Devils Lake, North Dakota

HIGH PERFORMANCE

FISHING SHELTERS • ICE AUGERS • CHISELS • ACCESSORIES

It's 2009 and The New Color of Ice Fishing is **RED**.

High Performance. That's been our mantra for decades. Since 1960 Eskimo has designed, engineered, and manufactured high performance into every product. Eskimo ice augers have set the bar for quick starts, high RPM, fast cutting, ergonomic designs and power. From the "best value" Stingray power auger, to the most powerful ice auger in the world, the Shark Z71, Eskimo has your high performance needs covered. For every high performance Eskimo ice auger, there is a demanding ice angler, so it makes sense that we would also be the leader in high performance ice shelters. Eskimo is the only true full line high performance ice auger and shelter manufacturer in the world and we love what we do. We deliver high performance by constantly pushing our design and engineering department to develop new products that exceed your performance needs and expectations.

For 2009 we are excited to introduce our new ESKAPE Hard Water Series of high performance ice shelters. We have spent the past 2 years interviewing ice anglers (just like you) from all over hardwater country and asked a lot of questions about their wants and needs. We listed all the comments, suggestions, issues, recommendations, likes, dislikes, and complaints. We then went to work designing a complete line of high performance ice shelters like the world has never before seen. From the ground (ice) up, we addressed everything on our list, everything you asked for, to put the Eskape Hard Water Series of ice shelters in a league of their own. Ease of use, comfort, durability, portability and unprecedented patent pending features are the corner stones of this truly innovative ice shelter line up. I believe that once you see everything the new Eskape Hard Water Series on pages 8-11 has to offer, your response will be WOW, these truly ARE high performance ice shelters.

Yes, the new color of high performance ice fishing is RED and I am proud and excited to be a part of this revolution on ice. I would like to thank all that helped us these past years in our quest to be the best.

As Always, Good Fishing

A handwritten signature in black ink, reading "Jay Engstrom". The signature is fluid and cursive, with a long horizontal line extending from the end.

Jay Engstrom

www.GetEskimo.com

To continue our effort to deliver a quality customer service experience, we are introducing a new and improved website. Manuals, parts ordering and detailed product information allow you to gather the information you need to make a well informed buying decision. What's even better is you can visit whenever you want 24 hours a day, 7 days a week.

ESKAPE HARD WATER SERIES

For 2009, Eskimo introduces the highest performing ice shelters ever. Features such as QRS - Quick Release System pinch-free pole technology, head the list of high performance updates, exclusive to Eskimo Eskapes. This patent pending feature coupled with an advanced telescoping pole design prevents binding during setup and take-down.

The new adjustable Skylight allows more light in than ever before. The gray interior is non-light absorbing so natural light is magnified, even at night! Or, close the skylight for complete darkness - enhances your view down the hole. Eskape RED HD fabric delivers Rugged, Extreme Durability to muscle the wrath of Mother Nature. See more unprecedented Eskape Hard Water Series features on pages 8-11.

REDNECK CHISELS

Two Chisels in One

The new improved Dual Headed Redneck Bucket Chisel delivers the same advanced chiseling technology as the rest of Eskimo's Redneck Chisels, but you get two tools in one. On one end is a regular chisel head that works great for early ice or reopening frozen holes. The other end is a chisel/hammer head combo to use a hammer motion to break free frozen-in tip-ups or fast chiseling in general. It's small enough to fit in a bucket for easy transport. Check out the entire family of Redneck Chisels by Eskimo on page 6.

Truly High Performance Hard Water Engines

Eskimo's proven high performance Viper Engine continues to lead the market in consistent power and dependable starting. Technically advanced engineering has successfully balanced the speed, power and performance of the Viper Engine. Exhaustive testing and attention to detail, ensures every Viper Engine delivers high performance to the ice at a level never seen before. Simply pull, start and drill and let the ice chips fly!

Dump The Bucket (Seat)

Freedom of movement is yours with our 40/20/40 bench style seating. You can slide from one seat to another without the restrictions of bucket style seats. The extra thick seats and backrest fold up and down for easy access to gear storage.

Air Exchange Under Your Control

Side ventilation openings have interior Velcro flaps to control air flow and the exchange of air from outside. Extra long skirt prevents air drafts under shelter.

Enjoy The View

Clear view windows on all sides for crystal clear visibility. Windows have Velcro flaps for easy interior darkening.

High Performance Blades

The Quantum Blade design continues to lead the industry in cutting speed, cutting control, cutting smoothness and long lasting high performance. Simply put, the most reliable blade design on the market year after year.

