced to you as quickly as possible. If the problem is due to an unfortunate accident, misuse, alteration or normal wear and tear, we will advise you of the cost of the repair or replacement and await your approval prior to proceeding. Please allow 10 working days for processing. This warranty is limited to the repair or replacement of the rod and does not cover consequential damages due to the failure of the rod unless they are specifically included under various state laws.

Note: Lamiglas Dealers are not authorized to make warranty decisions. In order for your rod to obtain the proper warranty inspection and determination, the damaged rod must be sent to Lamiglas Warranty Service.

FAST TRACK WARRANTY

Availability limited to rods manufactured after January 1st, 2007. See rod for date code, i.e. A=January, B=February, 7 is the year. January of 2007 is A7. Code is located immediately above foregrip.

No questions asked direct replacement from Lamiglas. Send the rod and all sections* along with the Fast Track fee below and your complete contact information to:

Lamiglas Customer Service

1400 Atlantic Avenue

Woodland, WA 98674

**For one-piece rods, you need only send a section of the rod that includes the complete logo/graphic area with model number and manufacture date.*

We'll send you back a new same model rod. If that model is discontinued or not in stock, then we'll recommend another similar model.

\$50-Excel, Competitor, G-200, Classic Glass, G-1000 freshwater, BFC

(Note: there will be an extra charge for international deliveries to cover the cost of shipping. Also, 1 piece rods over 9' will incur an extra charge)

ROD MATERIALS

XMG 50 GRAPHITE THE NEWEST "SUPER" GRAPHITE.

This super graphite allows us to make smaller-diameter blanks with faster actions. The XMG 50 utilizes a blend of high-modulus graphite fibers to create a perfectly balanced, lightweight blank that is more responsive and more sensitive than anything on the market today.

CERTIFIED PRO GRAPHITE REMARKABLY LIGHTER AND STRONGER.

The Certified Pro series employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter-weight rod than comparable graphites on the market.

G1000 GRAPHITE A LAMIGLAS EXCLUSIVE.

This is our most distinguished and versatile material. We employ first generation graphite coupled with a special resin formula to reduce overall weight while maintaining exceptional flexibility.

FIBERGLASS E-GLASS EARNED ITS PLACE IN HISTORY.

This material is structurally the most durable of the fiberglass family. The glass properties are expressly matched to each unique application. We use the same epoxy resins and technology in these rods as we do in our graphite rods to offer you lighter weight and improved sensitivity.

TRI-FLEX EXCLUSIVE GRAPHITE/FIBERGLASS CONSTRUCTION.

A graphite base and fiberglass overwrap is reinforced with graphite through the butt and mid sections. You get the best of both worlds. We refer to this as "tri-wall" construction. The tips are lightning fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod gives tremendous fish-fighting control and lifting power.

WE'LL GLADLY BE HELD ACCOUNTABLE FOR OUR ACTIONS.

Assures you made the right choice | Length | Model Number | ACTION POWER TYPE DEFINED

Line Weight | Lure Weight

TO SELECT THE RIGHT LAMIGLAS ROD, PAY CLOSE ATTENTION TO THE DETAILS. (WE DO.)

Surprisingly, there is no consistent, scientific methodology that all rod manufacturers use to rate their rods. Some use computers. Others use complex graphs. We use fish...along with more than 55 years of experience. Each rating is a collective recommendation of the hi-low thresholds in which the rod is designed to optimize performance. The variable factors for each rod, lure weight, line weight, action, and power are clearly listed throughout this catalog, as well as labeled on the rods just above the handle. (Not all factors are appropriate for all rods. For example, fly rods will not list a "lure weight.")

"Action" is the measurement of deflection or flex the rod exhibits under load, and more importantly, where that flex occurs along the length of the blank. "Extra Fast" actions concentrate more of the flex towards the tip. "Slow" actions distribute the flex progressively throughout the entire blank. Lamiglas rod actions are dictated by a variety of factors: the intended application, targeted prey, lure weight and line weight.

POWER. HOW MUCH DO YOU NEED?

Applicable to our salmon, steelhead, saltwater and bass rods, "power" is defined by the amount of pressure required to flex the blank. These rods are designed to optimally manage a specific range of lure and line weights. The heavier the line and lure, the more power you'll need to cast, fight and pull effectively. The lighter the line and lure, the less power you'll need.

WEIGHT. LOSE AS MUCH AS POSSIBLE.

A rod that feels heavier each time you cast eventually slows you down. The type and amount of material used contributes greatest to this factor. Lamiglas selects the lightest material and components for the job, but we resist the temptation to go "too light." We design rods that will cast for a lifetime, without ever leaving your arms lifeless.

TAPER. HERE'S THE SKINNY.

The measurement of the change in the diameter of the blank from tip to butt is known as taper. Many use the term synonymously with "action." But actually, taper is one of the factors which rod builders use to achieve the desired action. An aggressive taper at the tip creates a faster action. A straight taper (one which changes at an equal rate throughout the blank) creates a moderate or slower action.
