FISH WITH CONFIDENCE

LAMIGLAS 2012 MODELS GUIDE

Photo by: Ryley Fee

49 NEW REASONS TO FISH WITH LAMIGLAS, AND 261 MORE YOU'VE TRUSTED FOR DECADES.

No one manufactures a larger selection of high performance, technique specific rods. Not in the U.S. Not in the world. This year alone, Lamiglas introduces 49 advanced new models to optimize new techniques and capitalize on new technologies.

Select a species. Choose a technique. Define a price range. Without question Lamiglas delivers multiple rod models that will excel in every form and function a fishing rod can. With more than 310 cataloged rods, 290 blanks, and countless privately branded rods, finding the perfect rod is no longer an elusive endeavor. Just ask for the worldwide leader in performance fishing rods: Lamiglas.

NEW CGR 802 L - JARED JOHNSON KOKANEE ROD

Jared Johnson of Rocky Mountain Tackle is the king of trophy Kokanee. Since the introduction, everyone's been asking for an 8-footer to make trolling wider spreads easier. We delivered a new classic fiberglass model CGR 802 L to accomplish the task.

NEW XL 704 GLASS

This American built, supreme value family just keeps growing, and for good reason. The XL 704 is an exceptional all-fiberglass model designed for throwing lighter crankbaits and reaction baits. The soft action allows for more solid hook-ups on tentative strikes. You'll find it on page 4 in the "ultra-light" section.

NEW XMG: EXS 910 ML & EXC 94MT

These highly precise new spinning and casting models offer a wider variety of lengths without sacrificing the sensitivity XMG rods have become known for.

NEW CERTIFIED PRO KWIK SERIES

The XCC 934 Kenai Kwik is now the top rod choice for professional salmon guides from Alaska to California. For 2012, we expanded, enhanced and perfected a special group of Certified Pro Fiberglass and Composite rods into an entire family of "Kwik" rods. Better grab one fast.

NEW CLASSIC GLASS USA SERIES

Only one thing could improve the classic fiberglass action and durability of our epic Classic Glass Series... having them produced 100% in the U.S.A. It's about pride. It's about controlling every aspect of performance. It's about time.

INFINITY SI FLY

Endless opportunity awaits with our new Infinity SI Fly series. Fifteen, state-of-the-art new blanks, with lighter faster action blanks, offer more distance and precise targeting. Truly unique is the new ISI 1178 SW, an 11' "switch rod" for fishing both double and single handed styles.

EXCEL INSHORE

Ten sensational new models create an all-encompassing series for targeting everything from redfish to trout to calico bass. Value priced with premium lightweight blanks and American Tackle Ring Lock guides. Lighter models feature split grip handles. Made in USA.

TRI-FLEX GRAPHITE SURF

The all-new sleek handle designs reduce weight, improve grip, and optimize balance. Lighter Fuji guides dial them in perfectly. Don't miss the new 10' and 11' one piece models.

ROD MATERIALS

XMG 50 GRAPHITE THE NEWEST "SUPER" GRAPHITE.

This super graphite allows us to make smaller-diameter blanks with faster actions. The XMG 50 utilizes a blend of high-modulus graphite fibers to create a perfectly balanced, lightweight blank that is more responsive and more sensitive than anything on the market today.

CERTIFIED PRO GRAPHITE REMARKABLY LIGHTER AND STRONGER.

The Certified Pro series employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter-weight rod than comparable graphites on the market.

G1000 GRAPHITE A LAMIGLAS EXCLUSIVE.

This is our most distinguished and versatile material. We employ first generation graphite coupled with a special resin formula to reduce overall weight while maintaining exceptional flexibility.

FIBERGLASS E-GLASS EARNED ITS PLACE IN HISTORY.

This material is structurally the most durable of the fiberglass family. The glass properties are expressly matched to each unique application. We use the same epoxy resins and technology in these rods as we do in our graphite rods to offer you lighter weight and improved sensitivity.

