FISHMASTER S-R series	40

BALL BEARING

Ball bearings are placed at critical points to ensure the best performance.

RUST RESISTANT BEARING (RRB)

TiCA Rust Resistant Bearings (RRB) are the next generation in the protection of ball bearings from corrosion and oxidization.

INSTANT ANTI-REVERSE

Instant anti-reverse designed for solid hook setting uses one-way clutch impact-absorbent ball bearing.

COMPUTER BALANCED

Computer designed balanced rotor using the most up-to-date computer testing technology.

ANTI-TWIST ROTOR

Unique anti-twist rotor resolves the problem of line twist commonly found in spinning reels.

INTELLIGENT OSCILLATING SYSTEM

Intelligent Oscillating System (I/O) is TiCA's latest design for superior line winding system. It simplified the complexities of the even line winding function of the worm shaft system and combined it with the durability and reliability of the old oscillating gear system.

CRANK OSCILLATING SYSTEM

The new TiCA developed Crank Oscillating System winds the line evenly. This system gives long distance casting ability and longer line use due to lesser line friction.

WORM SHAFT SYSTEM

Precision-cut worm shaft system significantly improves smoothness and even line winding.

CYBERNETIC FRAME (CF)

The Cybernetic Integrated Frame System (CFS) is a new spinning reel body construction developed by TiCA's talented team of design engineers. This uniquely designed technological breakthrough provides anglers with a reel that has superior functional features and performance.

ALUMINUM BODY

The body frame is made of lightweight but very strong aluminum alloy materials.

ALUMINUM ROTOR

The aluminum alloy rotor has been specially engineered to provide superior strength.

HIT AND RUN SYSTEM

The Hit and Run System is a perfect tool for live baiting by adjusting the rear drag to allow the live bait to swim freely. A predetermined drag setting can be easily switched back with just a quick turn of the handle or a flip of a switch to set the hook.

CENTRIFUGAL BRAKE SYSTEM

Centrifugal brake system controls the turning rate of the spool by adding or reducing the attached brake collars to the spool.

STAR DRAG

The new design of star-shaped lever drag control system provides much more convenient and sensitive features to achieve the desirable drag performance by simply operating with one finger only.

QUICK REMOVABLE SIDEPLATE

Easy to remove sideplate for changing or cleaning the spools.

MULTI ANTI-REVERSE

Multi anti-reverse system is the design of multi-stops to spread the point of impact arising from violent hook setting. This feature reduces the timing of anti-reverse action and extends the lifespan of the reel.

DUAL DRAG SYSTEM

Fishing offshore needs a very strong and dependable drag. The drag washers must withstand the heat and pressure of fighting big fish. TiCA's dual drag system is developed with very reliable graphite washers.

LEVER DRAG

Quick drag adjustment—conveniently adjust the drag set position by pushing the lever up or down. TiCA's lever drag surface is much larger than any lever drag reels of similar size.

2 SPEED SYSTEM

The low gear provides maximum cranking power while high gear allows fast retrieve, both of which are necessary for fighting with trophy fish.

WATER PROOF DEVICE

TiCA has introduced rubber seals on the drag knobs and clutch bearings to stop corrosive saltwater elements from infiltrating into the inner parts of the reel.

NEW TALISMAN

TG Series

RRB-Rust Resistant Bearing RB-Roller Bearing

Model No.	Gear Ratio	Weight (OZ)	Bearings		Line Retrieved Handle Turn	Line Capacity (lb-yds)	
TG8000	5.4	24.7	14RRB+1RB		46/37in	20-300 25-250 30-210	
Body	Body Cover	Rotor	Spool	CF System	Anti-Twist Rotor	Worm Shaft System	Reel Bag
AL	AL	AL	FORGED AL	SUS	■	■	■

◆ **Aluminum Body & Aluminum Rotor**
Lightweight super-strong Aluminum alloy, with precise machining and special polishing treatment process.

◆ **Stainless Drive Gear & Brass Pinion Gear**
Computer designed gears, extra strong teeth and perfect gear alignment for prolonged life and smoothness.

◆ **Forged Aluminium Alloy Spool**
Lightweight, yet super-strong spool. Forged aluminium alloy, CNC machined, specially treated for rust resistance.

◆ **Power Handle Knob**
Ergonomically designed Aluminium handle knob. Soft touch EVA with slip resistant grooves. Angled at a "wrist friendly" angle to make for easy retrieving for effortless.