Fabric

Rugged, Extreme, Durable...That's what makes Eskimo ice shelter fabric stand up to the worst conditions that Mother Nature throws at you. With an innovative gray interior and multiple windows, natural light is magnified inside your shelter, not absorbed into darkened walls.

QRS-Quick Release System Pinch Free Pole Technology

The new QRS pole technology provides quick snap button release. It's fast, convenient, pinch-free, and you can even activate it with your gloves on. Advanced telescoping poles slide freely, eliminating metal to metal contact within poles during setup and take down, which delivers unmatched high performance on the heavy duty, lightweight aluminum frame work.

Skylight

The New Eskape shelters provide the convenience of a skylight. Light from above, whether it is sun or moon, can filter into the shelter and illuminate the entire shelter. Adjustability allows easy transition from light to dark. A darkened shelter adds extra excitement allowing you to view down your fishing hole with ease.

Air Eskape

The Eskape series has room to breathe, literally. Strategically placed vents allow air to flow in and out of the shelter thus reducing condensation within the shelter while maintaining a comfortable temperature inside.

Extreme Portability

The Eskimo Quickfish ice shelters are number one in portability. Their lightweight design and compact travel size allow the shelter to easily slip into the included backpack. Anglers who want quick reaction to fishing hot spots can up and go within seconds.

HD Fabric

The Heavy Duty version of RED fabric has all the same great features but boasts a Heavy Duty weaved design for even more long lasting durability to stand up to even the coldest conditions and elements. RED HD is offered on the Eskape Hard Water Series for high performance.

Eskimo's Shark Z71 has the power and speed to fly through thick layers of late season ice, even when using a 10" auger!

~Ron Anlauf, Pro Fisherman

"Ice Ripping Power"

SHARK Z71

With a 71cc Viper engine, diagnostic tests prove the Shark overpowers the competition in power output. The Viper engine features a compression release valve, which allows you to pull start your Shark Z71 with ease. Pull. Start. Drill.

- New for 2009, is an easily accessible **toggle switch** for turning your auger on/off.
- Industry leading **71cc High Performance Viper engine** with high torque and RPM.
- **Compression release valve** makes pull starting easier than ever.
- **Extra large recoil handle** lets you start the engine without taking off your gloves or mittens.
- **See through gas tank** allows quick glance at fuel levels.
- **Protective guard** covers muffler to protect from hot areas.
- **Comfort grip handle bar** and throttle control are ergonomically designed for maximum grip and control.
- **Eskimo red powdercoat paint finish** is proven to be the most durable in the industry.
- **Blade protector** included to extend the life of blades and protect you from injury.

Toggle switch makes turning auger on/off even easier.

See-through gas tank

- Drive Gear
- Sealed High-Speed Ball Bearings
- Aluminum Gear Box
- Output Shaft

High Performance Engines and Transmissions found in all Eskimo Ice Augers

50 Years of Cutting Edge Blades

- Exclusive centering ring on Quantum augers regulate how much ice is cut per revolution and makes breakthrough from hardwater to soft water smooth.
- Dual stainless steel Quantum blades and centering point allow for the fastest, most controlled cut available

Part Number	Engine RPM	CC Rating	Weight	Gear Ratio	Auger Length	Auger Diameter	Warranty
Z71Q10	8,000	71 cc	32 lbs	25:1	42"	10"	1 Year Limited

Accessories

Blades: QB10 Extensions: EXT12 & EXT18 Engine Oil: 300400 & 300404 Centering Point: 90129

Eskimo's original Quantum Blade design has been tearing holes through hard water country for almost 50 years.

Billions of holes later, the Quantum Blade design continues to lead the industry in cutting speed, cutting control, cutting smoothness and long lasting, high performance. Check out why Quantum Blades are the premium choice for ice anglers throughout hard water country:

Serrated Cutting Edge With Eskimo High Performance power engines pushing the auger to industry leading RPM's, the serrated cutting edge of Quantum Blades are designed to chip ice away during drilling.

This action allows for a faster and smoother cut but more importantly, it resists from ice build up. Other power augers tend to shave ice into smaller particles that build on the bottom of the auger. After all, you are on the ice to drill holes, not make snow-cones!

Industry's Only Balanced Design The Quantum Blade and auger design offers advanced features for high performance drilling.

The cutting surface is optimized with symmetrical dual blades at one level, which creates the smoothest, most controlled cut available. Other augers try to cut ice at multiple levels that leads to unbalanced slower drilling.

Some designs even try to cut ice with a single blade that has no balance at all and gives you less control.

