

Lamiglas

FISH WITH CONFIDENCE

2009

YOU MAY NOT NEED EVERY ROD WE MAKE, BUT WE MAKE EVERY ROD YOU NEED.

No one manufactures more technique specific rods than Lamiglas. Not in the U.S.. Not in the world. Select a species. Choose a technique. Define a price range. Without question Lamiglas delivers multiple rod models that will excel in every form and function a fishing rod can.

Lamiglas, located in Woodland, WA, the rod design capitol of the world, has specialized in the rod building craft for a long time. Since the early 1950's, in fact. Back then, fiberglass ruled the water. (Hence the origin of the Lamiglas name.) Today, high modulus graphite is the backbone of industry. And, in ever-increasing numbers, even higher performing fiber blends, such as Lamiglas' proprietary Tri-Flex Graphite designs.

With more than 424 cataloged rods, 290 blanks, and countless privately branded rods, finding the perfect rod is no longer an elusive endeavor. Just ask for the worldwide leader in performance fishing rods: Lamiglas.

THE BRIGHTEST IDEAS TO COME OUT OF WASHINGTON IN SEVERAL DECADES.

FLY RODS

XMG 50

A new 12-weight has passed development with flying colors and is ready to go to work on Alaska's Kings and Florida's Tarpon.

SALMON STEELHEAD RODS

XMG 50

With casting ratings of 1/4- to 5/8-ounce the new XMG 92 M and cork handled XMG 92 M-C are potentially the sweetest casting rods in the line.

CERTIFIED PRO

Nine-foot makes an exceptional all-around drift rod for steel-head, and that's exactly what we've added to the Certified Pro line-up. The fast action X 90 MC is worth a look.

CLASSIC GLASS

We never overlook the smallest of our favorite salmon, the Kokanee. The new CG 70 DR adds an exceptional downrigger Kokanee rod to this value-laden series. Additionally, the CG 86 MHS adds a spinning rod to the line.

BASS RODS

CERTIFIED PRO

Unique fiber blends provide the XCC 724 and XCC 725 the premium action of our Certified Pro Fiberglass crank bait rods, with the added benefits of lighter weight and smaller diameter blanks.

FRESHWATER RODS

MUSKY SERIES

The new LGM 90 H is a serious power-trotting rod. Deployed in pairs, the rods cover a wide swath of available water. Incredible inherent strength and durability deliver a lifetime of performance.

SURF RODS

SUPER SURF

When you're ahead of the pack, keep your eyes forward and press on. Last year we introduced the Super Surf Series that have taken the high-performance surf market by storm. This year, in addition to a new casting model, we've introduced an interchangeable handle system to add even more function to the best surf rods made.

RON ARRA SURF PRO

The XSRA 1205 has been a fantastic performer on larger fish. The new XSRA 1205-2 offers equally impressive performance in a 2-piece rod for easier travel.

GRAPHITE SURF & JETTY

Two new rods enter the Graphite Surf & Jetty line up. The XS 1061 PP is a pencil popper rod designed to impart maximum action on these productive lures. The XS 12 MHC is a much requested 12-footer, and the longest rod in this powerhouse line-up.

BIG BANG STURGEON HEAVERS

We've built the blanks for decades, and now we're releasing the rods. The same 13' 10" action constructed in either 1- or 2-pieces. Rated for a full 6- to 16-ounces these are not rods for the timid. Directed at the Columbia River Sturgeon fishery, they'll excel wherever big leads need to go airborne for substantial distances.

SURF LITES

Many delicacies found in the surf line are of the smaller variety. Surf Lites target smaller fish like Southern California's Corvina with balance and precision. Three rods are matched perfectly to the conditions and size of the quarry.

SALTWATER

TROPIC PRO JIGGING & POPPING

The all-new TP 8040 SP adds increased precision to the Tropic Pro popping rods. Falling between the 7' 30-pound and 8'6" 50-pound model, this 8' 40-pound rod allows you to choose the exact rod to balance lure and fish sizes with conditions.

INDIAN RIVER SERIES

Captains Jim Ross and Russ Rivers of Indian River Fishing Academy in Florida tasked us with building them the ultimate light tackle rods. Seven new rods are the result. Incorporating Texalium rod blanks with Texalium handles, these fast action rods have become what Captain Ross calls simply, "The most sensitive rods I've ever fished."

See the world through the eyes of Lamiglas.

Cover Photo:
Without duplicating a single model, each of the 424 rods you'll find in this catalog was tediously arranged on the factory floor in Woodland, Washington. The process took nearly 80 man-hours to perfect. Absolutely no retouching or Photoshop effects were added. Photographer: Jonathon Nichols.

LOVE. BEAUTY. COMPANIONSHIP.

WHAT YOU CAN'T FIND IN A MATE YOU CAN FIND IN YOUR FLY ROD.

Searching for perfection? Look no further than Lamiglas. We've gone to extensive lengths to design the perfect marriage of brawn and brains. All the attributes you desire are here and ready to join you wherever your adventures are headed.

With more than 30 exceptional models to choose from, you don't have to make compromises. Suit your casting style and fishing conditions perfectly with our wide range of rod actions. Each and every Lamiglas fly rod

XMG 50 TRAVEL

SPRING CREEK

G1000 GRAPHITE FLY

TRAVELER GRAPHITE FLY

G200 GRAPHITE FLY

is a testament to our commitment of exacting performance and unparalleled quality. These are rods built by hands that love to fish as much as you do. And when you've got one on the water you can tell. The details radiate skilled craftsmanship. The actions are clearly defined and meticulously derived. The components are matched to the intended technique with precision. All in all, Lamiglas fly rods instill great pride with every gorgeous cast.