TRI-FLEX EXCLUSIVE GRAPHITE/FIBERGLASS CONSTRUCTION.

A graphite base and fiberglass overwrap is reinforced with graphite through the butt and mid sections. You get the best of both worlds. We refer to this as "tri-wall" construction. The tips are lightning fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod gives tremendous fish-fighting control and lifting power.

PROLONG THE LIFE AND PERFORMANCE OF YOUR LAMIGLAS ROD.

Lamiglas fishing rods are built with the finest materials available and constructed to exacting standards. Our expectations of every rod are as high as those anglers who fish with them. With some common sense and careful handling, your Lamiglas rod will offer a lifetime of exceptional experiences.

LINE RATINGS

The individual characteristics built into each and every Lamiglas rod highlight the rods intended use. As a part of that, the strength and flex of the blank is balanced to the recommended line ratings. A Lamiglas rod is rated so that when the rod is held at a 45-degree angle or less, line within the rating will break before the rod does. Angles greater than 45-degrees transfer undue stress to the tip section of the rod (practically eliminating the ability of the stronger butt section to carry any load), and in extreme cases can result in rod failure with as little as 2 pounds of directed pressure. It is not only proper use that requires a rod angle of 45-degrees or less, but this is also the area where you'll find the greatest power from the rod and best control over the fish.

LURE RATINGS

Lure ratings provide a range of lure weights in which optimum performance is achieved. Using a lure that is lighter than the listed weight will not properly load the rod, casting distance and sensitivity will suffer. Using a lure that is heavier than the listed weight will overpower the rod. Again, distance and sensitivity will suffer, along with the compounded problem of overstressing the blank fibers.

REEL INSTALLATION AND REMOVAL

Prior to reel installation, lubricate the reel foot and the threads of the reel seat. Insert the reel and tighten the lock-nut finger tight. Shake the reel side-to-side and tighten again. Repeat the process until the reel no longer moves. Graphite reel seats should never be over-tightened and pliers should never be used in the process. Over extended periods, the reel seat hood may seize to the reel foot. Slowly loosen the reel nut. If it starts to seize, tap the hood. This will break loose the deposits that have built up over time. Continue to loosen the nut. If you do not tap the hood loose, you may separate the hood from the nut.

TRANSPORTATION

The key to rod transportation is eliminating sharp impact to the blank. The best place for a rod to travel is inside a protective tube. If not carried in a tube, the rods should not be left to bounce against other rods or terminal rigging (weights, heavy swivels, lures, etc.) At vehicle travel speed, sharp impacts from these items can fracture the rod blanks. The best way to transport multi-piece rods is with rubber bands holding the sections together. Always affix the sections tip-to-tip and butt-to-butt. This keeps the delicate tip from being crushed against the uneven and much larger handle. Also, do not use hair bands with a metal connecting clip on rods as the metal clip can scratch, or worse, fracture the blank.

STORAGE

Store rods in either the vertical or horizontal position. If leaned in a corner, a set or bow in the rod can occur over time. Never leave your rods where critters can get to them. Scents, salt from perspiration and other biologic contaminants are a sure-fire attraction to undesirables.

CLEANING THE ROD BLANK

The best cleaner we have found for cleaning the blank and handle is a mixture of one part isopropyl alcohol and four parts warm water, along with a good dose of liquid dish soap. Using a soft sponge, scrub the blank and handle, then rinse. Dabbing problem areas with the soap mix for a few minutes before scrubbing can soften heavy build-up. Once you have the rod clean, a coat of wax will simplify the maintenance of a beautiful finish. We recommend any of the caruba based car waxes. Fish scales and many types of bait will not stick to a waxed rod and it makes cleaning a snap. If you are fishing everyday, a coat of wax every other week should suffice.