Eskimo Ice Augers

- Dual stainless steel Quantum blades
- Exclusive centering ring
- Stainless steel centering point

For optimum power, speed and weight, the Shark Z51 from Eskimo gives you all that and more. I also have a Quickflip 2. It's quick and easy to set up, comfortable and lightweight. I can easily tow it out on the lake by myself. I don't need to have another person with me to get my shelter set up.

~Scott Nickell, Eskimo Customer

Part Number	Engine RPM	CC Rating	Weight	Gear Ratio	Auger Length	Auger Diameter	Warranty
Z51Q8	8,000	51.7 cc	30 lbs	25:1	42"	8"	1 Year Limited
Z51Q9	8,000	51.7 cc	31 lbs	25:1	42"	9"	1 Year Limited
Z51Q10	8,000	51.7 cc	32 lbs	25:1	42"	10"	1 Year Limited

The Shark Series augers cut quickly through thick ice due to the Viper engines. A whopping 8,000 RPM's. Less time drilling-more time fishing.

~"Tackle" Terry Tuma, Pro Angler

Accessories

Blades: QB8, QB9, QB10 Extensions: EXT12 & EXT18 Engine Oil: 300400 & 300404 Centering Point: 90129

The point and centering ring combination on the bottom of the auger gives you unmatched control. The point keeps the auger in one location and lets you drill where you want to drill, not where the auger wants to drill. Competitor augers tend to "wander" around the ice surface searching for a place to drill. The centering ring regulates how much ice the Quantum Blades cut per revolution. This is key when you are breaking through from hard water to soft water, the auger won't jerk or become stuck because it continuously cuts the optimum amount of ice. Competitor augers have poor breakthrough ability and often leave you leery of the dreaded breakthrough with their auger.

Angle and Edge- No other blade in the industry combines the perfect angle of attack and still keep a razor sharp edge. The Quantum Blade's angle of attack to the ice surface hasn't changed much over the years, but there's a reason for that...IT WORKS! Our angle provides the best cutting performance hole after hole after hole and stays razor sharp. It won't dull after drilling just a few holes.

Extended Life- Quantum Blades are not only designed for extended life, but they are manufactured for extended life. By using the highest quality stainless steel material, they resist rust and corrosion for a longer life. The blades are also heat treated to a perfect hardness that resist wearing of the razor sharp edges and helps protect against dings and scratches that can lead to poor performance.

Quantum Blades- never a "dull" moment on the ice!

Fast starts and fast cuts are the most important things you want in an ice auger. Eskimo delivers both, and in my opinion, does it better than any other brand ever made.

~Babe Winkelman,

Host of Babe Winkelman's "Good Fishing"

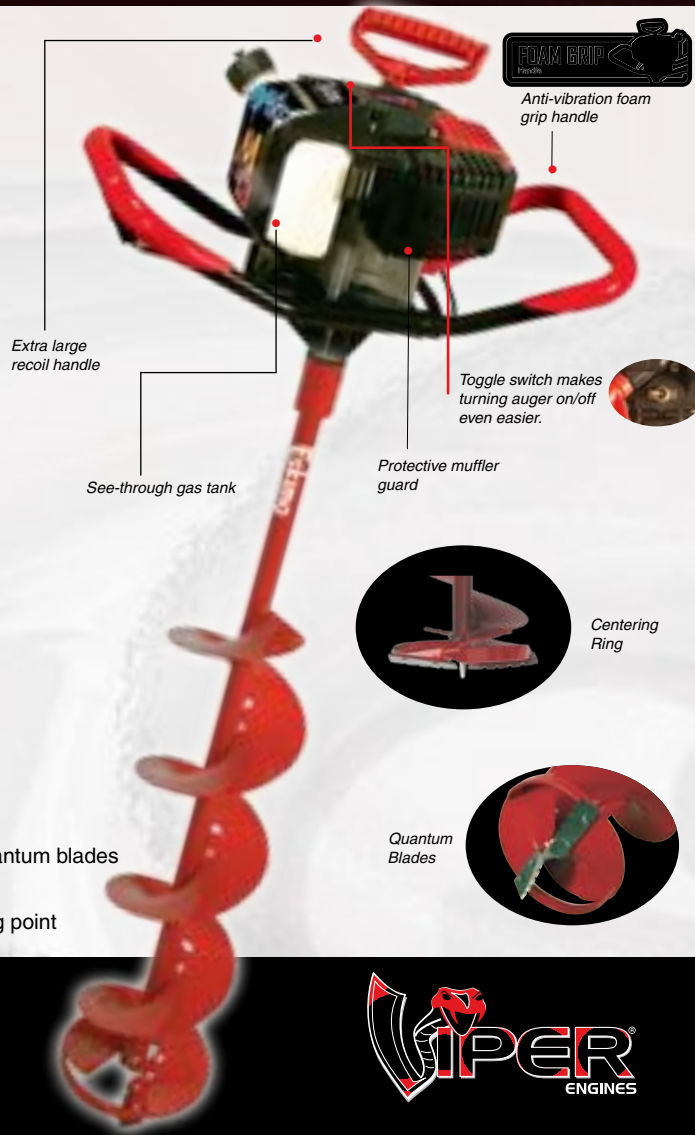

"The Right Auger For Any Angler"