XMG 50 TRAVEL

Utilizing our proprietary XMG 50 graphite blanks, the balance, power, and control found in these rods is simply sensational. Their extra fast (pushing ultra-fast) actions load quickly and generate incredible line speed on the river, lake, or flats. All models are constructed in four pieces for unencumbered travel. You'll find polished graphite blanks with Cocobolo Nickel Silver reel seats on 4- through 6-weights, machined aluminum reel seats on 7- through NEW 12-weight. Lamiglas travel tube included.

"Elusive" and "unattainable" just became the quintessential no-brainer.

G1000 GRAPHITE FLY

Our G1000 series has not only been Lamiglas' most popular fly rod series, but America's as well. Smooth, strong, and truly enjoyable to fish with, the G1000 series now features a hand-polished natural graphite finish. They are as attractive as they are responsive. You owe it to yourself, and your wallet, to cast these American legends.

Don't be surprised when the compliments become as long as the casts.

ACTIONS SPEAK LOUDER THAN WORDS.

LISTEN AS ALL 123 MODELS SCREAM IN UNISON, "PICK ME! FISH ME!"

Salmon and steelhead angling is about as technically-diverse as you can get. Pick any mile-long stretch of river and there's just cause for having a dozen different rods on-board to fish it effectively. Hence, the reason Lamiglas crafts more technique-specific rods than any other manufacturer. Jig, drift, back-bounce, troll, hover, back-troll, throw spinners, boondog, side-drift, pull plugs, side plane, mooch, etcetera, etcetera, and etcetera. Yeah, we've got specialized rods to do that.

- CLASSIC GLASS SERIES

But we're also realists, understanding that when the rods in your garage start taking precedence over the food in your fridge, people will begin to ask questions. Consider where and how you fish most often, the environment, the gear, and the size of the fish, and we'll deliver superior performance. Fact is, there's not a known technique we don't make a rod design for. If one of you ingenious anglers happens to invent one, you'll likely find a rod for it in our catalog next year.

Ti2000 TITANIUM/IM700

Ti2000 rods are the most sensitive rods you can fish, plain and simple. The performance is derived from the pairing of our IM700 graphite with a true titanium tube in the rod butt. In combination these materials have the uncanny ability to "amplify" the transmission of the subtlest bumps, ticks and bites from rod tip to hand. The technology is most valuable in drift rods, where sensitivity has a direct correlation with fish landed, hence three exceptional models for anglers who appreciate the very best. Fuji Concept Guide System, Fuji exposed-blank reel seat and Portuguese cork handles complete the ultimate rods. Lamiglas travel tube included.

XMG 50

XMG 50 rods prove that technology does increase performance. Constructed from a cutting-edge blend of high-modulus graphite fibers, XMG 50 rods combine an aerospace blank material with woven graphite handles to deliver a fishing experience that maximizes every cast, strike and fight. You feel everything, yet marvel at the lack of weight. If your passion for fishing is greater than your available time, XMG 50's make the most of every moment.

You want more rods. She wants more purses. Don't make life any more complicated than it needs to be.

CERTIFIED PRO

Certified Pro salmon and steelhead rods represent the singular best value in premium performance rods. Ultra-small diameter, third generation graphite construction priced about \$100 less than their closest competition. This is our backbone series where drift, jig, float, backbounce and centre-pin anglers find the technique-specific characteristics necessary to excel on the water every day. Select GH models are outfitted with graphite handles to further elevate their performance and long wearing comfort in the hand. Certified Pro models include Fuji Alconite Concept guides, exposed-blank reel seats on casting models and premium cork; nothing but the best.

CERTIFIED PRO FIBERGLASS

Certified Pro Fiberglass rods offer every advantage available to trolling and backtrolling anglers. At their core is Lamiglas E-Glass construction. Smooth, refined actions are constructed to exacting standards for each model's intended purpose. The XCF 801, 802 and 803 are plug and diver & bait rods, balanced for their application to allow lures to generate maximum action. On the strike, the rods allow fish to achieve a solid hold before the butt section sets the hook. Longer models apply the same controlled response to trolled baits like herring and anchovies, effectively insulating the strike and fish fighting from human-induced errors. The rods fish the bait, set the hook, and cushion the fight as a function of their design. The XCF 906 is a specialty model for Canada's Fraser River sturgeon. It's length, power and action excels in the fishery where fish size covers a wide spectrum. Fuji Concept guides produce perfection in line lay on the blank, and premium Fuji reel seats and Portuguese cork finish the rods.

When opportunities arise, some adapt. Others buy new rods.

G1000 SERIES

Lamiglas G1000 series earned their place in angling history by providing high-quality American-made fishing tools at an honest value. Affordable excellence. To make your purchase decisions easier, we've highlighted many models with technique and territorial names like Hot Shot Magnum, Salmon Mocher and Russian River, but please don't assume these are the sole application in which these rods excel. Our Herring rod is an exceptional big bobber rod. The Hot Shot Magnum fishes divers and bait with result-generating perfection. And the Kenai rods knock the fins off salmon, wherever they swim. G1000 rods are purebred workhorses, accepting the challenges of demanding fish and techniques and responding with a power, form and function for a lifetime of heavy use. Features include natural graphite blanks, Fuji guides, top quality reel seats and cork grips. TH models denote Texalium fore and rear grips—the ultimate long wearing, sensitive, comfortable and strikingly good-looking handle material.