CLEANING GUIDES AND REEL SEATS

As strange as it may sound, the use of a toothbrush and toothpaste will remove the stubborn deposits on rod guides and reel seats. After cleaning the reel seats, coat with any light oil. This method works on all reel seats.

WE'LL GLADLY BE HELD ACCOUNTABLE FOR OUR ACTIONS.

TO SELECT THE RIGHT LAMIGLAS ROD, PAY CLOSE ATTENTION TO THE DETAILS. (WE DO.)

Surprisingly, there is no consistent, scientific methodology that all rod manufacturers use to rate their rods. Some use computers. Others use complex graphs. We use fish...along with more than 55 years of experience. Each rating is a collective recommendation of the hi-low thresholds in which the rod is designed to optimize performance. The variable factors for each rod, lure weight, line weight, action, and power are clearly listed throughout this catalog, as well as labeled on the rods just above the handle. (Not all factors are appropriate for all rods. For example, fly rods will not list a "lure weight.")

"Action" is the measurement of deflection or flex the rod exhibits under load, and more importantly, where that flex occurs along the length of the blank. "Extra Fast" actions concentrate more of the flex towards the tip. "Slow" actions distribute the flex progressively throughout the entire blank. Lamiglas rod actions are dictated by a variety of factors: the intended application, targeted prey, lure weight and line weight.

POWER. HOW MUCH DO YOU NEED?

Applicable to our salmon, steelhead, saltwater and bass rods, "power" is defined by the amount of pressure required to flex the blank. These rods are designed to optimally manage a specific range of lure and line weights. The heavier the line and lure, the more power you'll need to cast, fight and pull effectively. The lighter the line and lure, the less power you'll need.

WEIGHT. LOSE AS MUCH AS POSSIBLE.

A rod that feels heavier each time you cast eventually slows you down. The type and amount of material used contributes greatest to this factor. Lamiglas selects the lightest material and components for the job, but we resist the temptation to go "too light." We design rods that will cast for a lifetime, without ever leaving your arms lifeless.

TAPER. HERE'S THE SKINNY.

The measurement of the change in the diameter of the blank from tip to butt is known as taper. Many use the term synonymously with "action." But actually, taper is one of the factors which rod builders use to achieve the desired action. An aggressive taper at the tip creates a faster action. A straight taper (one which changes at an equal rate throughout the blank) creates a moderate or slower action.

AS NEW TECHNIQUES EMERGE, LAMIGLAS LEADS THE WAY.

Salmon and steelhead angling is about as technically-diverse as you can get. And it changes everyday. Pick any mile-long stretch of river and there's just cause for having a dozen different rods onboard to fish it effectively. Hence, the reason Lamiglas crafts more technique-specific rods than any other manufacturer. Jig, drift, back-bounce, troll, hover, back-troll, throw spinners, boondog, side-drift, pull plugs, side plane, mooch, etcetera, etcetera, and etcetera. Yeah, we've got specialized rods to do that. But we're also realists, understanding that when the rods in your garage start taking precedence over the food in your fridge, people will begin to ask questions. So, there are plenty of multi-purpose rods here as well.

XMG 50

XMG 50 rods prove that technology does increase performance. Constructed from a cutting-edge blend of high-modulus graphite fibers, XMG 50 rods combine an aerospace blank material with woven graphite or cork handles to deliver a fishing experience that maximizes every cast, strike and fight. You feel everything, yet marvel at the lack of weight. If your passion for fishing is greater than your available time, XMG 50's make the most of every moment.

CERTIFIED PRO KWIK SERIES

Take downs stay down! Formally our "Certified Pro Fiberglass" series, for 2012 we've fully integrated our proprietary fiberglass and graphite blend throughout the line and tagged them all as "Kwik" rods. Why? Because kwik results are the rule here. The XCC 934 and XCC 1064's have taken over the professional guide community as the ultimate trolling rod. Long, soft, and forgiving, these rods allow trolled and back-trolled plugs and bait to produce more action. The XCC 903, 934 and 1064 are sensational downrigger rods. We've added graphite handles to several models to enable effortless removal from rod holders. All models feature Fuji reel seats and Fuji Concept Guide System.