MAKO M43

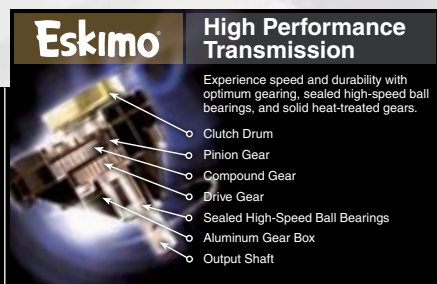

The Mako 43cc power ice auger delivers the right mix of power and comfort. The High Performance Viper engine with the industry's original anti-vibration foam grip handles fit any angler's needs.

- New for 2009, is an easily accessible **toggle switch** for turning your auger on/off.
- **High Performance 43cc Viper engine** with high torque and high RPM
- **Extra large recoil handle** lets you start the engine without taking off your gloves or mittens
- **See through gas tank** allows quick glance at fuel levels
- **Protective guard** covers muffler to protect from hot areas
- **Dual stainless steel Quantum blades** and centering point allow for the fastest, most controlled cut available
- **Anti-vibration foam grip handle bar** delivers a soft grip for comfort and control
- **Exclusive centering ring** on Quantum augers regulate how much ice is cut per revolution and makes breakthrough from hard water to soft water smooth.
- **Eskimo red powdercoat paint** finish is proven to be the most durable in the industry

Reflective corners provide additional safety

Double The Comfort

Double sided seating allows you to comfortably fit 4 ice anglers. Under seat storage and removable tables are doubled also. Overall this is the ultimate shelter for the whole crew to get out on the ice together and fish in comfort.

ESKAPE 400

- A. SKYLIGHTS** on roof allow more sunlight than ever to work with the gray interior to maximize interior light if desired.
- B. TOW HITCH FLAP** allows you to keep the shelter attached to your ATV/snowmobile without unhooking it and still keep the skirt down on the ice to prevent drafts.
- C. AIR ESKAPE VENTS** with adjustable interior flaps allow for easier, more controlled ventilation than ever before. Protective shells on the exterior keep wind and snow out.
- D. EXTRA LONG SKIRT** helps eliminate drafts and keeps the elements out.
- E. RUGGED, ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE (UHMWPE)** sleds give you extra deep, extra large storage to hold more gear. These heavy duty sleds allow you to tow at high speeds and pull easier through deep snow.

- Reflective corners, license holder and pull rope included.

ESKAPE HARD WATER SERIES

Exclusive Eskape Doors

A new feature for 2009 is the addition of two more doors. The Eskape 350 has a side door on each side along with the front door. The three doors makes this shelter have triple accessibility, for the ultimate hard water experience.

Easy Exit! Eskape 350 features two Eskape doors along with the front D-shaped door. These side doors allow for versatility and ease of use.

Shelter can be flipped in the half-position on nice days and be used as a wind break. (Feature applies to all Eskape shelters except Eskape 400.) Shown above with table in use.

Skylight's on roof allow more sunlight than ever to work with the gray interior to maximize interior light if desired.

QRS Pinch Free Pole Technology with huge, lightweight aluminum framing makes this the most revolutionary portable ice shelter ever made.

See tip-ups clearly from inside. Close flaps for darker interior

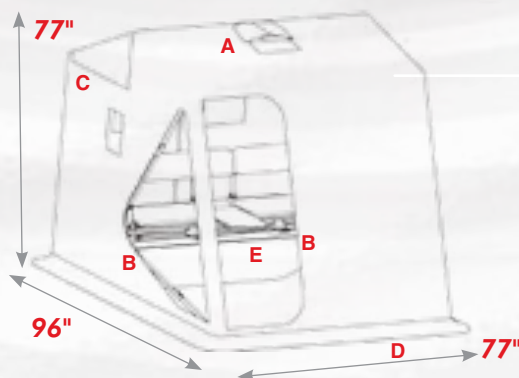

Air Eskape vents with adjustable interior flaps allow for easier, more controlled ventilation than ever before. Protective shells on the exterior keep wind and snow out.