ROGUE RIVER SPECIAL

Six outstanding rods designed for one of the most demanding (and consequently rewarding) rivers in the United States. Rogue River Specials will target everything from half-pounders (RR 76 MTS) all the way to monster fall kings (RR 86 HC), and even includes a fiberglass plug rod for outstanding performance (RR 76 MHC). Upgraded from tip to butt, new Rogue River Specials sport a stainless-framed zirconia ring guide system, blank-through reel seats on casting models and composite cork butt caps. Rich emerald green blanks are highlighted with green wraps and gold trim.

NORWEST SPECIAL

All the quintessential salmon and steelhead rods are right here. From the 7'9" backbouncer through the five 8'6" casting and spinning models, you'll find the right rods for steelhead, pinks, sockeye, chum, silvers and kings. Completely redesigned, you'll appreciate the increased number of guides and the quality of the stainless steel frames and zirconia rings. Blank-through reel seats are standard on all casting models, along with composite cork butt caps throughout. All Norwest Specials are sharply dressed on deep blue blanks with contrasting blue and silver wraps.

CLASSIC GLASS SERIES

These rods are for the plug pullers, backtrollers, herring trollers and down-rigger anglers that excel on the water by keeping it simple. The premise behind moderate action glass rods is simple: if you allow a fish to get a firm hold of your bait or lure, the result will be a solid hook-up. And most often it really is just that simple. New to the series is the CG 70 DR, the ultimate ultra-light downrigger rod for Kokanee salmon, along with the CG 86 MHS, the first spinning rod in the line-up. Traditional styling makes these rods all-around winners.

PROLONG THE LIFE AND PERFORMANCE OF YOUR LAMIGLAS ROD.

Lamiglas fishing rods are built with the finest materials available and constructed to exacting standards. Our expectations of every rod are as high as those anglers who fish with them. With some common sense and careful handling, your Lamiglas rod will offer a lifetime of exceptional experiences.

LINE RATINGS

The individual characteristics built into each and every Lamiglas rod highlight the rods intended use. As a part of that, the strength and flex of the blank is balanced to the recommended line ratings. A Lamiglas rod is rated so that when the rod is held at a 45-degree angle or less, line within the rating will break before the rod does. Angles greater than 45-degrees transfer undue stress to the tip section of the rod (practically eliminating the ability of the stronger butt section to carry any load), and in extreme cases can result in rod failure with as little as 2 pounds of directed pressure. It is not only proper use that requires a rod angle of 45-degrees or less, but this is also the area where you'll find the greatest power from the rod and best control over the fish.

LURE RATINGS

Lure ratings provide a range of lure weights in which optimum performance is achieved. Using a lure that is lighter than the listed weight will not properly load the rod, casting distance and sensitivity will suffer. Using a lure that is heavier than the listed weight will overpower the rod. Again, distance and sensitivity will suffer, along with the compounded problem of overstressing the blank fibers.

REEL INSTALLATION AND REMOVAL

Prior to reel installation, lubricate the reel foot and the threads of the reel seat. Insert the reel and tighten the lock-nut finger tight. Shake the reel side-to-side and tighten again. Repeat the process until the reel no longer moves. Graphite reel seats should never be over-tightened and pliers should never be used in the process. Over extended periods, the reel seat hood may seize to the reel foot. Slowly loosen the reel nut. If it starts to seize, tap the hood. This will break loose the deposits that have built up over time. Continue to loosen the nut. If you do not tap the hood loose, you may separate the hood from the nut.

TRANSPORTATION

The key to rod transportation is eliminating sharp impact to the blank. The best place for a rod to travel is inside a protective tube. If not carried in a tube, the rods should not be left to bounce against other rods or terminal rigging (weights, heavy swivels, lures, etc.) At vehicle travel speed, sharp impacts from these items can fracture the rod blanks. The best way to transport multi-piece rods is with rubber bands holding the sections together. Always affix the sections tip-to-tip and butt-to-butt. This keeps the delicate tip from being crushed against the uneven and much larger handle. Also, do not use hair bands with a metal connecting clip on rods as the metal clip can scratch, or worse, fracture the blank.

STORAGE

Store rods in either the vertical or horizontal position. If leaned in a corner, a set or bow in the rod can occur over time. Never leave your rods where critters can get to them. Scents, salt from perspiration and other biologic contaminants are a sure fire attraction to undesirables.

CLEANING THE ROD BLANK

The best cleaner we have found for cleaning the blank and handle is a mixture of one part isopropyl alcohol and four parts warm water, along with a good dose of liquid dish soap. Using a soft sponge, scrub the blank and handle, then rinse. Dabbing problem areas with the soap mix for a few minutes before scrubbing can soften heavy build-up. Once you have the rod clean, a coat of wax will simplify the maintenance of a beautiful finish. We recommend any of the carnuba based car waxes. Fish scales and many types of bait will not stick to a waxed rod and makes cleaning a snap. If you are fishing everyday, a coat of wax every other week should suffice.