CERTIFIED PRO

Certified Pro salmon and steelhead rods represent the singular best value in premium performance rods, priced about \$100 less than their closest competition. Special blends of high and intermediate modulus graphites are used to achieve the optimum actions and ultra-small diameters. This is our backbone series where drift, jig, float, backbounce and centre-pin anglers find the technique-specific characteristics necessary to excel on the water every day. Select GH models are outfitted with graphite handles to further elevate their performance and long wearing comfort in the hand. Certified Pro models include Fuji Alconite Concept guides, exposed-blank reel seats on casting models and premium cork; nothing but the best.

G1000 SERIES

The new metallic cranberry gloss finish is gorgeous and unmistakable! Beauty aside, performance is where the G1000 series shines. Lamiglas G1000 series earned their place in angling history by providing high-quality American-made fishing tools at an honest value. Most are highlighted with technique and territorial names like Hot Shot Magnum, Salmon Moocher and Russian River, but please don't assume these are the sole application in which these rods excel. Our Herring rod is an exceptional big bobber rod. The Hot Shot Magnum fishes divers and bait with result-generating perfection. And the Kenai rods knock the fins off salmon, wherever they swim. G1000 rods are purebred workhorses, accepting the challenges of demanding fish and techniques and responding with a power, form and function for a lifetime of heavy use. New features include American Tackle Ring Lock guides and blank-thru reel seats on drift fishing models. GH models denote graphite fore and rear grips-the ultimate long wearing, sensitive, comfortable and strikingly good-looking handle material.

SALMON/STEELHEAD

ROGUE RIVER SPECIAL

Six outstanding rods designed for one of the most demanding (and rewarding) rivers in the United States. Rogue River Specials will target everything from half-pounders (RR 76 MTS) all the way to monster fall kings (RR 86 HC.) Upgraded from tip to butt, Rogue River Specials sport a stainless-framed zirconia ring guide system, blank-through reel seats on casting models and composite cork butt caps. Rich emerald green blanks are highlighted with green wraps and gold trim.

NORWEST SPECIAL

All the quintessential salmon and steelhead rods are right here. From the 7'9" back-bouncer through the five 8'6" casting and spinning models, you'll find the right rods for steelhead, pinks, sockeye, chum, silvers and kings. Completely redesigned, you'll appreciate the increased number of guides and the quality of the stainless steel frames and zirconia rings. Blank-through reel seats are standard on all casting models, along with composite cork butt caps throughout. All Norwest Specials are sharply dressed on deep blue blanks with contrasting blue and silver wraps.

CLASSIC GLASS USA - NEW FOR 2012

Total American made pride in the palm of your hand. Lamiglas' highly skilled designers and builders take these all fiberglass rods to heroic levels of detail. The CGA 86 MHC is a stout, powerful and flexible plug puller. Downrigger anglers will find the CGA 90 DR a pedigree of the deep. The CGA 803 is a versatile plug and bait troller. All models feature Fuji guides and reel seats.

MSRP Starting At \$230

CLASSIC GLASS SERIES

These rods are for the plug pullers, backtrollers, herring trollers and downrigger anglers that excel on the water by keeping it simple. The premise behind moderate action glass rods is simple: if you allow a fish to get a firm hold of your bait or lure, the result will be a solid hook-up. And most often it really is just that simple. Traditional styling makes these rods all-around winners.

THE FLY FISHING EXPERIENCE OF A LIFETIME FOR A FEW HUNDRED BUCKS. NOW THAT'S PRICELESS!

