## SPECTRON<sup>®</sup> BLACKSPOT - "SUPPLE SUPERBRAID"

Why is Cortland's Spectron considered one of the best Super Braids in the industry? Our braiding technicians have combined specific critical elements to maintain the optimum number of "picks" per inch for this high performance Spectra<sup>®</sup> fibers. The result is a time-tested braid that combines low stretch (4%) with small diameter pound/test ratio. The extra limp body is perfect for casting. Its unique slick, hydrophobic nature allows Spectron to slice through the water and come back to you dry!

SPECTRON BLACK SPOT has won its place as THE hands down favorite trolling and vertical jigging line. Need to pull a big grouper away from a wreck, see the hook on a cod 200 feet down, drag a flathead out of his lair or put the "boots" to a yellow fin? Black Spot's got what you need!

Spectra<sup>®</sup> is a registered trademark of Honeywell

## SUPER BRAID - Targeted Elongation 4%

Spectron Black Spot Break Strength	Avg. Mono Equiv.	Avg. Dia. In.	Avg. Dia. mm	Avg. Picks/In.
35	10	.014	.355	18
50	12	.019	.482	22
65	15	.020	.508	22
80	18	.021	.533	24
100	20	.022	.558	23
130	25	.029	.737	25
200	50	.042	1.06	20