Heavy duty fabric withstands abuse, while protecting you from the elements.

Freedom of movement with 40/20/40 allows you to slide from one side to the other without the restrictions of bucket seats. Seats and backrests flip and fold independently for easy gear access behind or under your seat.

ESKAPE 350

- A. **SKYLIGHTS** on roof allow more sunlight than ever to work with the gray interior to maximize interior light if desired.
- B. **THREE DOORS** the only shelter in the Eskape Hard Water Series that has three doors. Besides the D-shaped door in the front, both sides have an additional Eskape door to make entering and exiting easy.
- Reflective corners, license holder and pull rope included.

- C. **AIR ESKAPE VENTS** with adjustable interior flaps allow for easier, more controlled ventilation than ever before. Protective shells on the exterior keep wind and snow out.
- D. **EXTRA LONG SKIRT** helps eliminate drafts and keeps the elements out.
- E. **RUGGED, ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE (UHMWPE)** sleds give you extra deep, extra large storage to hold more gear. These heavy duty sleds allow you to tow at high speeds and pull easier through deep snow.

ESKAPE

HARD WATER SERIES

ESKAPE to Hard Water Country in One of Four Eskape Shelters

New for 2009, Eskimo introduces the Eskape Hard Water Series ice shelters. The already proven Eskimo ice shelter design and added features deliver the serious ice fisherman all that he/she requires. The Quick Release System (QRS) pinch free pole technology lets you set-up and take-down Eskape ice shelters with out pinching your skin. The QRS Pinch Free Pole Technology built on the huge, lightweight aluminum framing makes this the most revolutionary portable ice shelter ever made. But this is only the start of the new features...

Skylight's on roof allow more sunlight than ever to work with the gray interior to maximize interior light if desired.

QRS Pinch Free Pole Technology with huge, lightweight aluminum framing makes this the most revolutionary portable ice shelter ever made.

See tip-ups clearly from inside. Close flaps for darker interior

Air Eskape vents with adjustable interior flaps allow for easier, more controlled ventilation than ever before. Protective shells on the exterior keep wind and snow out.

Heavy duty fabric withstands abuse, while protecting you from the elements.

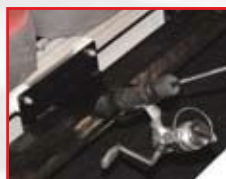

Freedom of movement with 40/20/40 allows you to slide from one side to the other without the restrictions of bucket seats. Seats and backrests flip and fold independently for easy gear access behind or under your seat.

Rugged, Extreme, Durable heavy duty fabric stands up to the worst of Mother Nature and it features a non-light absorbing inner shell. If a light interior is not needed, simply close the Clear View window flaps and Skylights for a darkened interior that allows you to see down your fishing hole with ease.

WHAT'S INSIDE?

Rod holder(s) that slide independently in the seat rail and are multi-positional.

The carpeted removable table gives you quick access to gear.

Storage Tray under bench seat gives you added storage and gear protection.

Large storage pockets give you a place to keep gear handy.

Many new features make fishing extremely comfortable and well organized. All of these high performance features are included in the Eskape Hard Water Series

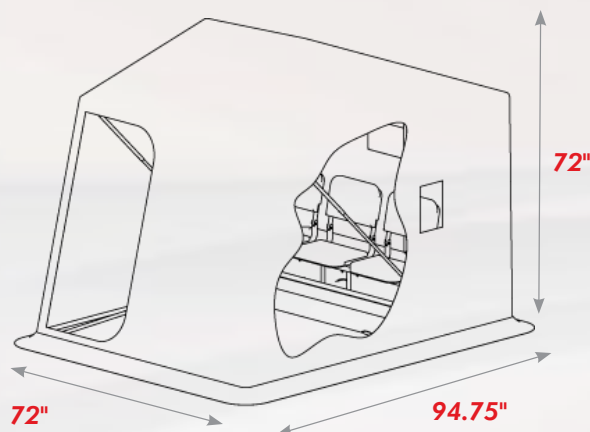

QUICKFLIP SERIES

Quickflip Series

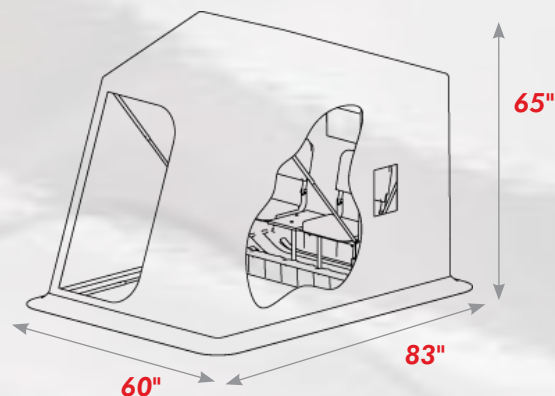

Eskimo's Proven Time Tested Design

The Eskimo Quickflip Series has been the trustworthy, reliable choice of ice anglers for years. This is because of the value added economic design. Using strong steel frame work, durable UHMWPE sleds and new for 2009, RED- Rugged, Extreme, Durable fabric, The Quickflip Series continues to lead the way in flip style ice shelters.