Searching for perfection? Look no further than Lamiglas. We've gone to extensive lengths to design the perfect marriage of brawn and brains. All the attributes you desire are here and ready to join you wherever your adventures are headed. Suit your casting style and fishing conditions perfectly with our wide range of rod actions. Each and every Lamiglas fly rod is a testament to our commitment of exacting performance and unparalleled quality. These are rods built by hands that love to fish as much as you do. And when you've got one on the water you can tell. The details radiate skilled craftsmanship. The actions are clearly defined and meticulously derived. The components are matched to the intended technique with precision. All in all, Lamiglas fly rods instill great pride with every gorgeous, long cast.

Infinity SI Fly • G200 Graphite Fly

INFINITY SI - NEW FOR 2012

Endless opportunity awaits with our new Infinity Fly series. Fifteen, state-of-the-art new blanks, with lighter faster actions, including 4 ultra long casting 9'10" models. Of special note, the 1178 is the first ever "switch" rod in our collection. A unique new hybrid cross of traditional casting and spey casting design. It's balance and handle design accommodates both methods to confidently swing steelhead flies on large rivers in the morning and work the brushy shores in the evening. Finished with exotic machined aluminum and carbon fiber reel seats.

WE CONTROL THE RODS' ACTION SO YOU CAN CONTROL WHAT'S ON THE END OF THE LINE.

Whether you're casting something that looks like a household pet for muskie, detecting the breath-like bite of a deepwater walleye or plowing the lake for trout, Lamiglas has been there...thousands of times! There's a remarkable world of fishing to enjoy and we've learned most of it right along with our customers. It's taken decades of painstaking development but the proof comes from Lamiglas owners, tens of thousands of enthusiastic anglers who choose Lamiglas because they get more from their time on-the-water. It's the product of the Lamiglas formula, balanced tried-and-true actions and premium materials that transform the sport of fishing into a wonderland of fishing opportunity.

Muskie • G1000 • G200 • Ultra Light • Graphite Certified Pro • Certified Pro Fiberglass • Excel • Competitor Series

MUSKIE

Lamiglas musky rods are noticeably lighter and more responsive than ever with American Tackle Ring Lock guides and an all-new metallic cranberry finish. What hasn't changed is their foundation of proprietary G1000 blank material, incredible inherent power, durability and control over the largest lures and fish. Fuji reel seats and foam fighting butts.

G1000 GRAPHITE SPINNING

In the world of high-performance fishing rods there are few that rival the G1000 series. Newly updated with American Tackle Ring Lock guides and an all-new metallic cranberry finish. You'll notice a lighter, more responsive feel than ever before. From trout to bass to panfish, walleye and more, the opportunities for the G1000 series are as vast as your pride of ownership.

EXCEL

The Excel series offers more anglers than ever a renewed pride in owning and fishing an American made fishing rod. Feature laden with Lamiglas graphite construction, split grips, Aero Comfort Touch reel seats on spinning models and Fuji exposed blank reel seats on casting models, the deep metallic copper blanks are a delight to fish. The CM models are constructed with American Tackle Micro Life guides. Toss lighter crankbaits and reaction baits with the new XL 704 glass rod. It's perfect.

THE DIFFERENCE BETWEEN HOOKING FISH AND BOATING FISH.

Smooth, precise and powerful, the premium materials and actions of Lamiglas saltwater rods maximize every opportunity. From Black Fin to Blue Fin, Strippers to Sailfish, Amberjack to Albacore, a Lamiglas rod is the smartest choice. Sensitive and responsive, you'll feel every head shake, counter every evasive move, and rejoice in the victory of hard-fought battles. With nearly 70 saltwater rods to choose from, starting around \$150, it's smart money as well. From the all-around versatility of Lamiglas Tri-Flex models, to the perfectionist qualities of our custom jigging rods, the right rod is right here to allow you to execute your saltwater passions like a professional.