CLEANING GUIDES AND REEL SEATS

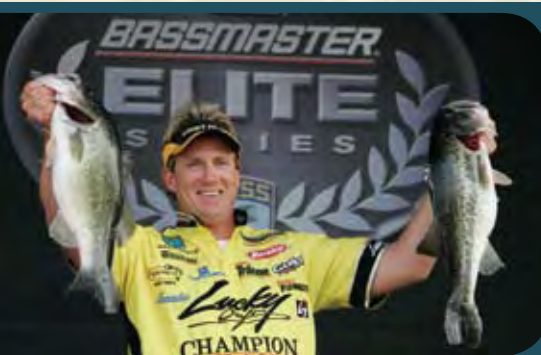

As strange as it may sound, the use of a toothbrush and toothpaste will remove the stubborn deposits on rod guides and reel seats. After cleaning the reel seats coat with any light oil. This method works on all reel seats.

“ANGLER OF THE YEAR” TROPHY IN ONE HAND. LAMIGLAS ROD IN THE OTHER. COINCIDENCE?

In 2007, Skeet Reese landed the big one; the Bassmasters Elite Series “Angler of the Year” award. As the top professional on tour, Skeet Reese has a firm grasp on what it takes to win, and what it takes to build rods that rise to the occasion. For over 10 years, Reese has been intimately involved with designing his own Lamiglas series, as well as countless other rods in our line-up. With a tactically precise blend of sensitivity, strength and feather-light feel, Lamiglas produces dozens of models expressly designed for your style of fishing. Whether

it’s a long, precise pitch of a ¼ ounce jig along a dock, flippin’ through heavy cover, launching a crankbait into the next zip code or feeling every contour of the bottom with a worm rig Lamiglas has a rod to match. If it’s versatility you’re after then Lamiglas is your choice too. If you’re looking for one rod that does it all well, Lamiglas builds over a dozen that are incredibly nimble and completely capable of throwing just about everything you own. We know you’re serious about your bass fishing...so, if you’ve got a point to make ---drive it home with Lamiglas.

SKREET REESE

JIMMY REESE

BILL SIEMANTEL

XMG 50 SERIES

Feel the bite, and respond with speed and power: the guiding principles of the XMG 50 series. Every aspect has been optimized to provide unrivaled sensitivity, immediate response and uncompromising performance. High-modulus extra-fast action blanks combine with woven graphite handles, exposed-blank reel seats and titanium guides to accomplish the task. As the competitive rewards of bass fishing grow, XMG 50 rods aren't simply fishing rods, they're investments.

SKREET REESE SERIES

The 2007 BASS Angler of the Year relies upon much more than incredible fundamentals to accomplish his goals. Skeet always refines the details of presentations to offer a competitive advantage. Fortunately, this professional's technical rod designs are available to everyone. From his insanely popular yellow crankbait rods on which he fishes “everything with a treble hook”, to the Punchin' Rod, to his longer Super Drop Shot rod, you can tap into the same American-crafted performance that has accompanied Skeet Reese to an iconic position on the national tournament level.

CERTIFIED PRO

These rods have accompanied Skeet Reese, Jimmy Reese, Robert Lee, Bill Siemantel and Kent Brown to the winner's podiums. From the lightest drop shot rigs to the largest swim baits, the technically precise line-up enhances the ability of all anglers. Remarkably small-diameter blanks retain uncompromising strength and sensitivity. You fish with more precision, for a longer period thanks to fatigue-reducing balance. The blanks feature a hand-polished graphite finish and are outfitted with Fuji Alconite Concept guides, exposed-blank reel seats on casting models and premium cork grips.

DON IOVINO SIGNATURE SERIES

Often referred to as the “Godfather” of finesse fishing, Don Iovino Signature rods include four “3+” rods. The term “3+” comes from Iovino's principle that each of these rods will excel in more than 3 applications each. The lighter model is the more “pure” of these finesse rods, and Iovino's choice for Gitzit's, drop shot, small crankbaits and topwater baits like Splash-Its. The heavier model is targeted at 1/4- to 3/8-ounce presentations including jigs, heavier drop shot rigs, small spinner baits and lightweight pitching.

IN A WORLD OF POSSIBILITIES, IT ALL COMES DOWN TO ONE NAME:

Lamiglas

IF WE REMOVED ALL THE SENSITIVITY, WE COULD MAKE THE TIP TOUCH THE HANDLE TOO.

Whether you're casting something that looks like a household pet for muskie, detecting the breath-like bite of a deepwater walleye or plowing the lake for trout, Lamiglas has been there...thousands of times! There's a remarkable world of fishing to enjoy and we've learned most of it right along with our customers. Like lobbing chicken parts for catfish or trolling a tiny spoon across the vast expanse of a highland reservoir. It's taken decades of painstaking development but the proof comes

- MUSKIE
- G1000 GRAPHITE SPINNING
- WALLEYE
- G200 GRAPHITE SPIN AND CAST
- ULTRA LIGHT CASTING/TROLLING/SPINNING

from Lamiglas owners, tens of thousands of enthusiastic anglers who choose Lamiglas because they get more from their time on-the-water. It's the product of the Lamiglas formula, balanced tried-and-true actions and premium materials that transform the sport of fishing into a wonderland of fishing opportunity. So take your pick, muskie, walleye, trout, catfish, shad or panfish, you won't be disappointed but you'll be enlightened --- one fish at a time.

MUSKIE

Lamiglas Muskie rods are constructed of our proprietary G1000 graphite and feature polished blanks, Fuji components and foam fighting butts. For 2009, we've introduced the LGM 90 H, a single composite model for the trolling angler. Its 9-foot length allows for a wide trolling spread and it's powerful build scoffs at the most punishing strikes.