- **RED- Rugged, Extreme, Durable fabric** withstands the worst of Mother Nature and it features a non-light absorbing gray shell.
- Exclusive **center table** on Quickflip 2 for convenience.
- **Dual-pull, D-shaped zippered door** is strategically placed for added interior room (put your heater in opposite corner) and feature a premium YKK® #10 coil style zipper, the best zipper in the world.
- **Vents** with adjustable interior flaps allow for controlled ventilation.
- **Extra long skirt** helps eliminate drafts and keeps the elements out.
- **Large storage pockets** give you a place to keep gear handy.
- **Rugged, Ultra High Molecular Weight PolyEthylene (UHMWPE) sleds.**
- **Clear View windows** on all sides for crystal clear viewing when tip-up fishing. Windows have interior flaps for interior darkening.
- **Shelter can be flipped in the half-position on nice days and be used as a wind break.**
- **Reflective corners, license holder and pull rope included.**

QUICKFISH 6

No. 1
PORTABLE
ICE SHELTER

EXTREME PORTABILITY

Unprecedented compact travel size for extreme portability. It even fits in the back seat of a car. Backpack carrying case included.

60 SECOND SET-UP

Hub system technology for amazingly quick set-up and take-down.

RED- RUGGED

Rugged, Extreme, Durable fabric withstands the worst of Mother Nature.

CONTROLLED VENTILATION

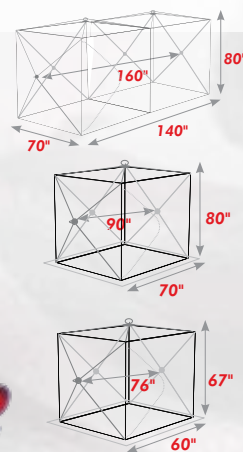

Vents with adjustable interior flaps allow for controlled ventilation. Protective shells on the exterior keep wind and snow out.

CLEAR VIEW

Clear View windows on all sides for crystal clear viewing when tip-up fishing. Windows have interior flaps for interior darkening.

Extreme portability with this lightweight, easy-to-transport shelter. Easily fits into backpack style storage bag. Move from one hot spot to another in minutes.

- The most compact, portable ice shelter on the market
- Heavy duty ice anchors with tie-off ropes included for stability, even in high wind conditions. Anchors and rope stow away in special pouch for travel.
- Dual-pull, zippered door feature a premium YKK® #10 coil style zipper, the best zipper in the world.
- Extra long skirt helps eliminate drafts and keeps the elements out.
- Large storage pockets give you a place to keep gear handy.
- Reflective corners and license holder included.

Easy to take down and transport.

Part Number	Capacity	Setup	Hub to Hub	Height	Weight
69149 • Quickfish 6	6.0 person	140" X 70"	160" X 90"	80"	38 lbs.
69143 • Quickfish 3	3.0 person	70" X 70"	90" X 90"	80"	23 lbs.
69151 • Quickfish 2	2.0 person	60" X 60"	76" X 76"	67"	18 lbs.

The Eskimo Quickfish is lightweight, easy to set-up, incredibly roomy and can be packed up and stored just about anywhere.

~Ron Anlauf, Pro Fisherman

The comfort and versatility of the Eskimo Eskape ice shelter is outstanding. I am especially loving the change in set-up, the comfort of the bench seats and the multiple windows and vents.
~Jeff Crocket, St. Croix Rods

Travel Covers

Keeps the snow and slush out while pulling or trailering your Eskimo ice shelter

- Same Eskimo RED, Rugged, Extreme, Durable fabric as shelters
- Elastic band ensures secure fit
- Reinforced corners at wear points

BARRACUDA

HAND AUGERS with TurboCut Blades

STANDARD

HAND AUGERS with Quantum Blades

- Revolutionary TurboCut blades are curved allowing you to drill faster
- Palm grip handle for comfort and ease-of-use
- Two piece breakdown system for easy transport
- Two piece adjustable length
- Three-position handle adjustment-55", 59" and 63" lengths
- Dual stainless steel TurboCut blades or Quantum blades are replaceable
- Blade protector extends the life of blades
- Eskimo red powdercoat paint finish, the most durable in the industry

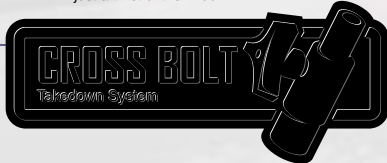

Barracuda with TurboCut Blades

Standard with Quantum Blades

Prevents overtightening when you drill. Screw together hand augers tighten as you drill, making them virtually impossible to take apart. Eskimo's Cross bolt Take down Technology comes apart with just a twist of the knob.