**Tri-Flex Graphite Saltwater • Tropic Pro Evo Jigging & Popping • Big Fish
Inshore Classic Graphite • Certified Pro Poppin' • Tri-Flex Graphite Inshore • Excel Inshore**

TRI-FLEX GRAPHITE SALTWATER

Simplistically, Tri-Flex stands for our proprietary blank designs in which three layers of material, each carefully chosen to provide specific characteristics, are integrated at specific intervals within each blank. More to the point, these rods contain a combination of lightweight power, durability, sensitivity and structural integrity that will provide years, and perhaps decades, of exciting battles.

TROPIC PRO EVO JIGGING AND POPPING

We're very proud of our relationship with Nicola Zingarelli, global-fisherman and purveyor of the website Caranx.net. Nicola has been instrumental to the design of the Tropic Pro Jigging and Popping Rods. As a group, they represent a precision fishing system that will match any challenge presented by tropical waters worldwide. CJ and SJ models are jigging rods, while the SP models are popping rods. For 2011 the entire line has been revised and updated to feature an all-new Black Cherry finish and Fuji guides. Casting models include a Fuji palming reel seat. Also notice the Max Drag rating, perhaps the most important element on determining which models you may need.

BIG FISH

Big Fish rods are the day-in and day-out offshore performers every angler needs. Their smooth, balanced designs are focused on 20- to 100-pound line classes, placing them in the heart of halibut, tuna, shark, large striper and wreck fisheries. Constructed with the finest materials and components, including aluminum reel seats, slick butts and roller tip where necessary. The 7040 W is a wireline rod with silicon nitrate guides. The 7640 C is our premiere cod rod.

EXCEL INSHORE - NEW FOR 2012

Excel rods do exactly what their name implies. The lightweight blanks with American Tackle Ring Lock guides are ideal for all inshore species. Specific actions for everything from redfish to trout to calico bass. Lighter models feature split grip handles. Finished in a metallic copper tone. Made in USA.

CERTIFIED PRO POPPIN'

While offshore waters often receive the spotlight, epic battles in back bays and on the flats are far more numerous, especially with a Certified Pro Poppin' rod in hand. Crisp, accurate, and incredibly responsive, you'll find the perfect rods for small poppers, jigs, spoons and live bait. All Certified Pro Poppin' rods feature polished black blanks and Fuji Alconite Concept guides finished with black wraps and silver inlays, along with Fuji exposed-blank reel seats on casting models.

TRI-FLEX GRAPHITE INSHORE

Cork handles immediately categorize these rods as "inshore," but don't overlook these nine highly capable models wherever the need for refined power of Tri-Flex Graphite exists. Equally at home casting swim baits to tuna as they are throwing eels to stripers or crabs to tarpon, with each trip you'll find yourself gravitating to these rods for their easy handling and can-do nature. The new TFX 6015S is our latest edition for throwing bucktails for striped bass, fluke and bluefish.

SOME LOOK AT THE SURF AND SEE WAVES. WE SEE SPOON WATER, POPPER WATER & BAIT WATER.

Okay so we're obsessive. Instead of hugging the wife and remarking how beautiful the sunrise is, we're strapped in waders, our gaze fixated on breaking baitfish. What lure or bait? What size? No time for sightseeing, these opportunities only last so long. We talk about waves, but more so about rips, eddy-lines, points, and buckets. And in each instance compose the perfect tool for evoking a savage response from the fish that inhabit the spot. If we weren't so picky, we'd just build 10 or 11 basic rods and call it good. But we consider every moment on the water precious, and whether it's the longest cast, perfect lure action, or both, there's more that 60 Lamiglas surf rods to get the job done right.