G1000 GRAPHITE SPINNING

In the world of high-performance fishing rods there are few that can rival the G1000 series. With a natural hand-polished graphite finish, cushioned reel seats, and Fuji aluminum oxide guide system, this series exudes the confidence of American manufacturing. Trout, bass, panfish, walleye, carp, catfish, pike - the opportunities for the G1000 series are as vast as your pride of ownership.

*There are many exceptionally versatile rods here,
but that's not anything your spouse
really needs to know.*

ULTRA LIGHT CASTING/ TROLLING/SPINNING

These ultra-light, progressive action rods will maximize your enjoyment of kokanee and trout, along with your hook-to-land ratio. Drawn from a number of rod families, MBC and MBS models are G200 rods, the GC 792 UL is a G1000 model and the FC 76 UL and CG 70 DR are fiberglass rods that are simply the best kokanee sticks ever made.

SOME LOOK AT THE SURF AND SEE WAVES. WE SEE SPOON WATER, POPPER WATER & BAIT WATER.

Okay so we're obsessive. Instead of hugging the wife and remarking how beautiful the sunrise is, we're strapped in waders, gaze fixated on breaking baitfish. What lure or bait? What size? No time for sight-seeing, these opportunities only last so long. We talk about waves, but more so about rips, eddy-lines, points, and buckets. And in each instance compose the perfect tool for evoking a savage response from the

fish that inhabit the spot. If time were unlimited we wouldn't be so picky. We'd build 10 or 11 basic rods and pat ourselves on the back. But we consider every moment on the water precious, and whether it's the longest cast, perfect lure action, or both, the right rod is inseparable from the quality of the experience. This year, our vision of perfection encompasses more than 50 rods.

SUPER SURF SERIES

The first surf rod line to embrace high-strength braided lines, Super Surf rods combine superior casting performance with brute strength...within a small diameter rod that's light enough to comfortably fish all day long. The blanks are constructed from a proprietary blend of intermediate and high modulus graphite, and outfitted with the finest components available, including over- and under-wraps on the Fuji Alconite Concept guides. Taken as a whole, the Super Surf line-up represents the finest group of surf rods ever constructed.

Ron Arra PRO SURF

Designed with guidance from five-time national distance casting champion, professional casting instructor and best-selling author Ron Arra, these fast-action surf rods are a lure fisherman's dream, producing incredible power, distance and control. Unique handle designs maximize grip and comfort. Fuji aluminum oxide guides and reel seats perfect the tools. For 2009 we've added the XSRA 1205-2 for those who appreciate the ease of transporting a 2-piece rod.

GRAPHITE SURF & JETTY

Pick any beach, any pier, any jetty anywhere around the world and chances are there are fish to be caught...if you have the right equipment. These super-durable graphite rods are ideal for slick rocky shores and pounding waves. Soft tips aid in the right presentation, and the rods have plenty of power to put the brakes on when fish head for the rocks. The distinctive high-gloss, clear-coated design with black wraps and gold accents makes a bold statement. Final touches include Fuji guides, Fuji graphite reel seats and attractive, functional EVA and cork-tape handles.

TRI-FLEX GRAPHITE SURF

The growth of Lamiglas Tri-Flex rods has been astounding, and our proprietary tri-wall construction technology is the main reason why. We use a lightweight graphite base, add a fiberglass overwrap, then a second graphite reinforcement through the butt and mid section. The result is a superior blank with incredible strength and durability, and an extremely fast recovery rate. Smooth. Fast. Light. Components include Fuji reel seats, Fuji aluminum oxide guides, cork tape grips, black wraps with metallic green trim.

SURF KING SERIES

From the leader in design and performance on the water comes a whole new challenge for our competitors, the Lamiglas Surf King series. These six rods represent a value unequalled in surf rods. Premium graphite blanks, the finest Lamiglas tapers, aluminum oxide guides and cork tape grips, finished with our black and silver wraps (which, by the way, look great in trophy photos). Be prepared to lug loads of fish up the beach, along with the extra weight of cash in your pocket. Lamiglas one year limited warranty.

BIG BANG HEAVER

In the Pacific Northwest, bank fishing for sturgeon is a way of life. To be successful, you need to be comfortable casting copious amounts of lead into powerful river currents and dealing with demanding solid rock river environments. For decades we've constructed the blanks custom builders have relied upon, and this year, we're releasing two fiberglass models as a production series. Both are 13'10" long in your choice of 1- or 2-piece construction. Handles are rope-wrapped for long-wearing durability. Components are by Fuji for a high-quality finish.

sive move, and rejoice in the victory of hard-fought battles.

At two dollar a gallon fuel, there's enough trips available to make due with any rod. Quantity over quality. But it's different now. We'll all pick our days smarter, prepare better, and execute like professionals. Whoever said getting there is half the fun needs an examination. It's being there, in the moment and dialed-in, that makes the effort worthwhile.

TRI-FLEX GRAPHITE OFFSHORE

The fact that these rods will spend most of their working life in a rod holder is certainly an injustice to their design. In the hand, Tri-Flex Graphite Offshore rods become the most effortless fishing tools you'll ever use and also the most indestructible. Very light and agile, the rods provide a smooth, unrelenting power stroke that makes quick work of offshore species. Conventional models feature Fuji Silicon Nitride guides. Power Oval models feature Fuji Power Oval guides with Silicon Carbide rings and AFTCO models feature AFTCO roller guides.