Adjusts to three different lengths 55", 59", and 63"

I like using my Eskimo hand auger during early ice when its necessary to travel light to find the fish. All I do is turn the handle and the blades chew right through effortlessly.

~Griff Ruppel, Eskimo Customer

REDNECK CHISELS

FASTER CHISELING. Triple and double action chisel blade chops through ice with less effort.

REDNECK CHISELS Five models to fit any angler

The entire Redneck Chisel line comes equipped with these features:

- Webbing tether handle prevents chisel slipping from hand and losing chisel down the hole.
- Heavy duty, fully-welded steel design and Eskimo red powdercoat finish.
- Rubber chisel head protector
- Anti-vibration foam grip handle (excludes Dual Headed Bucket Chisel)

CHISEL/GAFF COMBO

Ultimate combo tool for any angler

The Redneck Chisel/Gaff combo gives you 3 unique features. The best tip-up chiseling tool available, the finest high-quality gaff on the market, and unmatched transport.

- Compact transport, chisel and gaff slide together (chisel: 36" L, Gaff: 32" L)

DUAL HEADED BUCKET CHISEL

Two Heads are Better Than One

The Redneck Bucket Chisel delivers the same advanced chiseling technology as the rest of Redneck family of chisels, but offers two different heads. One end is great for chiseling or chopping using a hammer motion. The other end allows the angler to use a standard downward motion. So, if it's opening previous holes or chiseling around tip-ups, all you need is one tool.

- Compact size allows it to fit in a bucket – 19" long
- New for 2009, hammer head and wire hole. Doubles as a trapper's tool and bends trapping wire.

TWO-PIECE CHISEL

Heavy Duty Chiseling- Compact Transport

Eskimo's Redneck 2-piece chisel delivers the most efficient chiseling due to its triple action blade technology. Transport is quick and easy with slip-fit and locking spring pin.

- Anti-vibration foam grip handle

ONE-PIECE CHISEL

Heavy Duty Chiseling

Eskimo's 1-piece Redneck ice chisel features the revolutionary triple action blade technology. While chiseling there are three points of contact, thus providing up to three times faster chiseling over regular chisels.

SHORT CHISEL

Precise Chiseling

Eskimo's Short Redneck ice chisel features the revolutionary triple action blade technology, yet is short enough for convenient transport. Short design gives you more precise chiseling around tip-ups.

Ice Chisels	Length	Part Number
Gaff/Chisel	37"	CH8
Bucket Chisel	19"	CH9
Short	25.5"	CH10
One-Piece	59.5"	CH11
Two-Piece	64"	CH12

Early and late ice calls for Eskimo Redneck ice chisels when reopening holes. The balanced weight and tooth design handles this with ease.

All weights, specifications and features are approximate and are subject to change

Whenever I fish with someone, I always say "First Pull" before firing up the Eskimo, and it always obeys. Having that kind of confidence in your equipment is awesome.

~Mike Weinkauff, Co-host of Babe Winkelman's "Good Fishing"

Viper Tune-Up Kit

Keep your Viper engine running smoothly with Viper 2-cycle semi-synthetic blend smokeless oil with fuel stabilizer

- Includes spark plug and plug wrench
- Air filter
- Fuel filter

Viper Engine Oil

Viper semi-synthetic, smokeless, 2-cycle engine oil with fuel stabilizer is specifically blended for Viper engines.

- It maximizes performance of not only Viper powered ice augers but also chain saws, motorcycles, mowers, string trimmers, snow blowers and all other air-cooled engines
- It's safe for the environment and the equipment operator because it eliminates exhaust smoke.
- Viper oil maintains a clean fuel system and removes the need for draining fuel at the end of the season

AUGER ACCESSORIES & REPLACEMENT PARTS

Fast starts and fast cuts are the most important things you want in an ice auger. Eskimo delivers both, and in my opinion, does it better than any other brand ever made.