**Alberto Knie Extreme Series • Super Surf Series • Ron Arra Pro Surf • Big Bang Heaver
Tri-Flex Graphite Surf • Graphite Surf & Jetty • Surf King Series**

ALBERTO KNIE EXTREME SERIES

"Fish 'til you drop." Most would consider it a fun display of enthusiasm for sport. For "Crazy" Alberto Knie, however, it's a factual description for a way of life. The Northeast's premier angler, instructor and seminar speaker on the subject of trophy strippers in the surf, the man is consumed by piscatorial conquest. Armed with a truckload of rods and tackle, he says simply, "Sleep is overrated. You can sleep when you're dead." And so it goes. While the rest of us are sleeping, Alberto is on the hunt, in the surf, casting to his next cow. This IGFA world record holder has long fished Lamiglas rods, and in 2011 we proudly introduced his signature series. The product of Knie and heralded custom rod builder Paul "Paco" Hernandez, the Alberto Knie Extreme series is the most "custom-production" rod series ever. Featuring intricate reinforced woven graphite handles with grip tabs, a stealth satin-clear finish and Fuji K-Frame guides complimenting the fiber-blended moderate/fast action blanks, the series is performance-optimized for the most serious enthusiasts.

SUPER SURF SERIES

The first surf rod line to embrace high-strength braided lines, Super Surf rods combine superior casting performance with brute strength...within a small diameter rod that's light enough to comfortably fish all day long. The blanks are constructed from a proprietary blend of intermediate and high modulus graphite, and outfitted with the finest components available, including over-and-under-wraps on new Fuji K-Frame stainless guides with Alconite inserts. Two "DH" models feature our functional detachable handle system for ultimate versatility.

RON ARRA PRO SURF

Designed with guidance from five-time national distance casting champion, professional casting instructor and best-selling author Ron Arra, these fast-action surf rods offer incredible power, distance and control. Optimized for both traditional monofilament and high-strength braided lines with the Fuji Alconite Concept guide system.

BIG BANG HEAVER

In the Pacific Northwest, bank fishing for sturgeon is a way of life. For decades we've constructed the blanks custom builders have relied upon. The 13'10", two-piece Big Bang Heaver is a smooth-casting powerhouse suitable for the toughest fish, and conditions. Handles are rope-wrapped for long-wearing durability. Handles are rope-wrapped for long wearing durability. The Big Bangs feature all Fuji components.

TRI-FLEX GRAPHITE SURF - NEW FOR 2012

The growth of Lamiglas Tri-Flex rods has been astounding, and our proprietary tri-wall construction technology is the main reason why. For 2012 we integrated the expertise of renowned custom rod builder Paul "Paco" Hernandez. Smooth and sleek is the core objective of this newly designed series featuring Fuji reel seats, lightweight Fuji guides, cork tape grips, black wraps with metallic green trim. Two one-piece models are destined to adorn the rod racks of innumerable surf bums.

GRAPHITE SURF & JETTY

Pick any beach, any pier, any jetty anywhere around the world and chances are there are fish to be caught...if you have the right equipment. These super-durable graphite rods are ideal for slick rocky shores and pounding waves. Soft tips aid in the right presentation, and the rods have plenty of power to put the brakes on when fish head for the rocks. The distinctive high-gloss, clear-coated design with black wraps and gold accents makes a bold statement. Final touches include Fuji guides, Fuji graphite reel seats and attractive, functional EVA and cork-tape handles.

SURF KING SERIES

From the leader in design and performance on the water comes a whole new challenge for our competitors, the Lamiglas Surf King series. These six rods represent a value unequalled in surf rods. Premium graphite blanks, the finest Lamiglas tapers, aluminum oxide guides and cork tape grips, finished with our black and silver wraps (which, by the way, look great in trophy photos). Be prepared to lug loads of fish up the beach, along with the extra weight of cash in your pocket. Lamiglas one year limited warranty.

DRIFT BOAT OARS

Drift boat owners can now experience the power and performance of Lamiglas even when they're not fishing. More than 50 years of technical expertise in designing the finest fishing rods has expanded to produce the first line of quality drift boat oars with a level of perfection that's, well, perfect. Comfortable, lightweight, and powerful, Lamiglas texalium and graphite oars are available in the right styles and lengths to match the waters you row most. Complete counterbalanced oars, shaft and handle, or shaft-only models are available.