TROPIC PRO JIGGING AND POPPING

We're very proud of our relationship with Nicola Zingarelli, global-fisherman and purveyor of the website Caranx.net. Over the past five years Nicola has been instrumental to the design of the Tropic Pro Jigging and Popping Rods. As a group, they represent a precision fishing system that will match any challenge presented by tropical waters worldwide. CJ and SJ models are jigging rods, while the SP models are popping rods. If you're wondering about the preponderance of spinning rods, it's because effectively fishing these techniques requires speed, and no reel is as fast and precise as the large spinning models. Also notice the Max Drag rating, perhaps the most important element on determining which models you may need.

BIG FISH

Big Fish rods are the day-in and day-out offshore performers every angler needs. Their smooth, balanced designs are focused on 30- to 100-pound line classes, placing them in the heart of halibut, tuna, shark, large striper and wreck fisheries. Constructed with the finest materials and components, including aluminum reel seats, slick butts and roller tip where necessary, each model you fish will become an essential rod in your arsenal.

SARDINA SERIES

Inspired by our passion for the Gulf Stream, targeting shrimp boats and oil rigs in the Gulf of Mexico, and the bounty of the Pacific's ports from California to Costa Rica, the Sardina series will add Lamiglas quality to your saltwater fishing. Featuring light, durable and powerful fiberglass blanks and components built to take on the harshest saltwater environments, we've designed a complete selection of fast-action rods for trolling, jigging, chunking, throwing "iron" and live bait. From panga to cruiser, sportfisher to charter, single day or long-range, the Sardina series will make the most of every strike.

You're looking at the not-so secret weapons of mass destruction.

TRI-FLEX GRAPHITE SALTWATER

Simplistically, Tri-Flex stands for our proprietary blank designs in which three layers of material, each carefully chosen to provide specific characteristics, are integrated at specific intervals within each blank. More to the point, these rods contain a combination of lightweight power, durability, sensitivity and structural integrity that you'll go gaga over. From stripers and fluke to tarpon and tuna, the only thing Tri-Flex Graphite rods don't offer is limitations. Fish one, and you'll gain a whole new understanding of what a rod can be.

INDIAN RIVER

The all-new Indian River Series is the result of an outstanding relationship between Lamiglas and Captains Jim Ross and Russ Rivers of Indian River Fishing Academy in Florida. Their desire was the creation of the ultimate light tackle rods for fishing artificial lures...and Lamiglas delivered. According to Captain Ross, "The Indian River rods are more sensitive than anything I've ever fished with." It's no surprise to us. The rods capitalize on their fast action, high modulus blank construction by eliminating the fore grip and utilizing a Texalium rear grip and exposed-blank reel seat to transmit every bump and vibration from the business end of the line. In stained waters, the captains have reported they can feel the push of water that precedes the strike as the fish rushes the bait. Angler recognition of the subtleties involved in presentations has increased their success, while the joy of fishing such precision rods has increased the overall quality of the fishing experience immensely.

TEXALIUM INSHORE

Texalium is an aluminum impregnated fiber. Compared to graphite, it's more durable. Compared to fiberglass, it's lighter. As the butt section and handle material in lightweight, hi-power inshore rods, it's perfect. Lamiglas Texalium Inshore rods incorporate both a layer of Texalium to reinforce the butt sections of the rods for heavy pulling, along with Texalium tube rear grips to provide a lightweight, no-slip surface that will last decades longer than any other material. Outfitted with Fuji guides and reel seats, EVA fore grip and butt cap, Lamiglas Texalium Inshore rods put every technological advantage on the angler's side when battling large fish.

CERTIFIED PRO POPPIN'

While offshore waters often receive the spotlight, epic battles in back bays and on the flats are far more numerous, especially with a Certified Pro Poppin' rod in hand. Crisp, accurate, and incredibly responsive, you'll find the perfect rods for small poppers, jigs, spoons and live bait. All Certified Pro Poppin' rods feature polished black blanks and Fuji Alconite Concept guides finished with black wraps and silver inlays, along with Fuji exposed-blank reel seats on casting models.

*Rod selection tip: highlight the rods you want...
leave catalog open on kitchen table one week
prior to Father's Day.*

KAYAK SERIES

Kayak Series rods offer specialized features for fishing from a specialized craft. The extra length will clear paddles when trolling and makes it easy to stay with circling fish as they pass the bow or stern. Both front and rear grips have been designed to position the rod comfortably to fight fish from a sitting position. Eight models will cover the spectrum (any heavier and you're just getting towed), and the thought behind the designs will make them instant favorites.

TRAVEL SERIES

Your clothes may not make your final destination, but your rods will. Ten near-shore and in-shore travel models including a 10-foot, four-piece surf rod will cover the spectrum from 8- to 30-lb line.

LIMITED LIFETIME WARRANTY. THE ONLY FEATURE YOU'LL PROBABLY NEVER NEED.

This Lamiglas rod is warranted against defects in materials and workmanship for the lifetime of the original purchaser. If your rod fails, send it in a disposable container, prepaid and insured, with dated proof of purchase to:

Lamiglas Warranty Service,
1400 Atlantic Avenue,
Woodland, WA 98674

Please include a brief message explaining the problem with the rod, your return address, daytime phone number, and a check or money order in the amount of \$20.00 in U.S. funds for return shipping and handling. If the return shipping length is over 9' and/or if the destination is other than the United States or Canada, the actual return shipping cost will be assessed. If the problem is due to a defect in materials or workmanship, the rod will be repaired or replaced to you as quickly as possible. If the problem is due to an unfortunate accident, misuse, alteration or normal wear and tear, we will advise you of the cost of the repair or replacement and await your approval prior to proceeding. Please allow 10 working days for processing.

