 Note: To allow for movement in Rubber Waders, your inseam should be approximately 4-6 inches less than the wader inseam, measured crotch to floor with no shoes.

2010 PRODUCTS | E S C A P E

There are places we go to get away from it all. Special places, where the sun and fresh air and water wash away the everyday, and one deep breath reminds us why we love to fish. For some of us it's a tiny mountain stream where each pool and riffle holds the promise of a wary brookie. For others it's a slow, lazy run where the telltale ripples of rising rainbows quickens the pulse. And for still others it's a sand flat baking under the Caribbean sun, where the sight of tailing permit or hunting bonefish drives us to cast just a little further. For those of us who know them, these places are as sacred as any church, and just as good for the soul.

At **Frogg Toggs Wadewear**, we make products designed to help you make the most of every chance you get to escape to your special place. Our waders, boots, jackets and accessories are built to the highest quality standards, with the finest materials, and with all the features you expect when choosing your gear. We build them this way because we have our own special places, and we know how precious every moment spent there truly is. The only thing you won't find on a frogg toggs Wadewear product is a high price tag, because we believe solid, dependable fishing gear should keep you warm, dry and comfortable without putting a hole in your wallet.

At Frogg Toggs we even make sure our packaging is well designed. Each wader box has a handy sizing chart on the bottom, so customers always know what size they need.

## PILOT™