~Babe Winkelman, Host of Babe Winkelman's "Good Fishing"

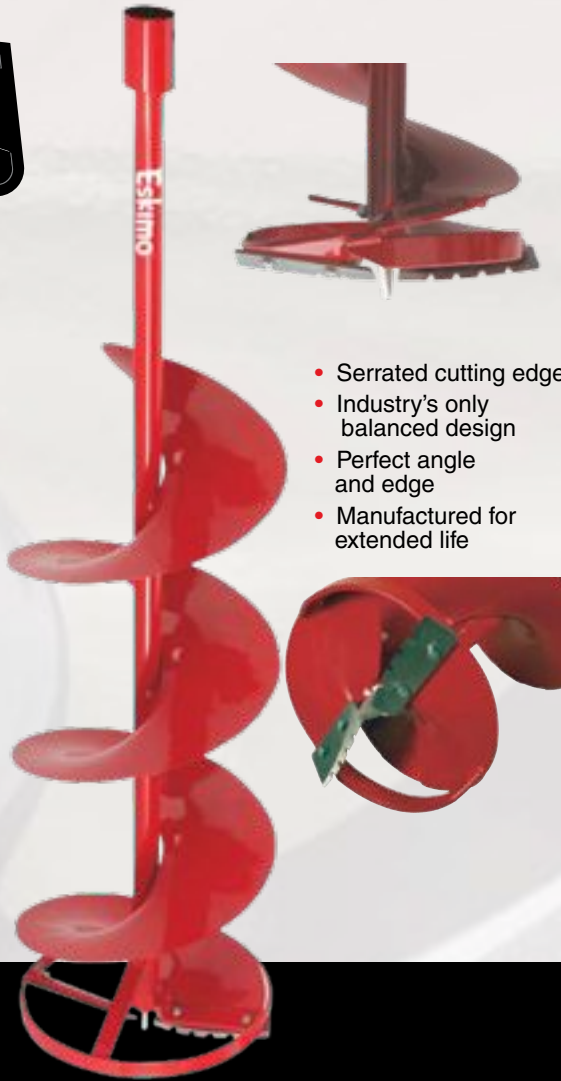

Never A Dull Moment On The Ice!

Power Ice Augers

Eskimo's original Quantum Blade design has been tearing holes through hard water country for almost 50 years. Billions of holes later, the Quantum Blade design continues to lead the industry in cutting speed, cutting control, cutting smoothness and long lasting, high performance

- Available in 8", 9" & 10" diameters
- 42" overall length
- Dual stainless steel Quantum blades for maximum cutting performance
- Replaceable centering point prevents auger from wandering
- Centering Ring regulates how much ice is cut per revolution
- Blade protector included
- Mounting hardware included

- Serrated cutting edge
- Industry's only balanced design
- Perfect angle and edge
- Manufactured for extended life

TESTIMONIALS

My wife and I did some night fishing this season in our Eskape 300. It set up quickly and we had room to fish comfortably and still had enough room for our heater. I used the Shark Z71 with a 10" Quantum Auger to punch the holes and when I fired it up, I think every person on the lake was looking to see what I was using for an auger because it just blasted through the ice in seconds. The combination of these two products gave us more time to enjoy our crappie fishing trip.

~Dan Sours, Eskimo Customer

The Eskimo Eskape is my idea of the ultimate dream house and provides plenty of warmth and comfort. From the cushy bench seats to the super smart skylight to the new QRS Pinch Free Pole Technology that makes set-up and take-down a snap, the Eskape has it all and is everything I need in a portable shelter!

~Ron Anlauf, Pro Fisherman

For optimum power, speed and weight, the Shark Z51 from Eskimo gives you all that and more. I also have a Quickflip 2. It's quick and easy to set up, comfortable and lightweight. I can easily tow it out on the lake by myself. I don't need another person with me to get my shelter set up.

~Scott Nickell, Eskimo Customer

The Original Alaskan Hat

This rugged cold weather hat features a variety of outer shells with soft quilted lining and forehead, chin and ear flaps lined with rabbit fur. The outer shells are available in leather, heavy-duty poly, 65/35 poly-cotton blend and durable Taslan™ nylon.

Suede Alaskan Hat

This Alaskan style hat features a synthetic fur inner lining and a soft durable suede outer shell for winter warmth. Fur stripes on outer shell add style to this classic hat.

Visor Alaskan Hat

This Alaskan style hat with chin and ear flaps lined with rabbit fur and a standard visor make this a great outdoor work hat

Fur Trooper Hats

These rabbit fur hats feature soft, quilted lining for added warmth in extreme conditions. Ties secure the ear flaps on top of the head or under the chin for added warmth.