This warranty is limited to the repair or replacement of the rod and does not cover consequential damages due to the failure of the rod unless they are specifically included under various state laws. Note: Lamiglas Dealers are not authorized to make warranty decisions. In order for your rod to obtain the proper warranty inspection and determination, the damaged rod must be sent to Lamiglas Warranty Service.

* Selected value-rods offer a one-year limited warranty.

LAMIGLAS DRY TOP
Neoprene seals on arms and neck. Internal elastic body seal with adjustable neoprene external seal.
M, L, XL,
\$270.00
(Available in XXL & XXXL at no extra cost)

KENAI GUIDE JACKET
Durable 3 layer laminated nylon shell. Waterproof, breathable and fully seam sealed.
Olive
M, L, XL,
With or without salmon icon.
\$225.00
XXL & XXXL add \$15.00

STORMBLOC FLEECE
High performance, windproof, water resistant, non-piling fleece keeps the weather on the outside.
Sage/Black, Navy/Black
M, L, XL,
With or without salmon icon.
\$100.00
XXL add \$6.00
XXXL add \$8.00

REVERSIBLE VEST
Water repellent, wind resistant Drift Tech™ nylon reversible to non-piling Grizzly® fleece. Heavy-duty zipper, side pockets. Black/Charcoal
M, L, XL,
With or without salmon icon.
\$58.00
XXL add \$6.00
XXXL add \$9.00

LIGHT WINDSHIRT
All-Seasons Microfiber shell, nylon lined. Water repellent. Wind resistant. V-neck.
Navy
M, L, XL,
With or without salmon icon.
\$60.00
XXL add \$2.00
XXXL add \$4.00

TSUNAMI ADVENTURE SHIRT
100% cotton field cloth, lock 'n loop closure pockets. Breathable back with polyester mesh liner.
Light Aqua, Khaki
M, L, XL, XXL
\$38.00

FLATS II SHIRT
100% Cool Tek, quick-dry micro-nylon. Vertical back vents and breathable mesh liner. Adjustable rod loop.
Sage, Fossil, Cornsilk.
M, L, XL, XXL
\$42.00

POLY-DRI MOCK TEE
Poly-Dri's uniquely textured microfiber knit fabric wicks perspiration rapidly away from the skin. Supreme comfort under all conditions.
White
M, L, XL,
With or without salmon icon.
\$40.00
XXL add \$3.00
XXXL add \$5.00

LAMIGLAS T-SHIRTS
100% Cotton short sleeve T-shirt. Logo on chest.
Ash, Blue, White, Black
M, L, XL,
\$12.00
XXL add \$1.00

SWEATSHIRT
50/50 medium weight, 1/4 zip, long sleeve sweatshirt.
Navy Blue
M, L, XL,
\$45.00
XXL add \$3.00

HOODED SWEATSHIRT
80/20 Cotton/Poly, Heavyweight hooded sweatshirt.
Charcoal Gray
M, L, XL,
\$50.00
XXL add \$4.00

LONG-SLEEVE T-SHIRT
90% cotton, 10% Polyester. Preshrunk. Logo on chest. Great for layering.
Sports Gray
M, L, XL,
\$25.00
XXL add \$3.00
With or without Salmon icon.

HARBOR UNSTRUCTURED CAPS
Six-panel, unstructured, heavyweight twill crown and pre-curved visor. Washed. Adjustable back clasp.
Sage, Navy blue, Red, Camo, With or without Salmon icon.
\$15.00

LAMIGLAS SIGNATURE CAPS
100% cotton with Velcro® closure.
Red, Navy, White, Black, Green
\$12.00

SIERRA HAT
Our best quality, best looking cap. Structured, two-tone sandwich visor, brushed twill visor and crown. Black/Silver
With or without Salmon icon.
\$20.00

Salmon Icon available on some items as noted. (No Extra Charge)

GRIZZLY FLEECE STOCKING CAP
Stocking Cap
Black
\$20.00

OILSKIN CAPS
Six-panel, unstructured oil skin cap with pre-curved visor and metal closure.
Taupe, Brown
\$20.00

ROD RACK
All-wood, free-standing large capacity, rod racks.
32-rod capacity
\$240.00

Pegboard, wall mounted rack.
12-rod capacity
\$43.00

ROD MATERIALS

TITANIUM/IM700 THE REVOLUTION STRENGTHENS.

Lamiglas integrated Titanium with IM700 graphite and revolutionized sensitivity forever. These rods are light in weight, high in strength, unparalleled in durability and more sensitive than any other rod ever! The properties of Titanium also include excellent fatigue resistance, positive dampening characteristics and superior corrosion resistance. IM700 graphite is secured to the Titanium with a special aerospace bonding agent creating a rod that not only transmits sensitivity more efficiently but also amplifies the most subtle sensations. There are no finer rods for the serious fishing enthusiast.

XMG 50 GRAPHITE THE NEWEST "SUPER" GRAPHITE.

This super graphite allows us to make smaller-diameter blanks with faster actions. The XMG 50 utilizes a blend of high-modulus graphite fibers to create a perfectly balanced, lightweight blank that is more responsive and more sensitive than anything on the market today. We use this material in our XMG 50 Fly Rods, Appalachian Fly Rods, XMG 50 Salmon/Steelhead series and XMG 50 Bass series.