◆ **Instant Anti-reverse**
Fitted with a one-way clutch anti reverse-roller bearing.

◆ **Worm Shaft System**
Precision-cut worm shaft system significantly improves smoothness and even line winding.

◆ **Manual Bail System**
Solves the premature bail flipping during a cast. Allows rotor not to reverse, flip automatically during casting.

◆ **Fine Tune Drag**
Fitted with micronic finite drag adjustment via an Stainless Steel Drag Knob.

◆ **Balanced Drag**
Drag works from both sides of spool, providing smoother drag and better rotor stability under pressure.

◆ **Water Resistance System**
Many areas in this reel are protected by gaskets water resistance system. These built-in gasket water resistance area will protect working parts from salt and corrosion, prolonging the life of the reel. (see parts breakdown for water resistance area).

NEW

- ◆ 14pcs SUS ball bearings positioned in key areas.
- ◆ Strong, durable aluminium alloy frame/body cover/rotor/bail arm.
- ◆ Forged aluminum alloy spool with carbon lip.
- ◆ Hardened main shaft to increase strength.
- ◆ Rigid stainless pinion and drive gear.
- ◆ Power handle knob.
- ◆ CNC machined 80mm aluminium alloy handle.
- ◆ One-way clutch instant anti-reverse roller bearing.
- ◆ Special gasket for drag knob, rotor and main shaft, body cover and handle at frame.
- ◆ Worm shaft oscillating system.
- ◆ Special anti-twist line roller.
- ◆ Right/ left interchangeable handle.
- ◆ H Q drag system.

AL	GR	GR	AL	■	■	■	■

TICA's Intelligent Oscillation System uses a secondary cam to provide more efficiency and strength to the GA Gainer gearing. This system also allows for more even line laying, resulting in greater casting distance.

The TICA Cybernetic Frame is incredibly strong and durable, constructed from aircraft grade aluminium, rigid graphite and fibre resins.

The Super thin body design avoids any unused space with the reel internals, creating an extremely strong mechanical system yet remaining ultra lightweight.

Fibre resin twin sideplates make it easy to service the reels, whilst the internal "tracking" system of the main shaft increases the power and strength of the reel overall, and allows for much less reel "wobble" than standard fishing reel system.

- ◆ 8 sealed precision stainless steel rust resistant ball bearings.
- ◆ Intelligent Oscillating system (I/O).
- ◆ Aluminium alloy body and spool.
- ◆ One-way clutch instant anti-reverse roller bearing.
- ◆ Cybernetic Frame system (CF).
- ◆ Balanced rotor.
- ◆ Soft-touch handle knob.

QUICK REMOVE SIDEPLATE

- ◆ 3 rust resistant ball bearings and 2 SUS ball bearings.
- ◆ Forged aluminum alloy spool.
- ◆ One piece aluminum frame CNC machined.
- ◆ Instant anti-reverse.
- ◆ Centrifugal brake system.
- ◆ Star drag.
- ◆ Simple spool removal.
- ◆ Large ultra wear-resisting line guide.
- ◆ Soft-touch handle knob & clutch bar.

ALUMINUM BODY

All major parts including the frame are made of aluminum alloy using state of the art CNC machining. This ensures precision and reliability. The use of aluminum alloy provides strength and durability as well as being lightweight.

CENTRIFUGAL BRAKE SYSTEM

Easy and tool-free to remove the side plate for changing or cleaning the spool.

QUICK REMOVABLE SIDEPLATE

Brake collars provide friction to help prevent backlashes. The fewer brake collars used, the longer the cast. A maximum of 6 brake collars can be used and adjusted to the angler's style of casting.

TICA TC³ SURF RODS UGSA (DOLPHIN SURF)

- ◆ Constructed from high modulus TC³ graphite material.
- ◆ Specially designed powerful surf casting rod.
- ◆ High quality FUJI alconite tip top guide and FUJI hardloy ring guides for better heat dissipation.
- ◆ FUJI DPS reel seat.
- ◆ Special TICA sliding foldable hook keeper.
- ◆ Perfect match for TICA DOLPHIN and SCEPTER(GX) series reels.
- ◆ High quality non-slip cork tape handle.
- ◆ Fast Action TC3 graphite surf rods have futures that are only available on higher end rods.
- ◆ Their lightweight and sensitivity lead to all day comfort.
- ◆ Custom diamond wraps are hand done in TICA's state of the art facility.