IM700 GRAPHITE ADVANCED ENGINEERING AND DESIGN.

IM700 is one of Lamiglas' own specially formulated rod blank materials. This third-generation graphite is made of high-tensile strength fiber and is used exclusively in the manufacturing of high-quality fishing rod blanks. IM700, coupled with our proprietary resin formulation, produces the ultimate in sensitivity, power, strength and durability. IM700 rods come in a rich polished natural graphite finish with the highest-quality components.

CERTIFIED PRO GRAPHITE REMARKABLY LIGHTER AND STRONGER.

Our broadest selection of rods. The Certified Pro series employ an all-new smaller-diameter blank design with an improved resin system to produce a 15 percent lighter-weight rod than comparable graphites on the market. These rods exhibit properties found only in second- and third-generation graphites. Superior performance at a great price!

G1000 GRAPHITE A LAMIGLAS EXCLUSIVE.

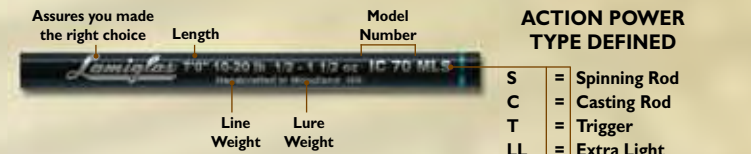

This is our most distinguished and versatile material. We employ first generation graphite coupled with a special resin formula to reduce overall weight while maintaining exceptional flexibility. G1000 graphite is used in a broad selection of rods with a variety of actions, line ratings and specialty characteristics to pursue an endless list of species.

FIBERGLASS E-GLASS EARNED ITS PLACE IN HISTORY.

This material is structurally the most durable of the fiberglass family. The glass properties are expressly matched to each unique application—such as cranking rods for bass; mooching and down-rigger rods for salmon, shark, tuna, stripers and king mackerel. We use the same epoxy resins and technology in these rods as we do in our graphite rods to offer you lighter weight and improved sensitivity over other manufacturers' fiberglass rods.

TRI-FLEX EXCLUSIVE GRAPHITE/FIBERGLASS CONSTRUCTION.

These rods encompass the use of a graphite base and fiberglass overwrap, then are reinforced with graphite through the butt and mid sections. You get the best of both worlds...the sensitivity of graphite and the durability of fiberglass. We refer to this as "tri-wall" construction. The tips are lightning fast and softer so they cast live bait as well as throw heavy iron, while the graphite reinforced portion of the rod gives tremendous fish-fighting control and lifting power.

TO SELECT THE RIGHT LAMIGLAS ROD, PAY CLOSE ATTENTION TO THE DETAILS. (WE DO.)

Surprisingly, there is no consistent, scientific methodology that all rod manufacturers use to rate their rods. Some use computers. Others use complex graphs. We use fish...along with more than 55 years of experience. Each rating is a collective recommendation of the hi-low thresholds in which the rod is designed to optimize performance. The variable factors for each rod, lure weight, line weight, action, and power are clearly listed throughout this catalog, as well as labeled on the rods just above the handle. (Not all factors are appropriate for all rods. For example, fly rods will not list a "lure weight.")

- S = Spinning Rod
- C = Casting Rod
- T = Trigger
- LL = Extra Light
- UL = Ultra Light
- L = Light
- M = Medium
- H = Heavy
- XH = Extra Heavy
- J = Jig
- P = Plug
- B = Bouncer
- + = Telescopic Handle
- PO = Power Oval Guides
- CP = Center Pin
- TN = Tennessee Handle
- W = Wire Line Guides

WE'LL GLADLY BE HELD ACCOUNTABLE FOR OUR ACTIONS.

"Action" is the measurement of deflection or flex the rod exhibits under load, and more importantly, where that flex occurs along the length of the blank. "Extra Fast" actions concentrate more of the flex towards the tip. "Slow" actions distribute the flex progressively throughout the entire blank. Because there is no single, scientifically accurate measurement system accepted by the entire industry, not all actions are exactly alike. Lamiglas rod actions are dictated by a variety of factors: the intended application, targeted prey, lure weight, line weight and, quite honestly, what the professionals on our pro-staff recommend.

POWER. HOW MUCH DO YOU NEED?

Applicable to our salmon, steelhead, saltwater and bass rods, "power" is defined by the amount of pressure required to flex the blank. These rods are designed to optimally manage a specific range of lure and line weights. The heavier the line and lure, the more power you'll need to cast, fight and pull effectively. The lighter the line and lure, the less power you'll need.

WEIGHT. LOSE AS MUCH AS POSSIBLE.

A rod that feels heavier each time you cast eventually slows you down. The type and amount of material used contributes greatest to this factor. Lamiglas selects the lightest material and components for the job, but we resist the temptation to go "too light." All rods can break. (A fact so many other manufacturers want to keep secret.) We design rods that will cast for a lifetime, without ever leaving your arms lifeless.

TAPER. HERE'S THE SKINNY.

The measurement of the change in the diameter of the blank from tip to butt is known as taper. Many use the term synonymously with "action." But actually, taper is one of the factors which rod builders use to achieve the desired action. An aggressive taper at the tip creates a faster action. A straight taper (one which changes at an equal rate throughout the blank) creates a moderate or slower action.
